Hawai‘i
Consolidated State Plan
The Elementary and Secondary Education Act of 1965, as amended by the Every Student Succeeds Act

U.S. Department of Education
Issued: March 2017

OMB Number: 1810-0576
Expiration Date: September 30, 2017

Paperwork Burden Statement According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. The valid OMB control number for this information collection is 1810-0576. The time required to complete this information collection is estimated to average 249 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this collection, please write to: U.S. Department of Education, Washington, DC 20202-4537. If you have comments or concerns regarding the status of your individual submission of this collection, write directly to: Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Ave., S.W., Washington, DC 20202-3118.

**Introduction**

Section 8302 of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA), requires the Secretary to establish procedures and criteria under which, after consultation with the Governor, a State educational agency (SEA) may submit a consolidated State plan designed to simplify the application requirements and reduce burden for SEAs. ESEA section 8302 also requires the Secretary to establish the descriptions, information, assurances, and other material required to be included in a consolidated State plan. Even though an SEA submits only the required information in its consolidated State plan, an SEA must still meet all ESEA requirements for each included program. In its consolidated State plan, each SEA may, but is not required to, include supplemental information such as its overall vision for improving outcomes for all students and its efforts to consult with and engage stakeholders when developing its consolidated State plan.

**Completing and Submitting a Consolidated State Plan**

Each SEA must address all of the requirements identified below for the programs that it chooses to include in its consolidated State plan. An SEA must use this template or a format that includes the required elements and that the State has developed working with the Council of Chief State School Officers (CCSSO).

Each SEA must submit to the U.S. Department of Education (Department) its consolidated State plan by one of the following two deadlines of the SEA’s choice:

- **April 3, 2017; or**
- **September 18, 2017.**

Any plan that is received after April 3, but on or before September 18, 2017, will be considered to be submitted on September 18, 2017. In order to ensure transparency consistent with ESEA section 1111(a)(5), the Department intends to post each State plan on the Department’s website.

**Alternative Template**

If an SEA does not use this template, it must:

1. Include the information on the Cover Sheet;
2. Include a table of contents or guide that clearly indicates where the SEA has addressed each requirement in its consolidated State plan;
3. Indicate that the SEA worked through CCSSO in developing its own template; and
4. Include the required information regarding equitable access to, and participation in, the programs included in its consolidated State plan as required by section 427 of the General Education Provisions Act. See Appendix B.

**Individual Program State Plan**

An SEA may submit an individual program State plan that meets all applicable statutory and regulatory requirements for any program that it chooses not to include in a consolidated State plan. If an SEA intends to submit an individual program plan for any program, the SEA must submit the individual program plan by one of the dates above, in concert with its consolidated State plan, if applicable.

---

1 Unless otherwise indicated, citations to the ESEA refer to the ESEA, as amended by the ESSA.
Consultation
Under ESEA section 8540, each SEA must consult in a timely and meaningful manner with the Governor, or appropriate officials from the Governor’s office, including during the development and prior to submission of its consolidated State plan to the Department. A Governor shall have 30 days prior to the SEA submitting the consolidated State plan to the Secretary to sign the consolidated State plan. If the Governor has not signed the plan within 30 days of delivery by the SEA, the SEA shall submit the plan to the Department without such signature.

Assurances
In order to receive fiscal year (FY) 2017 ESEA funds on July 1, 2017, for the programs that may be included in a consolidated State plan, and consistent with ESEA section 8302, each SEA must also submit a comprehensive set of assurances to the Department at a date and time established by the Secretary. In the near future, the Department will publish an information collection request that details these assurances.

For Further Information: If you have any questions, please contact your Program Officer at OSS.[State]@ed.gov (e.g., OSS.Alabama@ed.gov).
## Contact Information and Signatures

By signing this document, I assure that:

To the best of my knowledge and belief, all information and data included in this plan are true and correct.

The SEA will submit a comprehensive set of assurances at a date and time established by the Secretary, including the assurances in ESEA section 8304.

Consistent with ESEA section 8302(b)(3), the SEA will meet the requirements of ESEA sections 1117 and 8501 regarding the participation of private school children and teachers.

Programs Included in the Consolidated State Plan

Instructions: Indicate below by checking the appropriate box(es) which programs the SEA included in its consolidated State plan. If an SEA elected not to include one or more of the programs below in its consolidated State plan, but is eligible and wishes to receive funds under the program(s), it must submit individual program plans for those programs that meet all statutory and regulatory requirements with its consolidated State plan in a single submission.

☑ Check this box if the SEA has included all of the following programs in its consolidated State plan.

or

If all programs are not included, check each program listed below that the SEA includes in its consolidated State plan:

☐ Title I, Part A: Improving Basic Programs Operated by Local Educational Agencies

☐ Title I, Part C: Education of Migratory Children

☐ Title I, Part D: Prevention and Intervention Programs for Children and Youth Who Are Neglected, Delinquent, or At-Risk

☐ Title II, Part A: Supporting Effective Instruction

☐ Title III, Part A: English Language Acquisition, Language Enhancement, and Academic Achievement

☐ Title IV, Part A: Student Support and Academic Enrichment Grants

☐ Title IV, Part B: 21st Century Community Learning Centers

☐ Title V, Part B, Subpart 2: Rural and Low-Income School Program

☐ Title VII, Subpart B of the McKinney-Vento Homeless Assistance Act: Education for Homeless Children and Youth Program (McKinney-Vento Act)

Instructions

Each SEA must provide descriptions and other information that address each requirement listed below for the programs included in its consolidated State plan. Consistent with ESEA section 8302, the Secretary has determined that the following requirements are absolutely necessary for consideration of a consolidated State plan. An SEA may add descriptions or other information, but may not omit any of the required descriptions or information for each included program.
Hawai‘i Consolidated State Plan:
Uniting for the Success of All Students

“Together, we will make progress toward a public education system that includes the basics and adds new skills that prepare all our people to meet the challenges of the 21st century.”
– Governor David Y. Ige

"When we unite with the success of our students in mind, great things are possible."
– Superintendent Kathryn Matayoshi

Public Education in Hawai‘i

Hawai‘i envisions an education system in which “Hawai‘i’s students are educated, healthy, and joyful lifelong learners who contribute positively to our community and global society.” This has been the vision of the Hawai‘i Department of Education (HIDOE) since the onset of the Hawai‘i Department of Education & Board of Education Strategic Plan 2011-2018. In December 2016, the Hawai‘i Board of Education (BOE) approved the Hawai‘i Department of Education & Board of Education Strategic Plan 2017-2020 (HIDOE/BOE Strategic Plan), which continues our commitment to the above-stated vision and the HIDOE mission:

We serve our community by developing the academic achievement, character, and social-emotional well-being of our students to the fullest potential. We work with partners, families, and communities to ensure that all students reach their aspirations from early learning through college, career, and citizenship.

To help advance our mission, HIDOE established a framework of outcomes that reflects HIDOE’s core values and beliefs in action throughout our public education system. In June 2015, the BOE approved the Hawai‘i Board of Education policy E-3 (Ends Policy 3): Nā Hopena Aʻo – hopena meaning “end goals” and ao meaning “learning and teaching”. Nā Hopena Aʻo, or HĀ (“breath” in the Hawaiian language), which was developed through a widespread community process of dialogue, feedback, and co-creation, includes competencies designed to develop a strengthened sense of Belonging, Responsibility, Excellence, Aloha, Total well-being, and Hawai‘i (“BREATH”) in all students and staff at all levels within the HIDOE community. HĀ has grounded the development of the HIDOE/BOE Strategic Plan in the values and traditions that are unique to Hawai‘i. With implementation being led by HIDOE’s Office of Hawaiian Education, the HĀ philosophy is being infused into every aspect of work and learning in HIDOE and also in partner agencies.

The Nā Hopena Aʻo competencies, or statements, represent a starting point—a lens that can be used to guide behavior in everyday practice, both in the schools and in the state offices, for students as well as staff. Nā Hopena Aʻo describes the learning environment that we strive to have for our students. It encompasses academic achievement in the competency of “excellence” but expands to include broader perspective on academic mindsets needed to succeed in college, careers and in our local and global communities. HĀ is a philosophy through which we educate our students in a holistic learning process that is place-based and
grounded in the values and traditions of our state’s host culture and that also represents the working environment we aspire to for our employees and stakeholders.

Stakeholders’ familiarity with the Nā Hopena Aʻo competencies organized and described as HĀ is developing. However, a commitment to Nā Hopena Aʻo is shared among key documents guiding the future of public education in Hawaiʻi.

For the HIDOE, it is our vision, our mission, and our core values of HĀ that guide our work for our students and the future of the state.

Hawaiʻi’s Unique Educational Structure

Hawaiʻi has a unique educational structure as the only state with a P-20 continuum supported by a single governing body for K-12 public education and higher education: The State of Hawai‘i Board of Education and the University of Hawai‘i Board of Regents, respectively. HIDOE serves as both the State Education Agency (SEA) and the Local Education Agency (LEA), and the University of Hawai‘i System encompasses the state’s ten colleges and universities from our community college campuses to our Carnegie R1 flagship university. Ensuring articulation across the P-20 continuum is the Hawai’i P-20 Partnerships for Education, a statewide collaboration between the Executive Office of Early Learning (established in 2012), HIDOE, and the University of Hawai‘i System with the goal of improving educational outcomes throughout the state. Hawai‘i’s P-20 collaboration has endured more than a decade and is organized around the statewide goal of “55 by ’25”, a statewide workforce development goal to have 55 percent of working age adults hold a 2- or 4-year degree by the year 2025.

HIDOE’s 256 K-12 public schools and 34 public charter schools, which are located on seven of Hawai‘i’s eight main islands, collectively make up the 10th largest school system in the nation, serving approximately 180,000 students. The HIDOE-operated schools are organized into 42 complexes, made up of a high school and its feeder middle/intermediate and elementary schools. Complexes, in turn, are grouped on a geographic basis into 15 complex areas.

Article X of the Hawai‘i State Constitution authorizes the Hawai‘i State Board of Education (BOE) as the policy-making body of the Hawai‘i K-12 public education system. The BOE consists of nine voting members appointed by the Governor with the advice and consent of the Senate; a public high school student who is selected by the Hawai‘i State Student Council and serves as a non-voting member; and a military
representative who is appointed by the senior military commander in Hawai‘i and also serves as a non-voting member. As set forth in Hawai‘i Revised Statutes 302A-1101, the BOE is the governing board for public education and has statutory responsibility for adopting standards and assessment models, monitoring school success, appointing the superintendent of education who serves as chief executive officer, and appointing members of the Hawai‘i State Public Charter School Commission who are responsible for authorizing public charter schools.

The BOE appoints the superintendent of education (Superintendent), who serves as both the Chief State School Officer and organizational head of HIDOE\(^2\). The Superintendent has direct line authority over all employees in both administrative units and schools, more than 20,000 including approximately 11,000 teachers. Together with the Governor and the Board of Education, the Superintendent negotiates with the collective bargaining units representing teachers (Bargaining Unit 5, Hawai‘i State Teachers Association) and educational officers, including school principals (Bargaining Unit 6, Hawai‘i Government Employees Association). The Superintendent also oversees the state offices of Hawaiian Education, Monitoring and Compliance, Civil Rights Compliance, Community Engagement and Strategy, Innovation and Performance and appoints the Deputy Superintendent, who serves as the chief academic officer, and the Senior Assistant Superintendent, who has oversight over four offices within HIDOE: the Office of Fiscal Services, the Office of School Facilities and Support Services, the Office of Human Resources, and the Office of Information Technology.

The Deputy Superintendent oversees the Office of Curriculum, Instruction and Student Support and the School Transformation Branch. In addition to the state offices, the Deputy Superintendent supervises the fifteen Complex Area Superintendents who are appointed to lead each complex area and maintain direct supervisory connection to HIDOE’s fifteen school complex areas. Specifically, the Complex Area Superintendents oversee personnel, fiscal and facilities support; monitor compliance with applicable state and federal laws; and oversee curriculum development, student assessment, and staff development services – all with the goal of increasing student achievement.

The BOE oversees the State Public Charter School Commission (the Commission). Currently, the Commission is the only public charter school authorizer in Hawai‘i. However, the BOE has recently approved a policy to allow for multiple public charter school authorizers who would have the authority to approve, deny, reauthorize, and revoke charter contracts. The charter authorizers are also responsible for ensuring the public charter schools’ compliance with the Elementary and Secondary Education Act (ESEA) and applicable federal laws as cited in Act 130, Session Laws of Hawai‘i 2012. Consequently, the BOE, by way of its authority over all charter authorizers, is also responsible for ensuring the public charter schools’ compliance with applicable federal laws.

Hawai‘i’s Educational Reform Efforts – Recent Leg of Our Journey

Our belief in the ability and potential of each and every child in our public schools led the BOE and HIDOE to set clear statewide standards linked to high expectations for all students. In a rapidly changing world, we cannot know what our entering kindergarteners will one day dream of achieving when they graduate from high school or the opportunities and challenges that they will face as they grow into leaders locally and

\(^2\) For more information about the HIDOE organizational structure, see http://www.hawaiipublicschools.org/ConnectWithUs/Organization/Pages/home.aspx
globally. Our job is to equip these students with the knowledge and capabilities to succeed at their chosen path in life.

The establishment of the first joint HIDOE/BOE Strategic Plan in 2012 built upon reforms we began ten years ago in response to critical challenges: Hawai‘i’s student achievement lagged nationally and students who struggled to meet proficiency in core subjects were unable to progress successfully through their K-12 journey. Too many of our high school graduates were not meeting the entry requirements for workforce, college, apprenticeship programs, or military service options. We focused our efforts on ensuring students had the skills, values, and supports necessary or their next steps in life.

To best support students’ goals in 2012, we implemented comprehensive statewide supports. We focused on rigorous standards-based instruction and ensuring the quality of the high school diploma. We continued to invest heavily in collecting, reporting and supporting the use of transparent, real-time data so we could better understand and mobilize around students’ needs and progress. We established teacher induction and mentoring programs statewide and focused professional development and feedback on improving teachers’ professional foundation for educators to support students, including a common language and high expectations for teachers’ professional practice and student learning. We used our federal waiver from No Child Left Behind to implement the Strive HI Performance System, a school accountability system focused on college- and career-readiness and based on multiple measures, beginning in School Year (SY) 2012-13. We adopted and implemented Hawai‘i Common Core Standards, which define the knowledge and skills students need to succeed in college and in their careers, and the Smarter Balanced Assessment (SBA) in mathematics and English Language Arts/Literacy (ELA), which are aligned to the Hawai‘i Common Core Standards. The Hawai‘i Common Core Standards were fully implemented in SY 2013-14 and the SBA was first administered statewide in SY 2014-15.

With this new infrastructure in place, and a great deal of hard work on the part of educators, students, families and key community partners, Hawai‘i was one of two states that led the nation in overall gains in mathematics and reading proficiency as measured by the National Assessment of Educational Progress (NAEP) over ten years, which was recognized by the U.S. Chamber of Commerce in 2015 (https://www.uschamberfoundation.org/reports/laggards-leaders-how-three-states-found-their-way-forward). Students’ participation in advanced course-taking and early college programs in which high school students earn college credit have both increased substantially. More students are going onto higher education and are more prepared to succeed once they matriculate.

In 2015, HIDOE’s Office of Hawaiian Education was established under the Superintendent following a policy audit and revised Board policies on Hawaiian Education (BOE Policy 105-7) and Ka Papahana Kaiapuni (BOE Policy 105-8). This is part of a commitment to strengthening our Hawaiian education, language and culture. By Article XV of the State Constitution, Hawai‘i recognizes two official state languages – English and Hawaiian. HIDOE provides opportunities for K-12 education delivered through the medium of the Hawaiian language through (1) full Hawaiian language immersion schools in which all
students are enrolled in Ka Papahana Kaiapuni, the Hawaiian language immersion program; (2) Hawaiian language immersion schools in which majority of the students are enrolled in Ka Papahana Kaiapuni and the students not enrolled in Ka Papahana Kaiapuni receive instruction in English; and (3) Kaiapuni Educational Programs in English medium schools. Ka Papahana Kaiapuni is currently offered at 17 of the 256 HIDOE schools and six of the 34 public charter schools. Of the 17 HIDOE Kaiapuni schools, two are Hawaiian language immersion schools and 15 are English-medium schools with Hawaiian language immersion programs on campus. Hawai‘i is innovating in addressing education in indigenous languages. Hawai‘i has adopted Hawaiian Language Arts Standards (aligned to Common Core Standards in English Language Arts/Literacy) and is pioneering standards-based assessments in the Hawaiian language.

The Kaiapuni Assessment for Educational Outcomes (KAEO), a Hawai‘i Common Core-aligned Hawaiian language assessment for Hawaiian language arts and mathematics, is currently administered to students in grades 3 and 4 enrolled in Ka Papahana Kaiapuni so that students may be assessed in the language of instruction. KAEO instruments were developed in the Hawaiian language. The KAEO for Hawaiian language arts and mathematics was piloted in SY 2014-15 and has been included in the school accountability system beginning SY 2015-16. Hawai‘i was granted a waiver for SY 2014-15 and 2015-16 to exclude students who participated in the KAEO from the administration of the SBA. Hawai‘i plans to expand the KAEO to grades 5-8 with the field test in Spring 2018. The Hawaiian Language Arts Standards, adopted by the BOE in Spring 2017, and KAEO assessments will be submitted to the U.S. Department of Education for peer review as required by ESSA.

Over the past ten years, Hawai‘i has achieved steady progress in students’ educational outcomes, whether in academic achievement or college enrollment. We are inspired by the growth to date; however, our students are not succeeding equally and we see persistent gaps in achievement between students. We must consider the needs of students in ethnic groups that are historically underrepresented in career, college and community success metrics; it is important to recognize the role of multiculturalism and multilingualism in providing a meaningful and equitable education for student achievement. Hawai‘i, like many states across the country, continues to struggle with an “achievement gap” that separates the engagement and achievement of high needs students from that of their non-high needs peers. We also know that all our students need to graduate from high school prepared for careers – whether those careers require post-secondary education or not – because their personal and families’ futures as well as the future of our state depends on it. Despite an improving economy and low state unemployment rates, many families continue to struggle financially. Currently, more than 50 percent of Hawai‘i’s public school students are economically disadvantaged compared with 38 percent in 2008. Achieving positive outcomes for all our students and becoming nationally recognized as an educational leader requires that HIDOE, the public charter schools, state agencies, and family and community stakeholders come together in new ways. Together, we can address the challenges facing our state and keiki (children).

Hawai‘i’s proposed plan to the U.S. Department of Education for ESSA builds on a comprehensive and coherent reform agenda that is embedded within Hawai‘i’s updated HIDOE/BOE Strategic Plan. Hawai‘i’s Consolidated State Plan has been developed to closely align with the HIDOE/BOE Strategic Plan, which outlines HIDOE’s goals and objectives for 2017-2020.

The Hawai‘i Department of Education & Board of Education Strategic Plan

The HIDOE/BOE Strategic Plan provides a common foundation of expectations and supports for all
students in Hawai‘i’s public schools and recognizes both of Hawai‘i’s official languages. The HIDOE/BOE Strategic Plan is a compact between the BOE, HIDOE, and the community about Hawai‘i’s goals for public education and the support and investment necessary to achieve these goals. To build upon progress made under the 2012 Strategic Plan and to refine and focus our efforts to achieve our goals for our students, HIDOE and the BOE reviewed its plans during 2016.

On December 6, 2016, following a 10-month process of reflection, analysis, research and extensive community engagement, the BOE approved an updated HIDOE/BOE Strategic Plan for 2017-2020. The updated HIDOE/BOE Strategic Plan influences the educational opportunities and outcomes for all public school students. The HIDOE/BOE Strategic Plan provides a common foundation of expectations for three goals – 1) student success, 2) staff success, and 3) successful systems of support – and establishes statewide indicators and targets. Each of the goals has identified objectives, which outline broad sub-objectives to clarify each goal. Figure 1.2 outlines the three goals in the HIDOE/BOE Strategic Plan. At the center and focus of HIDOE is Goal 1 - Student Success, surrounded by Goal 2 - Staff Success, which is supported by the Goal 3- Successful Systems of Support. All three goals are encompassed within the learning environment of Nā Hopena A‘o.

Figure 1.2. HIDOE/BOE Strategic Plan Goals

While state goals are shared by schools statewide, there is flexibility in how schools and complex areas develop their plans to meet these goals and objectives because each community has different strengths, challenges, priorities, and resources. The updated HIDOE/BOE Strategic Plan strikes a new balance between maintaining shared expectations for all schools and students and supporting diverse approaches and community-based objectives. Hawai‘i acknowledges the diverse perspectives that schools, complex areas, and communities have on defining, measuring, and achieving success and allows schools and complex areas to address statewide expectations set forth in the HIDOE/BOE Strategic Plan while prioritizing actions and strategies that are meaningful to their students, schools, and community.

The BOE and HIDOE will align investments and processes to achieve strategic plan goals. HIDOE’s tri-level structure provides the means to ensure all levels – state, complex area, and school – are actively engaged in efforts to implement and supports the HIDOE/BOE Strategic Plan (Table 1.1). The HIDOE/BOE Strategic Plan informs HIDOE state offices’, complexes’, and schools’ planning; the state’s
Achieving the goals and objectives for all of Hawai‘i’s students requires complementary actions at schools, complex areas, and state offices in partnership with families, the community, and state government.

**Statewide Conversations on Public Education**

Hawai‘i places a high priority on meaningfully engaging all stakeholders in the development, review, and adoption of the consolidated state plan. Over the last year, there have been unprecedented opportunities for education stakeholders to learn about education and share their dreams, hopes, experiences, expertise and ideas to shape our state’s education future. There have been forums about aspirations for education, action plans for education, and ESSA held by the Governor, legislative education leaders, BOE, HIDOE, teachers’ union and community organizations.

In late April of 2016, Governor David Ige convened an “ESSA Team” focused on creating a “blueprint” for education. [Hawai‘i’s Blueprint for Public Education](#) (Blueprint) is intended to be an aspirational and visionary document, a broad view of education including early childhood, higher education and labor. As part of the process, the Governor and his ESSA Team held an Education Summit on July 9, 2016 with more than a thousand participants and hosted meetings with the BOE to ensure alignment of his Blueprint with the HIDOE/BOE Strategic Plan.

HIDOE coordinated its efforts between the development of the HIDOE/BOE Strategic Plan and the consolidated state plan to obtain input from multiple stakeholder groups (Appendix C). Stakeholders are valued as a critical part of the development of the state framework and a wide range of engagement
methods were utilized to gather feedback at various time periods throughout the development, review and adoption process. HIDOE employed strategic engagement methods to appropriately match the audience with the decision points and, most importantly, to provide participants with a venue to engage in meaningful dialogue.

To update the HIDOE/BOE Strategic Plan, which informs the consolidated state plan for ESSA, the BOE and HIDOE embarked on an in-depth process that included conversations with thousands of education stakeholders – students, parents, educators, community partners, elected officials, employers, and higher education – as well as analyses of progress, data, and research. The process engaged the community in reflecting on progress made, stubborn challenges, lessons learned, and new approaches that are needed to support achieving our goals for Hawai‘i’s children and for our island home.

Additionally, there were ESSA-specific forums as well. The National Governors Association, National Council of State Legislatures, and Senate education committee Chairman Lamar Alexander and his staff were among the ESSA architects and influencers who shared information with various Hawai‘i stakeholders. In addition to the outreach for the Governor’s Blueprint and HIDOE/BOE Strategic Plan, HIDOE held nearly 200 meetings with stakeholders specifically about ESSA in preparing the plan and made thirteen formal presentations in public BOE meetings on a variety of ESSA topics.

Therefore, the Hawai‘i Consolidated State Plan has been informed by thousands of educators and residents and is aligned to the Governor’s Blueprint’s vision and aspirations as well as the Strategic Plan’s objectives and action plans to achieve equity and excellence for our students and state.

Next Steps
With ESSA, HIDOE intends to take full advantage of the flexibility and opportunities to concentrate on the whole child while maintaining the emphasis on closing the academic achievement gap. Most importantly, the components of Hawai‘i’s consolidated state plan for ESSA are well-aligned with the updated HIDOE/BOE Strategic Plan and allows for the flexibility and the innovation to take place at the schools and complex areas, which are instrumental in the implementation of the work. This shift in focus for all students enables and empowers each complex area and school to be able to construct and implement a well-balanced education plan to meet the needs of their specific learners.

Hawai‘i, with its unique island culture and diversity, has an opportunity to implement a plan that meets the needs of all learners. While the consolidated state plan calls for new initiatives to be implemented, HIDOE will also continue with initiatives previously implemented to provide consistency in our efforts:

- Focus on the whole child;
- Use of the Plan-Do-Check-Act at all levels of implementation (state, complex and school);
- Flexibility and latitude for schools and complexes to design programs and measures that meet the needs of their student population; and
- Coordinated supports for students and schools.

These initiatives will allow HIDOE to better meet the goals and objectives outlined in the HIDOE/BOE Strategic Plan.
A. Title I, Part A: Improving Basic Programs Operated by Local Educational Agencies (LEAs)

1. **Challenging State Academic Standards and Assessments (ESEA section 1111(b)(1) and (2) and 34 CFR §§ 200.1−200.8).**

   Hawai‘i currently administers the Smarter Balanced Assessment, an English language arts and mathematics assessment. However, for students enrolled in Ka Papahana Kaiapuni, the Hawaiian language immersion program, Hawai‘i administers the Kaiapuni Assessment for Educational Outcomes, a standards-based assessment in the Hawaiian language. The State of Hawai‘i and the BOE recognizes the Hawaiian language as an official language of the state in addition to English (Article XV, Hawai‘i State Constitution). The State constitution, in Article X, provides for a Hawaiian education program consisting of language, culture and history in the public schools. Hawai‘i state law ([Hawai‘i Revised Statute 302H-1](https://legislative.state.hi.us/lsv.html#302H-1)) provides for the establishment of a Hawaiian language medium education program in the state where students are instructed in the Hawaiian language.

   The Kaiapuni Assessment of Educational Outcomes (KAEO) is a series of assessments of state academic content and performance standards that were developed and are administered in the Hawaiian language. KAEO assesses students’ academic progress in the language of instruction for students who are enrolled in Ka Papahana Kaiapuni. The decision to create an assessment written in the Hawaiian language was made to provide students in Ka Papahana Kaiapuni with an assessment based on the culture and language in which their learning occurs. HIDOE’s Office of Hawaiian Education, teachers from the Ka Papahana Kaiapuni schools, the University of Hawai‘i’s College of Education, and community partners participated in the development of the assessment from item writing and review to scoring and alignment studies.

   KAEO for Hawaiian language arts and mathematics is currently administered to grades 3 and 4 students enrolled in Ka Papahana Kaiapuni. The KAEO science assessment will be administered to grade 4 students enrolled in Ka Papahana Kaiapuni. Hawai‘i plans to expand the administration of the KAEO to grades 5 through 8 in Spring 2019 with a field test in Spring 2018. Hawai‘i will not produce individual student interpretive, descriptive, and diagnostic reports regarding achievement for students who participate in the KAEO field test due to the lack of sufficient data from the field test on which to provide a report that includes actionable information about a student’s performance. KAEO will be submitted for peer review.

   Hawai‘i will continue to monitor its assessment program to ensure it is effectively measuring student achievement and school and system performance and will evaluate the Innovative Assessment Demonstration Authority opportunity when the US Department of Education issues the application.

---

3 The Secretary anticipates collecting relevant information consistent with the assessment peer review process in 34 CFR § 200.2(d). An SEA need not submit any information regarding challenging State academic standards and assessments at this time.
2. **Eighth Grade Math Exception** (*ESEA section 1111(b)(2)(C) and 34 CFR § 200.5(b)(4)*):
   i. Does the State administer an end-of-course mathematics assessment to meet the requirements under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA?
      - ☐ Yes
      - ☑ No
   
   ii. If a State responds “yes” to question 2(i), does the State wish to exempt an eighth-grade student who takes the high school mathematics course associated with the end-of-course assessment from the mathematics assessment typically administered in eighth grade under section 1111(b)(2)(B)(v)(I)(aa) of the ESEA and ensure that:
      a. The student instead takes the end-of-course mathematics assessment the State administers to high school students under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA;
      b. The student’s performance on the high school assessment is used in the year in which the student takes the assessment for purposes of measuring academic achievement under section 1111(c)(4)(B)(i) of the ESEA and participation in assessments under section 1111(c)(4)(E) of the ESEA;
      c. In high school:
         1. The student takes a State-administered end-of-course assessment or nationally recognized high school academic assessment as defined in 34 CFR § 200.3(d) in mathematics that is more advanced than the assessment the State administers under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA;
         2. The State provides for appropriate accommodations consistent with 34 CFR § 200.6(b) and (f); and
         3. The student’s performance on the more advanced mathematics assessment is used for purposes of measuring academic achievement under section 1111(c)(4)(B)(i) of the ESEA and participation in assessments under section 1111(c)(4)(E) of the ESEA.
      - ☐ Yes
      - ☐ No
   
   iii. If a State responds “yes” to question 2(ii), consistent with 34 CFR § 200.5(b)(4), describe, with regard to this exception, its strategies to provide all students in the State the opportunity to be prepared for and to take advanced mathematics coursework in middle school.

3. **Native Language Assessments** (*ESEA section 1111(b)(2)(F) and 34 CFR § 200.6(f)(2)(ii) and (f)(4)*):
   i. Provide its definition for “languages other than English that are present to a significant extent in the participating student population,” and identify the specific languages that meet that definition.

Hawai‘i defines a language other than English that are present to a significant extent in the participating student population as a primary language used by a student group that exceeds 5 percent of the student population in the state. Currently, no language other than English is used as a primary language by more than 5 percent of the student population. English is the most populous primary
language used by students (89.5%) followed by Ilokano (2.2%), Tagalog (1.4%),
and Chuukese (1.1%).

To determine the languages other than English that are present in the participating
student population, HIDOE considers the data collected through the home language
survey that is completed upon registration into a school, English Language Learner
program data inputted in the electronic Comprehensive Student Support System,
and observational data from resource teachers at the school and complex area
levels.

ii. Identify any existing assessments in languages other than English, and
specify for which grades and content areas those assessments are available.

Hawai‘i currently does not have any existing assessments in languages other
than English and Hawaiian.

iii. Indicate the languages identified in question 3(i) for which yearly student
academic assessments are not available and are needed.

Hawai‘i currently does not identify any language other than English and
Hawaiian that is present to a significant extent in the participating student
population for which yearly student academic assessments need to be
administered. Hawai‘i will monitor the languages present in the student
population annually to determine if academic assessments are needed in any
language other than English.

iv. Describe how it will make every effort to develop assessments, at a
minimum, in languages other than English that are present to a significant
extent in the participating student population including by providing
a. The State’s plan and timeline for developing such assessments, including
   a description of how it met the requirements of 34 CFR § 200.6(f)(4);
b. A description of the process the State used to gather meaningful input on
   the need for assessments in languages other than English, collect and
   respond to public comment, and consult with educators; parents and
   families of English learners; students, as appropriate; and other
   stakeholders; and
   c. As applicable, an explanation of the reasons the State has not been able
   to complete the development of such assessments despite making every
   effort.

Hawai‘i has not identified the need to develop assessments in languages
other than English and Hawaiian based on the definition of “significant
extent” provided previously. Hawai‘i has not received a substantial number
of requests via survey responses or community meetings for an assessment in
a language other than English and Hawaiian. In a meeting with the state’s
English learner advocates, participants voiced a desire to have the state focus on supporting students in attaining English language proficiency rather than spending time and effort on translating the statewide assessment due to the small percentage of English learners for each language present.

Hawaii’s would like to note that the Smarter Balanced Assessment for Mathematics (grades 3-8 and 11) offers a supplemental glossary-based feature translating content-irrelevant terms in eleven languages: Arabic, Cantonese, Filipino, Korean, Mandarin, Punjabi, Russian, Spanish, Ukrainian, Vietnamese, and Yupik. As a participating member of the Smarter Balanced Consortium, Hawaii’s continues to provide students with the language options that are supported by the consortium.

4. **Statewide Accountability System and School Support and Improvement Activities (ESEA section 1111(c) and (d))**:

The Strive HI Performance System Hawaii’s (Strive HI) measures schools’ progress towards ensuring all students are demonstrating they are on a path toward success in college, career, and citizenship [HIDOE/BOE Strategic Plan Goal 1]. Hawaii’s implemented Strive HI, which applies to both HIDOE and public charter schools, as our school accountability system in SY 2012-13 as part of Hawaii’s ESEA Flexibility Waiver.

With the advent of ESSA, Hawaii’s Strive HI school accountability will focus on providing information about each school’s progress on the Strategic Plan Student Success Indicators and ESSA-required indicators. The Strive HI School Report will be more a comprehensive report on school performance. These annual public reports will provide information on schools’ progress on Strategic Plan indicators and federally-required indicators based on common statewide measures as well as school- or complex-selected measures to provide a more comprehensive picture of each school. Strategic Plan Student Success Indicators include chronic absenteeism rate; school climate; inclusion rate; third-grade literacy; ninth-grade on-track; academic achievement in language arts, mathematic, and science; achievement gap in language arts and mathematics; high school graduation; career and technical education concentrator; and college-going rate. New Strive HI reports will organize reporting of the indicators by the four Goal 1 Student Success objectives of the HIDOE/BOE Strategic Plan:

Objective 1. Empowered: All students are empowered by their learning to set and achieve their aspirations for the future.

Objective 2. Whole Child: All students are safe, healthy and supported in school so they can engage fully in high quality educational opportunities.

Objective 3: Well-Rounded: All students are offered and engage in a rigorous, well-rounded education so that students are prepared to be successful in their post-high school goals.
Objective 4. Prepared and Resilient: All students transition successfully throughout their educational experiences.

As reiterated in the Governor’s Blueprint, “A core goal of ESSA is to enable parents and other stakeholders to engage meaningfully with their education systems” (p.24). The Strive HI reports will provide information for stakeholders to empower them to make data-driven decisions and “participate more effectively in developing solutions for challenges facing the schools and students in their communities” (Blueprint, p. 24).

As recommended to the BOE, Hawai’i proposes that ESSA statewide accountability requirements be targeted in their use. ESSA statewide accountability, based only on the federally-required indicators, will be used to identify schools with the most struggling students for comprehensive support and improvement and schools with the most struggling student subgroups for targeted support and improvement.

For ESSA statewide accountability, Hawai’i will include academic achievement as measured by language arts and mathematics proficiency, academic progress as measured by median Student Growth Percentile, graduation rate, progress in achieving English language proficiency, and school quality/student success as measured by chronic absenteeism rates. This will allow HIDOE to focus on identifying the needs of our students, especially our struggling subgroups, so that we may better provide the supports and resources needed to improve student success and ensure continuous school improvement. Table A.1 shows the measures Hawai’i will include in the Strive HI Performance System and as part of the ESSA statewide accountability.

Hawai‘i decided on this approach through an in-depth development process with our stakeholders. An Accountability Design Workgroup was formed to address the issues surrounding school accountability and school improvement efforts. This workgroup consisted of representatives from the various HIDOE offices – the Office of the Deputy Superintendent; the Office of Curriculum, Instruction and Student Support; the Office of Strategy, Innovation, and Performance; the Office of Human Resources; the School Transformation Branch; the Monitoring and Compliance Office (formerly the Special Projects Office); the Civil Rights Compliance Office; and the Charter School Commission – and external groups – Hawai‘i P-20; Kamehameha Schools, an educational trust; Hui for Excellence in Education (HE‘E), a statewide coalition of diverse stakeholders (including parents and community members) committed to working collaboratively to identify opportunities to improve public education in Hawai‘i; and McREL. The Accountability Design Workgroup deliberated on the components of the school accountability system over a span of six meetings to help construct a proposed accountability framework.

HIDOE also convened a workgroup of school administrators and public interest groups. In addition to convening workgroups, HIDOE also sought feedback from school principals through principal feedback sessions and principal meetings, from teachers through the Teacher Leader Work Group workshops, and from community organizations through a community outreach meeting.

i. **Subgroups (ESEA section 1111(c)(2))**:  
a. List each major racial and ethnic group the State includes as a subgroup of students, consistent with ESEA section 1111(c)(2)(B).

Hawai‘i has identified the following major racial and ethnic groups to include as subgroups of students in its statewide accountability system:

- Native Hawaiian (26.0% of the student population);
- Filipino (22.1%);
- White (17.0%);

</table>
• Asian, not including Filipino (15.5%);
• Pacific Islander (9.4%);
• Hispanic (3.6%); and
• Black (2.8%).

To ensure we address the needs of our multicultural student body, Hawai‘i has added Native Hawaiian, Filipino, and Pacific Islander as subgroups of students to include in our statewide accountability system. In Hawai‘i, Native Hawaiian and Filipino are the two most prevalent ethnicities of our students. We are also including Pacific Islander as a subgroup because this subgroup of students struggle the most on the academic indicators amongst our racial and ethnic groups of students. We want to ensure that our school accountability system is appropriate for our student population.

b. If applicable, describe any additional subgroups of students other than the statutorily required subgroups (i.e., economically disadvantaged students, students from major racial and ethnic groups, children with disabilities, and English learners) used in the Statewide accountability system.

Hawai‘i will not be including any subgroup of students in addition to the statutorily-required subgroups.

c. Does the State intend to include in the English learner subgroup the results of students previously identified as English learners on the State assessments required under ESEA section 1111(b)(2)(B)(v)(I) for purposes of State accountability (ESEA section 1111(b)(3)(B))? Note that a student’s results may be included in the English learner subgroup for not more than four years after the student ceases to be identified as an English learner.

☑ Yes
☐ No

The objective of the language instruction education program is to develop the English language skills necessary for English learners to meaningfully access and succeed in school without program support and exit the program. For the academic achievement and academic progress of the English learner subgroup, Hawai‘i will include students who have exited from the English Language Learner (ELL) program for up to two years for accountability and reporting purposes.

This time frame is consistent with our programmatic approach to monitoring our students who have exited from the ELL program for two years. This will allow HIDOE to monitor the effectiveness of our
language instruction education program, ensuring that students who have exited the program acquired the skills necessary to succeed in the classroom and beyond. Hawai‘i recognizes that appropriate transition support must be provided in the first two years of exit in particular. Including former English learners in the subgroup will also allow schools to be recognized for the progress they have made in supporting English learners toward meeting the state academic standards over a period of time.

d. If applicable, choose one of the following options for recently arrived English learners in the State:

☑ Applying the exception under ESEA section 1111(b)(3)(A)(i); or
☐ Applying the exception under ESEA section 1111(b)(3)(A)(ii); or
☐ Applying the exception under ESEA section 1111(b)(3)(A)(i) or under ESEA section 1111(b)(3)(A)(ii). If this option is selected, describe how the State will choose which exception applies to a recently arrived English learner.

Hawai‘i will not administer the Smarter Balanced English Language Arts/Literacy Assessment to recently arrived English learners if the English learner participates in the administration of the English language proficiency assessment WIDA ACCESS 2.0.

ii. Minimum N-Size (ESEA section 1111(c)(3)(A)):

a. Provide the minimum number of students that the State determines are necessary to be included to carry out the requirements of any provisions under Title I, Part A of the ESEA that require disaggregation of information by each subgroup of students for accountability purposes.

Hawai‘i has selected a minimum number of 20 students as necessary to meet the requirements under Title I, Part A of ESEA that require disaggregation of information by each subgroup of students for accountability purposes, including annual meaningful differentiation and identification of schools. This number is the same for all students and for each subgroup of students in the state for accountability purposes.

b. Describe how the minimum number of students is statistically sound.

Hawai‘i is keenly aware of the necessity for and challenges in balancing both validity of the accountability model through the inclusion of as many schools as possible and maintaining an acceptable level of reliability on individual measures. Excessively large margins of error will increase the likelihood of ‘false positives’ within the identification of schools with the most struggling students. Erroneously identifying
schools for comprehensive support and improvement not only misallocates limited supports and funding to such schools, but unwittingly deprives resources from schools where such needs truly exist. While the reliability of annual results is important, Hawai‘i believes it is equally, if not more, important to ensure results represent a valid picture of each schools’ population. Large n-sizes effectively increase the number of subgroups excluded in a school’s accountability results. Such exclusions can ‘mask’ a school’s true performance given all of its students and their diverse needs. To the extent that sampling error is applicable to selected measures, a minimum n-size of 20 – or minimum number of 20 students – produces a maximum margin of error of ±11 percent at 1 standard error. Hawai‘i believes this level of reliability, balanced with fewer students excluded from its accountability results, ensures that schools with the most struggling students are accurately identified and appropriately supported. Table A.2 indicates the number and percentage of HIDOE and public charter schools that may be excluded based on the minimum number of students.

Note: Based on SY 2016-17 official enrollment count

c. Describe how the minimum number of students was determined by the State, including how the State collaborated with teachers, principals, other school leaders, parents, and other stakeholders when determining such minimum number.

Hawai‘i considered the feedback received from the Accountability Design Workgroup, the workgroup of school administrators and public interest group representatives, principals, teachers, and community
members in determining the minimum number of students to include in the school accountability system. HIDOE determined that 20 would be the most appropriate minimum number of students to ensure the inclusion of the maximum number of schools and subgroups without compromising the reliability and validity of the school accountability results. Stakeholders agreed that 30 was too large of a minimum number and 10 was too small. The agreed-upon compromise was 20.

d. Describe how the State ensures that the minimum number is sufficient to not reveal any personally identifiable information.4

Hawai‘i will not publicly report data resulting in 0 percent, 100 percent if it reveals negative information about students, and a count fewer than 20 students.

e. If the State’s minimum number of students for purposes of reporting is lower than the minimum number of students for accountability purposes, provide the State’s minimum number of students for purposes of reporting.

Hawai‘i will use the minimum number of 20 students for both the purposes of accountability and reporting to maintain student privacy.

iii. Establishment of Long-Term Goals (ESEA section 1111(c)(4)(A)):

a. Academic Achievement. (ESEA section 1111(c)(4)(A)(i)(I)(aa))

1. Describe the long-term goals for improved academic achievement, as measured by proficiency on the annual statewide reading/language arts and mathematics assessments, for all students and for each subgroup of students, including: (i) baseline data; (ii) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State; and (iii) how the long-term goals are ambitious.

ESSA requires that states set long-term goals and measurements of interim progress for all students and for all student subgroups. Goals must be set for achievement as measured by the annual statewide assessment of academic standards, graduation rates, and English language proficiency for students who are English

4 Consistent with ESEA section1111(i), information collected or disseminated under ESEA section 1111 shall be collected and disseminated in a manner that protects the privacy of individuals consistent with section 444 of the General Education Provisions Act (20 U.S.C. 1232g, commonly known as the “Family Educational Rights and Privacy Act of 1974”). When selecting a minimum n-size for reporting, States should consult the Institute for Education Sciences report “Best Practices for Determining Subgroup Size in Accountability Systems While Protecting Personally Identifiable Student Information” to identify appropriate statistical disclosure limitation strategies for protecting student privacy.
learners. Hawai‘i’s goals operationalize the Governor’s vision stated in his Blueprint for Public Education for “accountability and evaluation processes (that) provide clear, coherent and inspiring expectations and visionary goals.”

The long-term goals are based on the Governor’s vision that “Hawai‘i will be acknowledged as having the nation’s top public education system in 2025” (*Blueprint*, p. 25). Through high expectations for all students, Hawai‘i will foster equity and excellence. Setting ambitious goals illustrates Hawai‘i’s commitment to increasing the achievement of all students and to accelerating the progress of the subgroups of students who are currently lagging behind (Table A.3.a). By meeting the proposed long-term goals for academic achievement as well as for graduation rate, Hawai‘i will not only have high-achieving students and high-performing schools, but will also have made great strides in increasing the achievement of our high-needs student subgroups to close the achievement gap. This accomplishment will serve as evidence of a high-performing public education system. The long-term goals are aligned with the state’s “55 by ‘25” goal of having 55 percent of working age adults with a two- or four-year degree by the year 2025. Increasing student achievement and the graduation rate will increase the number of students who are college-ready and who will continue their education beyond high school at a post-secondary institution.

2. Provide the measurements of interim progress toward meeting the long-term goals for academic achievement in Appendix A.

The near-term measurements of interim progress for statewide achievement and graduation rate are aligned with the HIDOE/BOE Strategic Plan’s targets for 2020 which were established to be ambitious but achievable in the plan’s three-year timeframe.

Governor’s Blueprint and Strategic Plan both aim to achieve equity and excellence for all students. Thus, the measurements of interim progress identify statewide increases in achievement (excellence), based on the HIDOE/BOE Strategic Plan Indicators. Currently, there is significant variation in student achievement among student groups of different characteristics (student subgroups) as measured by the statewide assessments. The proposed measurements of interim progress for our student subgroups are based on the Governor’s aspirational target of closing the achievement gap by 2020: “The learning achievement gaps will begin closing in 2017 and will close by 2020” (Blueprint, p. 18). Identifying the same targets for interim progress for all student groups reflects this aspirational target (Table A.3.b).

Black | 52% | 61% | 35% | 54%

* The Measurement of Interim Progress was adjusted for the subgroups with baseline rates that were equal to or exceeded the “All Students” Measurement of Interim Progress to promote progress. The adjustments were made based on the incremental progress needed to achieve the long-term goal in the given timeframe.

3. Describe how the long-term goals and measurements of interim progress toward the long-term goals for academic achievement take into account the improvement necessary to make significant progress in closing statewide proficiency gaps.

Hawai‘i expects all groups of students to meet or exceed the same ambitious long-term goals and measurements of interim progress toward the long-term goal regardless of their baseline. Hawai‘i believes all students can achieve excellence with the appropriate supports. Thus, schools will need to ensure they are aggressively addressing the needs of the lagging subgroups through interventions to accelerate their progress to meet the targets set for 2020 and 2025.

b. **Graduation Rate. (ESEA section 1111(c)(4)(A)(i)(I)(bb))**

1. Describe the long-term goals for the four-year adjusted cohort graduation rate for all students and for each subgroup of students, including: (i) baseline data; (ii) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State; and (iii) how the long-term goals are ambitious.

Hawai‘i proposes to set the long-term goal for graduation rate at 90 percent for all students and all subgroups of students (Table A.4.a). HIDOE has aligned the long-term goals for graduation rate with the high school graduation target set by the HIDOE/BOE Strategic Plan. The [HIDOE/BOE Strategic Plan](https://example.com) states, “We strive to increase our graduation rate to 90 percent by 2025” (p. 12).

Note: SY 2015-16 baseline data reflects the graduating class of 2015.

2. If applicable, describe the long-term goals for each extended-year adjusted cohort graduation rate, including (i) baseline data; (ii) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State; (iii) how the long-term goals are ambitious; and (iv) how the long-term goals are more rigorous than the long-term goal set for the four-year adjusted cohort graduation rate.

For ESSA purposes, Hawai‘i will rely on the Four-Year Adjusted Cohort Graduation Rate rather than adding an extended-year adjusted cohort graduation rate as a measure for identifying schools requiring comprehensive or targeted support and improvement. Schools may select an extended-year graduation or completer rate as a locally-selected measure for Strive HI, the state’s school accountability and performance reporting system.

3. Provide the measurements of interim progress toward the long-term goals for the four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rate in Appendix A.

The proposed measurement of interim progress for graduation rate for all students and all subgroups of students is 86 percent (Table A.4.b). HIDOE has aligned our measurements of interim progress for all student groups with the HIDOE/BOE Strategic Plan High School Graduation 2020 target of 86 percent.

</tbody>
</table>

Note: SY 2015-16 baseline data reflects the graduating class of 2015.
* The Measurement of Interim Progress was adjusted for the subgroups with baseline rates that were equal to or exceeded the “All Students” Measurement of Interim Progress.

4. Describe how the long-term goals and measurements of interim progress for the four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rate take into account the improvement necessary to make significant progress in closing statewide graduation rate gaps.

Hawai’i expects all groups of students to meet or exceed the same ambitious long-term goals and measurements of interim progress toward the long-term goal regardless of their baseline. Hawai’i believes all students can achieve excellence and graduate high school within four years with the appropriate supports. Thus, schools will need to ensure they are aggressively addressing the needs of the lagging subgroups of students through supports and interventions to increase graduation rates to meet the 90 percent target set for 2025. The measurement of interim progress ensures our schools are making progress at the rate needed to meet the long-term goal.

c. **English Language Proficiency** *(ESEA section 1111(c)(4)(A)(ii))*

   1. Describe the long-term goals for English learners for increases in the percentage of such students making progress in achieving English language proficiency, as measured by the statewide English language proficiency assessment including: (i) baseline data; (ii) the State-determined timeline for such students to achieve English language proficiency; and (iii) how the long-term goals are ambitious.
Hawai’i has been a member of the WIDA Consortium since SY 2009-10, when we adopted the WIDA English Language Development Standards. HIDOE administers the ACCESS for ELLs 2.0 (ACCESS 2.0) as an annual measure of English language progress and proficiency for students identified as English learners. The ACCESS 2.0 assesses proficiency in the four language domains: Listening, speaking, reading, and writing. The language development levels include 1-Entering, 2-Emerging, 3-Developing, 4-Expanding, 5-Bridging, and 6-Reaching. Students are deemed functionally English proficient when they achieve a composite score on the summative assessment that places them in Level 5 (Bridging). HIDOE will include all tested English learners from kindergarten through grade 12 in the English language proficiency rate as measured by ACCESS 2.0. Targets will be based on the student’s initial ACCESS 2.0 results.

Hawai’i will implement a growth-to-target methodology to measure students’ progress in achieving English language proficiency. HIDOE has been collaborating with the WIDA Consortium Research Department to determine an appropriate growth-to-target measure and to determine the long-term goal and measurements of interim progress toward the long-term goal.

Using the growth-to-target model, which is based on an English learner’s initial scale score, students will have predetermined individual growth expectations toward the proficient criteria with students at the lowest levels given the most time to grow to Level 5, the Bridging level. For example, a kindergarten student at an overall English learner proficiency level of 1 on the initial baseline test will have five years to attain Level 5, meeting the exit criteria by the end of grade 4. Annually, there is an incremental growth expectation, generally one proficiency level per year, towards meeting proficiency using the initial score and targeted exit scale score (Overall 5.0 proficiency level). The student’s goal remains the same throughout the student’s participation in the English Language Learner program.

The SY 2015-16 data were used as the baseline to establish the long-term goal (Table A.5.a). The percentage of English learners who maintained their growth-to-target trajectory, thus showing progress towards achieving English language proficiency, was 60 percent. Hawai’i’s long-term goal is to increase the percentage of students making progress towards achieving English language proficiency to 90 percent by SY 2024-25. Given the wide range of
schools’ abilities to meet the growth-to-target expectations of their English learners based on baseline data, both realistic and yet ambitious goals were set as targets. There are schools where 100 percent of students meet their growth targets, while other schools have students who struggle to do so. To accomplish our long-term goal, schools will need to ensure English learners who are on-track to achieving English language proficiency continue to progress as well as ensure new and lower-achieving English learners are progressing at greater rates by providing appropriate supports and services.

Table A.5.a. Percentage of students making progress towards achieving English language proficiency

<table>
<thead>

<th>Long-term goal SY 2024-25</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>60%</td>
<td>90%</td>
</tr>
</tbody>
</table>

Currently, all English learners are expected to meet the same long-term goal in the same timeframe. While Hawai’i recognizes the increased academic language breadth and additional challenges English learners face when they are in secondary school and while allowing secondary students more time to attain English language proficiency may be reasonable, HIDOE has decided to apply the ambitious goals to all English learners with the understanding that English learners at the secondary school level will need additional support and intervention to attain English language proficiency and graduate from high school on time. Secondary schools must accelerate their efforts to improve outcomes and graduation rates of this subgroup of learners. Adding any additional characteristics at this time would merely lower the expectations for secondary schools and their English learners.

2. Provide the measurements of interim progress toward the long-term goal for increases in the percentage of English learners making progress in achieving English language proficiency in Appendix A.

Measurements of interim progress toward the long-term goal for increases in the percentage of English learners making progress in achieving English language proficiency are based on the initial baseline and the incremental increases needed to meet the long-term goal of 90 percent. The measure of interim progress for SY
2019-20 for the state is 73.3 percent of all English learners meeting their growth targets, which would signify a systemic improvement of addressing the needs of our English learners from the baseline of 60 percent (Table A.5.b). Each school will have its own measurement of interim progress based on the school’s initial baseline towards meeting the long-term goal of 90 percent to ensure all schools are on-track to helping the state meet the state long-term goal.

a. Academic Achievement Indicator. Describe the Academic Achievement indicator, including a description of how the indicator (i) is based on the long-term goals; (ii) is measured by proficiency on the annual Statewide reading/language arts and mathematics assessments; (iii) annually measures academic achievement for all students and separately for each subgroup of students; and (iv) at the State’s discretion, for each public high school in the State, includes a measure of student growth, as

http://www.hawaiipublicschools.org/VisionForSuccess/AdvancingEducation/StriveHIPerformanceSystem/Pages/Strive-FAQs.aspx#indicatorsgrad
measured by the annual Statewide reading/language arts and mathematics assessments.

The Academic Achievement indicator is based on the annual Hawai‘i Statewide Assessment Program achievement results for language arts/literacy and mathematics and will provide data to measure progress towards the long-term goals and measurements of interim progress for all student groups. The achievement results for language arts/literacy and mathematics will be weighted equally in the determination of schools needing comprehensive or targeted support and improvement.

Beginning School Year 2014-15, all students are required to take one of the following assessments in language arts/literacy and mathematics: The Smarter Balanced Assessment (SBA); the Hawai‘i State Alternate Assessment (HSA-Alt) for students with significant cognitive disabilities; or the Kaiapuni Assessment on Educational Outcomes (KAEO), the Hawaiian language state assessment. While a substantial majority of students will take the SBA, students with disabilities who take the HSA-Alt and students enrolled in Ka Papahana Kaiapuni, the Hawaiian language immersion program, who take the KAEO are fully included in the state’s student achievement metrics. Assessments in language arts and mathematics are offered in grades 3-8 and 11.

The KAEO is currently administered to third and fourth graders enrolled in Ka Papahana Kaiapuni. HIDOE will be expanding the administration of the KAEO to grades 5 through 8 with the field test in Spring 2018 and the operational test in Spring 2019. Students in Ka Papahana Kaiapuni will take the KAEO in place of the SBA to ensure students who are instructed in the Hawaiian language are assessed in the language in which they receive instruction and to better align what is taught in Ka Papahana Kaiapuni with what is assessed. The students who participate in the KAEO field test in Spring 2018, potentially 775 students across the 23 Ka Papahana Kaiapuni schools, will not be included in the student achievement metrics for their school due to the nature of the field test. These students, however, will be included in the participation rate for their school and these schools will have results for the Academic Achievement indicator based on the performance of their grades 3 and 4 students on the KAEO and the students who take the SBA. When the KAEO is operational in Spring 2019, all students who participate in the KAEO assessment will be included in the student achievement metrics. All students in grades 3-8 and 11 enrolled in Ka Papahana Kaiapuni will participate in either the KAEO or the SBA administration.

Students who were enrolled in the school for the full school year – from the Official Enrollment Count date at the beginning of the school year to the Participation Rate Count date (May 1 of each school year) – and were
in a tested grade level will be included for the school’s Academic Achievement indicator. Data will be disaggregated by all subgroups meeting the minimum number of 20 students.

Because Language Arts and Mathematic skills span all content areas, the Academic Achievement measures will provide the data necessary to ensure all students are engaged in a rigorous, well-rounded education that prepares students to be successful in their post-high school goals [HIDOE/BOE Strategic Plan, Goal 1, Objective 3].

b. Indicator for Public Elementary and Secondary Schools that are Not High Schools (Other Academic Indicator). Describe the Other Academic indicator, including how it annually measures the performance for all students and separately for each subgroup of students. If the Other Academic indicator is not a measure of student growth, the description must include a demonstration that the indicator is a valid and reliable statewide academic indicator that allows for meaningful differentiation in school performance.

The Other Academic, or Academic Progress, indicator in the proposed statewide accountability system is student growth as measured by the annual statewide assessments. Growth is based on the school’s median growth percentile in language arts/literacy and mathematics, the calculation of which is derived from the Hawai‘i Growth Model. The median growth percentile will be calculated for elementary and middle schools only and continues a measure from under ESEA Flexibility Waiver. The small subset of students with significant cognitive disabilities who take the HSA-Alt and Kaiapuni students who take the KAEO are not included in the growth model calculation as the score scales are not comparable.

Students who were enrolled in the school for the full school year and were in a tested grade level will be included for the school’s Academic Progress indicator. Data will be disaggregated by all subgroups meeting the minimum number of 20 students.

c. Graduation Rate. Describe the Graduation Rate indicator, including a description of (i) how the indicator is based on the long-term goals; (ii) how the indicator annually measures graduation rate for all students and separately for each subgroup of students; (iii) how the indicator is based on the four-year adjusted cohort graduation rate; (iv) if the State, at its discretion, also includes one or more extended-year adjusted cohort graduation rates, how the four-year adjusted cohort graduation rate is combined with that rate or rates within the indicator; and (v) if applicable, how the State includes in its four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rates
students with the most significant cognitive disabilities assessed using an alternate assessment aligned to alternate academic achievement standards under ESEA section 1111(b)(2)(D) and awarded a State-defined alternate diploma under ESEA section 8101(23) and (25).

Hawai‘i will continue to include the four-year adjusted cohort graduation rate as a high school indicator in the proposed statewide accountability system, which will provide data to measure progress towards the long-term goals and measurements of interim progress for all student groups. High schools with a graduation rate of 67 percent or lower will be designated as schools for comprehensive support and improvement. The graduation rate will be lagged by one year. Thus, for the Fall 2017 identification of schools for comprehensive and targeted support and improvement, the Class of 2016 cohort will be used for the graduation rate indicator.

Data will be disaggregated by all subgroups meeting the minimum number of 20 students. Hawai‘i proposes to include students who were economically disadvantaged, were in the English learner program, or received Special Education services at any time during the four-year cohort in their respective high-needs subgroup for graduation rate determination. Only students who receive a Hawai‘i High School Diploma will be included in the graduation rate. Students with the most significant cognitive disabilities who receive a certificate and students who enroll in an alternative education program and receive a Hawai‘i Adult Community School Diploma will be included as part of the graduation cohort but will not be counted as a graduate.

The Graduation Rate measure will serve as an indicator of how successfully students transition throughout their educational experiences within HIDOE [HIDOE/BOE Strategic Plan, Goal 1, Objective 4].

d. Progress in Achieving English Language Proficiency (ELP) Indicator. Describe the Progress in Achieving ELP indicator, including the State’s definition of ELP, as measured by the State ELP assessment.

To support our students’ English Language Proficiency with standards and assessments, Hawai‘i participates in the WIDA consortium, which consists of 39 state education agencies and more than 200 international schools. In determining the appropriate measure for the Progress in Achieving English Language Proficiency indicator, HIDOE consulted with the WIDA Consortium Research Department. To measure English learners’ progress in achieving English language proficiency, HIDOE is proposing to use a “growth-to-target” model. The growth-to-target model will identify the percentage of English learners who are on target
to acquire the skills necessary to access school and exit the language instruction education program within an appropriate timeframe.

The growth-to-target model considers three factors of student performance on the English language proficiency assessment – (1) the student’s initial proficiency level, (2) the timeframe, in annual increments, a state educational agency determines adequate to attain English language proficiency, and (3) the English language proficient level where English learners could be considered no longer needing specific language instruction education program services. Hawai’i proposes to use a timeframe of up to five years for students to achieve English language proficiency, dependent on the level in which the student enters the language instruction education program. The model assumes that English learners generally advance one proficiency level a year as determined by the English language assessment composite scale score. Thus, an English learner who enters school at a proficiency level of 1.0, as determined by the student’s initial composite scale score on the English language proficiency assessment, will be expected to exit the language instruction education program after five years of program support, or after Year 5. An English learner who scores at a proficiency level of 3.0 will be expected to exit the language instruction education program after two years of program support, or Year 2. An English learner who reaches a proficiency level of 5.0 will exit the language instruction education program. The growth-to-target method provides a growth trajectory for each individual English learner by which the English learner’s progress will be measured on. This will allow schools to better track their students’ progress and identify which students need more supports.

Hawai’i proposes to use the percentage of students who are on target to achieve English language proficiency within their given timeframe and meeting growth expectations in the statewide accountability system as the measure for the progress in achieving English language proficiency indicator. HIDOE will include all students assessed for English language proficiency from Kindergarten through Grade 12 in this measure to ensure all English learners are supported in school so that they can fully engage in high-quality educational opportunities and are transitioning successfully throughout their educational experiences [HIDOE/BOE Strategic Plan, Goal 1, Objectives 2 & 4].

e. School Quality or Student Success Indicator(s). Describe each School Quality or Student Success Indicator, including, for each such indicator: (i) how it allows for meaningful differentiation in school performance; (ii) that it is valid, reliable, comparable, and statewide (for the grade span(s) to which it applies); and (iii) of how each such indicator annually
measures performance for all students and separately for each subgroup of students. For any School Quality or Student Success indicator that does not apply to all grade spans, the description must include the grade spans to which it does apply.

Hawai‘i proposes a measure of attendance – chronic absenteeism rate, which is defined as 15 or more days absent – as its state-selected measure of “school quality or student success.” This continues a measure introduced by Strive HI under the ESEA Flexibility Waiver for elementary schools and expands the measure to apply to all schools in all grade spans based on the HIDOE/BOE Strategic Plan and the BOE’s aggressive goals to reduce chronic absenteeism by 2020. School attendance is critically important to student success and the chronic absenteeism rate is widely viewed as an indicator of whether a school has struggling students.

Attendance is noted in the HIDOE/BOE Strategic Plan as a contributing factor in ensuring all students are safe, healthy, and supported in school so that they can fully engage in high-quality educational opportunities [Goal 1, Objective 2]. While our average daily attendance rates for schools may suggest our students are attending school regularly, our chronic absenteeism rate indicates that a substantial number of students are not fully engaged in their educational opportunities. Research shows chronic absenteeism to be an early warning sign of future underperformance. Achievement, especially in mathematics, is sensitive to absenteeism. Absenteeism also strongly affects assessment scores and graduation and dropout rates. Schools with large numbers of chronically absent students struggle to deliver consistent instruction.

Hawai‘i identifies a student as chronically absent if the student has been absent – excused and unexcused – for 15 or more instructional days during the school year. A school’s chronic absenteeism rate is the percentage of students who are chronically absent. Figure A.1 illustrates the distribution of chronic absenteeism rates across all HIDOE and public charter schools in the state for SY 2015-16. The chronic absenteeism rate ranges from 2 percent to 54 percent across the state, with most schools having rates below 20 percent. This still allows for differentiation between schools.

The average chronic absenteeism rate across the state is 15 percent. HIDOE has targeted a decrease of 6 points over the next three years to achieve an average chronic absenteeism rate of 9 percent by the year 2020 (HIDOE/BOE Strategic Plan). Based on the data for SY 2015-16, only 49 of our 290 schools have a chronic absenteeism rate of 9 percent or lower.

HIDOE has included the percentage of students who are chronically absent in the statewide accountability system for elementary schools since the implementation of Strive HI in SY 2012-13 and has seen a decrease in chronic absenteeism rates from 18 percent in SY 2012-13 to 11 percent in SY 2014-15. Hawai‘i began including kindergarten in the elementary school chronic absenteeism rate in SY 2015-16, which may have attributed to the increase in the chronic absenteeism rate for that school year. Kindergarten was not included prior to SY 2015-16 because kindergarten was not mandatory until SY 2014-15.

Hawai‘i has included the percentage of students who are chronically absent for middle and high school beginning in SY 2015-16 with the hope that bringing attention to and monitoring student attendance will lead to stronger efforts to address absenteeism and decrease chronic absenteeism rates across the state as it did with the elementary schools.

Students who are enrolled in the school for the full school year will be included for the school’s “School Quality or Student Success” indicator. Data will be disaggregated by all subgroups meeting the minimum number of 20 students.
v. Annual Meaningful Differentiation (ESEA section 1111(c)(4)(C))

a. Describe the State’s system of annual meaningful differentiation of all public schools in the State, consistent with the requirements of section 1111(c)(4)(C) of the ESEA, including a description of (i) how the system is based on all indicators in the State’s accountability system, (ii) for all students and for each subgroup of students. Note that each state must comply with the requirements in 1111(c)(5) of the ESEA with respect to accountability for charter schools.

For ESSA purposes of identifying schools for support and improvement, Hawai’i proposes to calculate a school performance unit score. The HIDOE Accountability Section will produce ESSA-required unit scores for all public schools. The school performance measures will generate a composite score which will be used to identify schools for comprehensive support and improvement.

The HIDOE Accountability Section will also produce subgroup performance unit scores for each subgroup within a school that meets the minimum number of 20 students. The subgroup performance unit score will identify the subgroups that need targeted support and improvement. The subgroup performance data will enable the state, complex areas, and schools to identify what the subgroup needs are to determine how best to close the achievement gaps.

When identifying schools for comprehensive support and improvement, should the number of students for a measure be less than the minimum number of 20 students, Hawai’i proposes the use of multi-year pooling for up to three years to represent students’ results at the school. In these situations, Hawai’i will seek to pool data for two years, although a third year may be necessary for HIDOE’s smallest schools. If, after three years of data (current and prior two years), a minimum number of 20 students cannot be reached, the results will then be used to calculate the school performance unit score. Hawai’i believes this approach accounts for every full-school-year student across the state.

Reporting the measures, indicators, and associated weights of school and subgroup performance ensures transparency and credibility as well as the capability to utilize the multiple data components comprising the unit score for targeted analysis and interventions. The component measures of the school performance unit score are included within the state’s Strive HI system and reported along with performance on the HIDOE/BOE Strategic Plan Statewide Student Success Indicators (Appendix B) as well as school- and complex-selected measures to support and monitor school and complex initiatives.

The school and subgroup performance unit scores will identify schools that require comprehensive supports and improvement and targeted
supports and improvement as well as identify schools that do not require additional Title I supports consistent with the requirements of ESSA.

Each school’s school performance unit score and each subgroup’s subgroup performance unit score will be comprised of scores from four of the five school accountability system indicators: Academic Achievement, Academic Progress (for elementary and middle schools), Graduation Rate (for high schools), Progress in Achieving English Language Proficiency, and School Quality/Student Success. The measures of each indicator are the data sources for the unit. Thus, the score of each indicator will be determined by the results for each measure. The subgroup performance unit score would be calculated in the same manner using the subgroup performance data. Tables A.7 and A.8 are examples of how the school performance unit score would be calculated for elementary and middle schools and for high schools.

* Stakeholders provided significant feedback which informed selection of the proposed state-selected measures and weights.

Hawai‘i proposes to identify schools for comprehensive support and
improvement and targeted support and improvement. Schools not needing comprehensive or targeted support and improvement will be identified as not needing additional support. Hawai‘i proposes to identify schools for support by school type – elementary, middle, and high schools. Thus, elementary, middle and high schools will be identified as schools for comprehensive support and improvement based on the proportion each school type represents for all schools statewide. This approach allows for more easily understood school comparisons, an increased sense of fairness, and an assurance that schools at all levels are appropriately identified for support. The minimum required percentage of Title I schools identified for comprehensive support and improvement will be maintained at no less than 5 percent. This will be in addition to the schools identified for comprehensive support and improvement due to a graduation rate of 67 percent or lower. All schools with low-performing or consistently underperforming subgroups will be identified for targeted support and improvement.

b. Describe the weighting of each indicator in the State’s system of annual meaningful differentiation, including how the Academic Achievement, Other Academic, Graduation Rate, and Progress in ELP indicators each receive substantial weight individually and, in the aggregate, much greater weight than the School Quality or Student Success indicator(s), in the aggregate.

Table A.9 indicates Hawai‘i’s proposed weights for the indicators that will be used to calculate the school and subgroup performance unit scores.

**Table A.9. Proposed weights for the ESSA indicators**

Hawai‘i’s proposed ESSA-based statewide accountability system focuses on identifying schools with the most students who are struggling in making progress toward college- and career-readiness. In the Governor’s Blueprint, reading and math proficiency as measured by the annual statewide assessments were listed as four of the seven critical challenges that must be addressed by our state public education system.
Thus, Hawai‘i proposes to weight elementary and middle school indicators more heavily towards academic achievement and academic progress as the primary purpose of these schools is to prepare students to meet content-based grade-level expectations as they build college- and career-readiness skills. High schools, on the other hand, have an increased responsibility for specifically preparing students to enter and succeed in college and the workforce. Thus, for high schools, Hawai‘i proposes to weight graduation rate the heaviest with the understanding that students who earn a high school diploma have met the rigorous standards of learning required as demonstrated by their performance on standardized assessments as well as school- and teacher-created authentic assessments (BOE Policy 102-15). Increasing the graduation rate is a priority of the HIDOE/BOE Strategic Plan and Hawai‘i’s P-20 initiative.

While many stakeholders have voiced concerns about the test-centered ESSA-based statewide accountability system and the punitive nature of similar statewide accountability systems in the past, the primary purpose of the statewide accountability system is to identify the areas where support is most needed. Thus, Hawai‘i proposes to weigh the Academic Achievement, Academic Progress, and Graduation Rate indicators heavier in the performance unit score to ensure that schools with low student performance on these indicators are identified for comprehensive or targeted support and improvement. To ensure the intent is to support our schools with struggling students rather than to punish these schools, stronger efforts will be made at the state and complex area level to provide these schools with the assistance they need.

c. If the States uses a different methodology or methodologies for annual meaningful differentiation than the one described in 4.v.a. above for schools for which an accountability determination cannot be made (e.g., P-2 schools), describe the different methodology or methodologies, indicating the type(s) of schools to which it applies.

The methodology described above will be applied to all HIDOE and public charter schools. For multi-level schools, such as schools with K-12, K-8, and 7-12 grade configurations, the schools will be divided into grade spans and each grade span will be given a school performance unit score to determine if any grade span on its own would be identified for comprehensive supports and improvement. For example, a K-12 school would be divided into three grade spans – K-5 (elementary school), 6-8 (middle school), and 9-12 (high school). A school performance unit score would be calculated for each grade span and compared against the other schools in that respective grade span to determine if the grade span on its own would be identified as the lowest-performing 5 percent of
Title I schools within that grade span. If the multi-level school is identified as one of the lowest-performing 5 percent of Title I schools in any grade span, the entire school would be identified for comprehensive supports and improvement as the school type of the lowest performing grade span. Thus, if the K-5 grade span of a multi-level school is identified as one of the lowest-performing 5 percent of Title I elementary schools, the entire school would be identified as an elementary school needing comprehensive supports and improvement.

Hawai‘i currently has one K-1 school that does not participate in annual statewide assessments for language arts and mathematics. HIDOE is exploring an alternate assessment for the academic achievement indicator for this school.

Hawai‘i currently reports first-year data for newly opened schools and includes these schools in the statewide accountability system during their second year.

vi. Identification of Schools (ESEA section 1111(c)(4)(D))

a. Comprehensive Support and Improvement Schools. Describe the State’s methodology for identifying not less than the lowest-performing 5 percent of all schools receiving Title I, Part A funds in the State for comprehensive support and improvement, including the year in which the State will first identify such schools.

Hawai‘i views schools identified for comprehensive support and improvement as schools with performance challenges that warrant the extensive support from federal and state resources to improve. The lowest-performing 5 percent of all schools receiving Title I, Part A funds will be identified as follows:

1. Identify the number of Title I schools statewide that is necessary to meet the minimum 5 percent comprehensive support and improvement school requirement.
2. Identify the proportion to which elementary, middle, and high schools comprise of all Title I schools statewide.
3. Based on the proportion that each school type comprises determined in Step 2, identify the corresponding count of Title I schools required for each school type.
4. Select the Title I schools, excluding the schools identified based on low graduation rate, with the lowest school performance unit score to equal the number of schools identified in Step 3 for each school type.
   a. Multi-level schools will be separated into grade spans and each grade span will be compared to the schools within the
respective school type for identification purposes. For example, a K-12 school would be divided into three grade spans – K-5, 6-8, and 9-12. The K-5 grade span will be compared to elementary schools, the 6-8 grade span will be compared to middle schools, and the 9-12 grade span will be compared to high schools. Should a multi-level school be identified for comprehensive support and improvement in more than one school type, the school will be identified for comprehensive support and improvement as the school type of the lowest performing grade span.

Hawai‘i proposes to identify schools for comprehensive support and improvement beginning Fall 2017 using SY 2016-17 student outcomes.

b. Comprehensive Support and Improvement Schools. Describe the State’s methodology for identifying all public high schools in the State failing to graduate one third or more of their students for comprehensive support and improvement, including the year in which the State will first identify such schools.

Hawai‘i will identify all schools with a graduation rate of 67 percent or lower for comprehensive support and improvement. The graduation rate will be calculated using the four-year adjusted cohort graduation rate methodology as required.

Hawai‘i proposes to identify schools for comprehensive support and improvement beginning Fall 2017 using the graduation data from the previous year. For Fall 2017 identification, the graduation rate of the class of 2016 will be used.

c. Comprehensive Support and Improvement Schools. Describe the methodology by which the State identifies public schools in the State receiving Title I, Part A funds that have received additional targeted support under ESEA section 1111(d)(2)(C) (based on identification as a school in which any subgroup of students, on its own, would lead to identification under ESEA section 1111(c)(4)(D)(i)(I) using the State’s methodology under ESEA section 1111(c)(4)(D)) and that have not satisfied the statewide exit criteria for such schools within a State-determined number of years, including the year in which the State will first identify such schools.

Title I schools identified for additional targeted support due to at least one low-performing subgroup of students that have not satisfied the statewide exit criteria for schools identified for additional targeted support within three years will be identified for comprehensive support and improvement. Schools identified for additional targeted support
would no longer require additional support to improve if the subgroups that led to the identification improved enough to exceed the threshold score set by the lowest-performing Title I school in their grade span in the year they were initially identified.

Table A.10 provides an example of a school identified for additional targeted support in Fall 2017 being identified for comprehensive support and improvement in Fall 2020. School A is identified for comprehensive support and improvement in Fall 2020 because its Subgroup A continues to have a subgroup performance unit score lower than the threshold set by the lowest-performing Title I school in its grade span. School B no longer needs additional support because both subgroups showed significant improvement and no longer have subgroup performance unit scores lower than the threshold score. Only Title I schools identified for additional targeted support will be identified for comprehensive support and improvement as required by ESSA.

**Table A.10. Example of escalation from additional targeted support to comprehensive support and improvement**

</table>

Title I schools that do not exit additional targeted support status will be designated for comprehensive support and improvement beginning in Fall 2020.

d. **Frequency of Identification.** Provide, for each type of school identified for comprehensive support and improvement, the frequency with which the State will, thereafter, identify such schools. Note that these schools must be identified at least once every three years.

Hawai‘i will identify schools for comprehensive support and improvement based on low performance and low graduation rate once every three years beginning in Fall 2017. Hawai‘i will also identify schools previously identified for additional targeted support for comprehensive support and improvement once every three years beginning Fall 2020.
e. **Targeted Support and Improvement.** Describe the State’s methodology for annually identifying any school with one or more “consistently underperforming” subgroups of students, based on all indicators in the statewide system of annual meaningful differentiation, including the definition used by the State to determine consistent underperformance. *(ESEA section 1111(c)(4)(C)(iii))*

Hawai‘i will identify schools for targeted support and improvement based on the performance of each school’s subgroups that have a minimum of 20 students. Hawai‘i proposes to define a “consistently underperforming” subgroup as a subgroup of students with a subgroup performance unit score that falls below the state-determined threshold for underperformance for at least two consecutive years. The state-determined threshold for underperformance will be based on the data for SY 2016-17 for this will be the first year that school and subgroup performance unit scores will be calculated using the ESSA school accountability indicators. If at least one subgroup in a school has a subgroup performance unit score lower than the state-determined threshold for underperformance in both Year 1 and Year 2, the subgroup would be considered consistently underperforming and the school would be identified for targeted support and improvement. Subgroup performance will be compared to the performance of schools in the same grade span. Thus, elementary, middle, and high schools could have different state-determined thresholds to identify underperforming subgroups.

Schools with “consistently underperforming” subgroups will be identified for targeted support and improvement based on the following criteria:

1. Determine the threshold for underperformance for each grade span for which to identify consistently underperforming subgroups.

2. **[Year 1]** Of the schools not identified for comprehensive or additional targeted support, identify the schools with at least one subgroup with a subgroup performance unit score below the state-determined threshold determine in Step 1. These schools will be notified that they may be identified for targeted support and improvement should their underperforming subgroup’s performance not exceed the state-determined threshold the following year.

3. **[Year 2]** Of the schools identified in Step 2 the previous school year, select the schools in which the previously identified underperforming subgroups continue to have a subgroup
performance unit score below the state-determined threshold
determined in Step 1. These schools will be identified for targeted
support and improvement based on at least one consistently
underperforming subgroup.

Hawai‘i proposes to identify schools for targeted support and
improvement due to consistently underperforming subgroups annually
beginning in Fall 2018. For targeted support and improvement
identification, subgroups must have a minimum of 20 students.

f. Additional Targeted Support. Describe the State’s methodology, for
identifying schools in which any subgroup of students, on its own, would
lead to identification under ESEA section 1111(c)(4)(D)(i)(I) using the
State’s methodology under ESEA section 1111(c)(4)(D), including the
year in which the State will first identify such schools and the frequency
with which the State will, thereafter, identify such schools, (ESEA
section 1111(d)(2)(C)-(D))

Hawai‘i will identify schools with at least one low-performing subgroup
of students for additional targeted support. Schools needing additional
targeted support will be identified based on the following criteria:

1. Identify the lowest school performance unit score of the schools
identified for comprehensive support and improvement due to low
performance for each school type (elementary, middle, and high
school). This will serves as the threshold for the identification of
schools for additional targeted support.

2. Of the schools not identified for comprehensive support and
improvement, select the schools with at least one subgroup with a
subgroup performance unit score that is equal to or lower than
score for their respective school type identified in Step 1.

Hawai‘i proposes to identify schools with low-performing subgroups of
students for additional targeted support beginning Fall 2017, using SY
2016-17 student outcomes, and will identify schools with low-
performing subgroups of students for additional targeted support every
three years. For additional targeted support identification, subgroups
must have a minimum of 20 students.

g. Additional Statewide Categories of Schools. If the State chooses, at its
discretion, to include additional statewide categories of schools, describe
those categories.

Hawai‘i will not be including additional statewide categories of schools.
vii. **Annual Measurement of Achievement** *(ESEA section 1111(c)(4)(E)(iii)):

Describe how the State factors the requirement for 95 percent student participation in statewide mathematics and reading/language arts assessments into the statewide accountability system.

Hawai‘i continues to require schools to have a minimum participation rate of 95 percent for the annual statewide assessments. Hawai‘i proposes to apply a non-proficient outcome to any non-participant in each student group – all students and each subgroup – not meeting the 95 percent participation requirement up to 95 percent of such group. For example, if 85 of 100 students participated in the assessments, 10 students would be added to the denominator to total 95 students, or 95 percent of the student group. Thus, the number of students who met proficiency of the 85 who participated would be divided by 95 when calculating the school’s academic achievement rate. For example, if 50 of the 85 students were proficient, the academic achievement rate for this school would be 50/95 or 52.6 percent. The addition of the 10 students to the denominator lowers the academic achievement rate.

HIDOE will require schools that do not meet the 95 percent participation requirement to create a plan for corrective action to increase student participation in statewide academic assessments.

viii. **Continued Support for School and LEA Improvement** *(ESEA section 1111(d)(3)(A))

As a unitary SEA and LEA, HIDOE is responsible for not only awarding school improvement funds and monitoring and evaluating the use of such funds, but is also responsible for facilitating school improvement activities for schools identified for comprehensive or targeted support and improvement. Increasing student achievement in schools identified for comprehensive and targeted support will be a collective effort with the school, complex area, and state working closely together to ensure the appropriate resources are provided and supports are in place to best facilitate school improvement. Table A.11 outlines some of the school improvement activities at the state, complex area, and school levels.

<table>

Complex Area

- Complex area staff and the Commission's Federal Programs team will provide differentiated support to schools and act as the liaison for school improvement between the state and the schools.
- Complex and Charter Academic Officers, complex area resource teachers, and Title I Linkers facilitate and monitor school improvement activities at the complex area level.
- Complex area staff and the Commission's Federal Programs team will monitor the progress of schools identified for comprehensive and targeted support and improvement in meeting the objectives outlined in their school improvement plans.

School

- School leadership will guide the implementation of school-wide initiatives designed to increase student achievement with the support of complex area staff or the Commission's Federal Programs team.
- School Academic Reflection Team will monitor progress and school improvement activities at the school level.
- School administrators will serve as the liaison between the school and the complex area to ensure school improvement needs are met.

The School Transformation Branch helps to facilitate a system and culture of public education work to effectively organize financial, human, and community resources in support of student success [HIDOE/BOE Strategic Plan, Goal 3]. Its focus is on a multi-tiered system of supports (Figure A.2). The School Transformation Branch will support Complex Area Superintendents and staff as well as the Public Charter School Commission’s Federal Programs team as they provide supports to their schools identified for support and improvement. The Commission is proposing to designate staff to serve as its federal programs support staff to focus on coordinating the school improvement efforts supported by Title I and school improvement funds for schools identified for support and improvement. The Commission’s Federal Programs team will consist of a Federal Programs Manager, the Charter Academic Officers, the resource teacher, and the Title I Linkers.

The School Transformation Branch will provide schools support directly and through the complex areas and the Commission’s Federal Programs team by providing them with Complex/Charter Academic Officers, who facilitate school improvement efforts and provide technical assistance to schools identified for comprehensive and targeted support and improvement; complex area resource teachers, who provide support and technical assistance to schools implementing support and improvement plans; and Title I Linkers, who monitor the use of Title I funds.
Figure A.2. Multi-Tiered System of Supports

The School Transformation Branch will also facilitate monthly meetings of the principals of the schools identified for comprehensive support and improvement. This newly-formed professional learning community will provide principals with a forum to discuss the challenges they are facing in their school improvement processes and to strategize on how to best support their teachers and students. These monthly meetings may include complex area support staff, such as the complex or charter academic officer, or state office personnel, such as a personnel or education specialist, who will be best to help address the challenges and support the implementation of school improvement strategies for the schools identified for comprehensive support and improvement.

Hawai‘i will create an Equity Support Team, a team consisting of the Assistant Superintendents from HIDOE state offices and their designees, to provide differentiated support to better assist schools identified for comprehensive support and improvement. These supports would include ensuring equity in the distribution of personnel and resources to the identified schools and providing assistance in navigating state office procedures to secure desired resources. The Equity Support Team will visit the schools identified for comprehensive support and improvement, assess each school’s needs to determine the supports needed, and address systemic issues that inhibit the implementation of school improvement plans. Should schools identified for comprehensive support and improvement need rigorous interventions, the Equity Support Team will provide more intensive supports to these schools.
a. **Exit Criteria for Comprehensive Support and Improvement Schools.**

Describe the statewide exit criteria, established by the State, for schools identified for comprehensive support and improvement, including the number of years (not to exceed four) over which schools are expected to meet such criteria.

Hawai‘i proposes to exit schools from comprehensive support and improvement based on the criteria for which they were identified. Schools that were identified due to their graduation rate must show improvement and must have a graduation rate greater than 67 percent the final year of the three-year support and improvement period to exit. Thus, if a school was identified in Fall 2017 for a graduation rate lower than 67 percent for the Class of 2016, the school must show an improvement in its graduation rate over the three-year period and must have a graduation rate greater than 67 percent for the Class of 2019 to exit comprehensive support and improvement status in Fall 2020.

Schools identified for comprehensive support and improvement due to low performance must have a school performance unit score placing them above the lowest-performing 5 percent of Title I schools within their grade span the final school year of the three-year support and improvement period and must demonstrate significant improvement to exit. A school identified for comprehensive support and improvement in Fall 2017 must have a school performance unit score high enough to no longer be among the lowest-performing 5 percent of Title I schools within its school type in Fall 2020.

For schools identified for comprehensive support and improvement due to persistently low-performing subgroups, the subgroups which led to the identification must have a subgroup performance unit score greater than the threshold score that led to their identification for additional targeted support the final year of the three-year comprehensive support and improvement period. Thus, to exit in Fall 2023, the subgroups identified as persistently low-performing in Fall 2020 must have subgroup performance unit scores higher than the threshold score of their grade span that led to their identification for additional support the year they were initially identified (Fall 2017) and demonstrate significant improvement.

Schools identified for comprehensive support and improvement due to low performance or persistently low-performing subgroups will also be required to select additional measures from a state-created menu to demonstrate school improvement and will be evaluated by a school improvement review committee. The menu of measures will be created with stakeholder input and will reflect the priorities of our schools. The school improvement review committee, with oversight by the Deputy
Superintendent, will review and approve the use of the additional measures and will conduct multiple school visitations to assess the progress the school has made. The school would also provide evidence of the progress made for the committee to review prior to the beginning of each school year for an annual review and should substantial progress be demonstrated prior to the end of the three-year support and improvement period, the school may request to no longer be identified for comprehensive support and improvement. The school must demonstrate sufficient progress by the end of the three-year support and improvement period to exit comprehensive support and improvement status. The school improvement review committee will determine if the school demonstrated sufficient progress and will submit its recommendation on whether the school should exit or continue to receive support to the Deputy Superintendent, who will make the final decision.

Should a school identified for comprehensive support and improvement for graduation rate increase its graduation rate to higher than 67 percent but is identified as one of the lowest-performing 5 percent of Title I schools in Fall 2020, the school will be treated as a newly identified school for comprehensive support and improvement.

b. Exit Criteria for Schools Receiving Additional Targeted Support.

Describe the statewide exit criteria, established by the State, for schools receiving additional targeted support under ESEA section 1111(d)(2)(C), including the number of years over which schools are expected to meet such criteria.

For schools identified for additional targeted support as a result of low-performing subgroups, the subgroups which led to the identification must have a subgroup performance unit score greater than the threshold score that led to their identification for additional targeted support. Thus, to exit in Fall 2020, the subgroups that led a school to be identified for additional targeted support in Fall 2017 must demonstrate significant improvement and must have a subgroup performance unit score higher than the threshold score that led to their identification.

Should a school identified for additional targeted support due to the low-performance of its subgroups improve these subgroups’ subgroup performance unit score so that they are no longer considered low-performing, but another subgroup in that same school becomes low-performing, the school will be treated as newly identified for additional targeted support. For example, if Subgroup A and B achieve a subgroup performance unit score greater than the threshold score that led to their identification but Subgroup C has a subgroup performance unit score lower than the new threshold score, the school will be treated as a newly identified school for additional targeted support.

c. More Rigorous Interventions. Describe the more rigorous interventions required for schools identified for comprehensive support and improvement that fail to meet the State’s exit criteria within a State-determined number of years consistent with section 1111(d)(3)(A)(i)(I) of the ESEA.

Should a school be identified for comprehensive support and improvement not meet Hawai‘i’s exit criteria within four years of identification – three years plus an extension of one year to improve, the state will provide more rigorous interventions as appropriate to meet the needs of the school. HIDOE recognizes that the reasons a school may not meet exit criteria are specific to the school situation. What “rigorous interventions” will look like at schools continuing to be identified for comprehensive support and improvement will depend on the schools’ needs. Thus, the rigorous interventions will be differentiated. HIDOE is currently working with stakeholders to develop a menu of such interventions from which schools not making progress may select, in consultation with their Complex Area Superintendent, the School Transformation Branch, and stakeholders, based on the their identified needs.

Additionally, schools that continue to require comprehensive support and improvement will also receive more focused attention from their Complex Area Superintendent with oversight by the Deputy Superintendent. To provide principals more intensive supports, the Complex Area Superintendent will coordinate and lead school improvement efforts at the school, employing the necessary evidence- and research-based strategies (e.g. the Community Schools’ six-part
strategic approach shown below) and utilizing additional resources to assist the school in meeting the exit criteria.

1. Curricula that are engaging, culturally relevant, and challenging;
2. Emphasis on high-quality teaching, not on high-stakes testing;
3. Wrap-around supports such as health care, eye care, and social and emotional services that support academics;
4. Positive discipline practices, such as restorative justice and social and emotional learning supports;
5. Authentic parent and community engagement; and
6. Inclusive school leadership.

The Complex Area Superintendent and complex area team will lead a follow-up comprehensive needs assessment to determine specific improvement targets and root causes and contributing factors that are preventing the school from meeting its exit criteria. The Complex Area Superintendent will also assume responsibility to update and manage the school’s academic and financial plan and handle personnel matters, allowing school administrators to dedicate more time to supporting teachers in the classroom and addressing student needs.

The Deputy Superintendent will provide oversight of the school improvement process and will monitor the progress of the schools receiving rigorous interventions through school visitations and regular status meetings. The Equity Support Team will provide more intensive supports by addressing any systemic issues that are inhibiting school improvement and the School Transformation Branch will provide assistance and technical support to both the complex area team and the school in the area of school improvement strategies, professional development, and needed resources.

By applying more rigorous interventions, the Complex Area Superintendent and the Deputy Superintendent will take a more active role in the school improvement efforts at the school level. The theory of action underlying this effort is that additional state level support for school improvement will supplement the complex-based support structure for those schools with more intensive, ongoing needs that are not addressed by the additional resources, oversight, and complex support for the initial three-year period of support and improvement. This concerted effort at the school, complex, and state levels will better facilitate the improvement of schools continuing to perform at the levels which identified them for comprehensive support and improvement.

7 “Community Schools: Transforming Struggling Schools into Thriving Schools”, February 2016.
Rigorous interventions will apply to schools that do not meet the exit criteria by the end of the fourth year of comprehensive support and improvement. Should a school identified for comprehensive support and improvement meet the exit criteria but is re-identified for comprehensive support and improvement (e.g. the school has made improvements, but continues to be a school with the most struggling students), the three-year support and improvement period will restart and rigorous interventions will not be required.

d. **Resource Allocation Review.** Describe how the State will periodically review resource allocation to support school improvement in each LEA in the State serving a significant number or percentage of schools identified for comprehensive or targeted support and improvement.

The School Transformation Branch will review each identified school’s Comprehensive Support and Improvement Plan and the Complex Area Superintendent or the Commission’s Federal Programs team will review each identified school’s Targeted Support and Improvement Plan for strategies and targets addressing resource inequities at the school-level during the year of implementation and annually thereafter. In addition, The School Transformation Branch will consider the Complex Academic Officers, the Commission’s Federal Programs team, the Complex Area Resource Teachers, and Title I Linkers as well as other state, complex area, or Public Charter School Commission personnel such as school renewal specials, educational specialists, and other resource teachers and their roles in developing and implementing the school’s improvement plan before arranging for the provision of services through other entities such as educational service agencies or nonprofit or for-profit external providers with expertise in evidence-based interventions. HIDOE can leverage local and state resources, such as other personnel within the HIDOE Office of Curriculum, Instruction and Student Support and the Data Governance and Analysis Branch to support our schools identified for comprehensive or targeted support and improvement.

e. **Technical Assistance.** Describe the technical assistance the State will provide to each LEA in the State serving a significant number or percentage of schools identified for comprehensive or targeted support and improvement.

As a unitary SEA and LEA, HIDOE is an LEA serving all schools identified for comprehensive and targeted support and improvement across the state. Under the guidance of the Deputy Superintendent, HIDOE will tightly focus school improvement support for its schools with the most struggling students across all complex areas, including the
Public Charter School Commission and the public charter schools. The School Transformation Branch will provide technical assistance to each complex area serving a significant number of schools identified for comprehensive or targeted support and improvement. The School Transformation Branch will also provide additional personalized supports for the schools identified for comprehensive support and improvement at the school level when supports are requested by the CAS.

HIDOE will provide each complex area and the Public Charter School Commission with schools identified for comprehensive support and improvement with a Complex Academic Officer (Educational Officer) and a Comprehensive Support and Improvement Resource Teacher or the monetary equivalent to support school improvement processes. These educational officers and resource teachers will focus on supporting the needs of the identified schools, which includes facilitating the school improvement processes and monitoring the implementation of evidence- and research-based school improvement activities through the Academic Reflection Team, or similar process, to monitor progress. The Academic Reflection Team is a team of school leaders that monitors the progress of the school improvement efforts implemented. The Academic Reflection Teams are supported by complex area staff dedicated to providing them with guidance and technical assistance. The Complex Academic Officer will also ensure the school improvement process includes input from the various stakeholders.

In addition to providing additional personnel to support schools, the School Transformation Branch will also develop complex-level talent to be equally successfully at addressing all areas of need for their schools and orchestrate the change process themselves. These complex area personnel will help to determine which evidence- and research-based school improvement strategies would be the most appropriate for their schools.

The School Transformation Branch will convene the Complex Academic Officers, the Comprehensive Support and Improvement Resource Teachers, and the Academic Reflection Team Leads in coordination with the Professional Development and Educational Research Institute of the Office of Human Resources, the Data Governance and Analysis Branch, and the Office of Curriculum, Instruction and Student Support to develop complex-level and Public Charter School Commission talent to better support the areas of need at the school level, specifically school-level leadership, Academic Reflection Teams, effective monitoring and decision-making systems, and strong instruction. By building capacity at the complex and commission level, HIDOE will clearly set and manage
the expectations for school improvement as a tri-level system of support. This is likely to result in improved student learning in all schools, especially those schools which are not identified for comprehensive or targeted support and improvement but are low-performing or struggle with large academic achievement gaps among student subgroups.

The work of the School Transformation Branch at the complex level will complement the state-level professional learning communities dedicated to school improvement, especially in assisting schools in implementing HIDOE-approved evidence-based interventions, which include induction and mentoring for probationary teachers and new school administrators; mentoring for less-than-satisfactory teachers; coaching for all teachers and school administrators; and strengthening core instruction.

f. **Additional Optional Action.** If applicable, describe the action the State will take to initiate additional improvement in any LEA with a significant number or percentage of schools that are consistently identified by the State for comprehensive support and improvement and are not meeting exit criteria established by the State or in any LEA with a significant number or percentage of schools implementing targeted support and improvement plans.

N/A

5. **Disproportionate Rates of Access to Educators (ESEA section 1111(g)(1)(B)):** Describe how low-income and minority children enrolled in schools assisted under Title I, Part A are not served at disproportionate rates by ineffective, out-of-field, or inexperienced teachers, and the measures the SEA will use to evaluate and publicly report the progress of the SEA with respect to such description.  

Hawai‘i submitted to the Department its Equitable Access to Excellent Educators plan in November 2015. This plan describes the disproportionality of teacher distribution across the state, identifies potential causes of this disproportionality, and defines the strategies HIDOE plans to utilize to eliminate this disproportionality.

Due to the low percentage of teachers identified as less than “effective,” as measured by HIDOE’s teacher performance evaluation (less than 1 percent of HIDOE teachers), HIDOE will focus primarily on addressing the disproportionate rates of out-of-field and inexperienced teachers in high-needs schools, schools with a large population of low-income and high-needs students.  HIDOE, however, does recognize the disproportionality in the distribution of the low percentage of ineffective teachers, and HIDOE’s Office of Human Resources and HIDOE-Hawai‘i State Teachers Association Joint Committee on the Educator Effectiveness System continue to analyze the data from the teacher performance evaluation and recommend improvements with the goal of having the evaluation facilitate better teaching and learning.

---

8 Consistent with ESEA section 1111(g)(1)(B), this description should not be construed as requiring a State to develop or implement a teacher, principal or other school leader evaluation system.
The most likely causes for the disproportionality of teacher distribution of out-of-field, inexperienced or non-licensed/non-Hawai`i content qualified teachers in high-needs schools are: the location of schools with higher rates of out-of-field and inexperienced teachers, the shortage of qualified teachers, and teacher turnover. Many schools with higher rates of economically disadvantaged and high-needs students are in communities farther from the economic hubs of the islands. The commute to these rural areas often deter teachers, many who live in the urban or suburban areas, from accepting positions at these schools or remaining at these schools for more than a few years. Teachers often opt to teach at schools closer to the area in which they reside when positions become available. The number of teachers who reside in these rural communities is currently far less than the number of positions that these schools need to fill.

The State's current teacher shortage also impacts the percentage of experienced, licensed and/or Hawai`i content-qualified teachers available to teach in schools with higher rates of low-income and high-needs students. As teachers transfer from such schools to schools closer to the area in which they reside, these schools are left with more vacancies. Due to the limited number of applicants, these positions are often filled with beginning teachers, teachers who are not licensed or content-qualified in the assigned subject, or long-term substitute teachers. Factors contributing to this shortage include teachers who leave Hawai`i for various reasons, Hawai`i’s high cost of living relative to teacher compensation, and a shortage of graduates from in-State teacher preparation programs.

A high teacher turnover rate also contributes to our teacher shortage. HIDOE’s retention rate for teachers in the first five years of the profession has been 55 percent to 60 percent; thus, 40 percent to 45 percent of new teachers leave HIDOE within five years. Many of these teachers either felt they did not receive the supports necessary to meet the demands of teaching, opted for new employment elsewhere, or left Hawai`i. While new teachers are leaving HIDOE, veteran teachers are retiring, opening positions in schools in urban and suburban areas with higher-performing students. Teachers at schools with higher rates of low-income and high-needs students opt to transfer to these schools, thus perpetuating the cycle of disproportionality in teacher distribution.

Hawai`i is committed to supporting positive outcomes for all our students. We are also committed to transparency in reporting. Hawai`i will make reports on the distribution of teachers statewide publicly available on the HIDOE teacher quality website (hqt.k12.hi.us).

HIDOE is committed to equity of excellent educators and will report and track the progress HIDOE is making in ensuring all students have effective, qualified, and experienced teachers and decreasing the disproportionality in the distribution of ineffective, out-of-field, and inexperienced teachers to schools with higher enrollment of high-needs students, students who are economically disadvantaged, or Native Hawaiian or Pacific Islander students.

---

9 Content-qualified refers to teachers demonstrating competence in the subject matter that they teach. For example, a secondary math teacher has evidence of math background as demonstrated through a degree, training or other means. HIDOE is proposing multiple ways for teachers to demonstrate subject matter competence. (This ESSA Title I requirement is similar to No Child Left Behind’s “Highly Qualified Teacher” expectations.)
6. **School Conditions** (*ESEA section 1111(g)(1)(C)*): Describe how the SEA agency will support LEAs receiving assistance under Title I, Part A to improve school conditions for student learning, including through reducing: (i) incidences of bullying and harassment; (ii) the overuse of discipline practices that remove students from the classroom; and (iii) the use of aversive behavioral interventions that compromise student health and safety.

Ensuring all students are safe, healthy, and supported in school so that they can engage fully in high-quality educational opportunities is a priority for Hawai‘i [HIDOE/BOE Strategic Plan, Goal 1, Objective 2]. Creating and sustaining safe, caring, and nurturing learning and teaching environments are foundational to achieving success for all students. HIDOE supports a broad comprehensive transactional approach in addressing the whole child through early intervention and prevention.

Addressing our students’ physical, mental, and behavioral health through school programs and partnerships with families, community organizations, and government agencies support students’ well-being. HIDOE utilizes a Comprehensive Student Support System to identify student needs and the supports necessary to address these needs. To complement the Comprehensive Student Support System, HIDOE will expand the use of programs such as the early warning system and Response to Intervention to ensure schools have the means to better identify and address their students’ needs.

HIDOE provides counseling services, school-based behavioral health services, positive behavioral support programs, and peer mediation programs to address incidences in bullying and harassment as well as other student misconduct to reduce the need to remove students from the classroom and maintain student health and safety. HIDOE has also made a commitment to reduce bullying and cyberbullying through statewide anti-bullying efforts. Moving forward, HIDOE will expand our efforts to reduce incidents of bullying, harassment, and other student misconduct such as fighting and disorderly conduct and will increase behavioral supports for students who need behavioral interventions to improve school conditions for student learning for all students through school climate and socioemotional learning initiatives.

7. **School Transitions** (*ESEA section 1111(g)(1)(D)*): Describe how the State will support LEAs receiving assistance under Title I, Part A in meeting the needs of students at all levels of schooling (particularly students in the middle grades and high school), including how the State will work with such LEAs to provide effective transitions of students to middle grades and high school to decrease the risk of students dropping out.

HIDOE has placed a high priority on supporting students through important transitions throughout the pre-K to grade 12 educational continuum. Research has determined that successfully supporting students through each transitional milestone contributes to achieving their post-secondary and career goals. This implication directly impacts the work conducted at all levels within the HIDOE school system.

To guide the work, HIDOE has identified major transition outcomes within its strategic plan to outline and support the efforts made by each complex area and school in the state.
The identified transitions outlined in the HIDOE/BOE Strategic Plan are to:

- Identify and address student strengths and challenges early so that students may transition into early elementary grades ready to learn and with a cognitive foundation for reading that prepares them for the future;
- Support students’ transition in adolescence (grades 5-10) through school practices, counseling, and research-based experiences that advance their total well-being;
- Create innovative learning options to earn a high school diploma;
- Support students who are transitioning between grade levels or transferring to a new school; and
- Ensure that every high school graduate or completer has [a personal transition plan with] an identified next step after high school aligned with their future aspirations. [Goal 4]

Hawai‘i has made progress in promoting early learning to ensure students develop a readiness to learn at an early age. In SY 2014-15, Hawai‘i passed legislation to mandate kindergarten for children who will be at least 5 years of age on or before July 31 of the school year (Hawai‘i Revised Statutes 302A-411). The Governor’s Blueprint calls for the expansion and implementation of high quality early learning in SY 2017-18 and the addition of more public preschools (p. 18). Currently, 19 HIDOE schools offer pre-kindergarten programs on six islands. HIDOE also partners with community organizations, such as Head Start and Hawai‘i P-3, to promote early education statewide. HIDOE will continue working with the Governor’s Executive Office of Early Learning to promote preschool education and to partner with other early childhood programs across the state.

Funded by the US Department of Education Preschool Development grant, six public charter schools currently have pre-kindergarten programs on three islands. Beginning in SY 2017-18, there will be pre-kindergarten programs in 18 public charter schools potentially serving 360 students. The public charter schools work with the Executive Office of Early Learning to provide early learning professional development and are developing shared outcomes for the Early Childhood Data Governance Council.

By utilizing braided funding to maximize federal, state, and other funding sources, Hawai‘i will strengthen and support a continuum of grade-level transition strategies. These integral strategies are evidence-based and align with best practices to assist students as they progress in through transitions among school levels allowing for innovative evidence-based strategies at the school level.

Hawai‘i recognizes that our schools and complexes across the state have diverse needs. HIDOE’s complex area and school complex structure, which are geographically determined and community-based, allow for articulation and collaboration between the feeder elementary schools and the secondary schools to facilitate a smooth transition within and between schools. Using data to identify specific needs, Complex Area Superintendents and school principals research and identify transition focus areas and the strategies relevant to
the student population of their schools in order to appropriately support student success. Some school complexes have implemented programs such as AVID and the International Baccalaureate programs to provide consistency in instructional strategies from elementary school through high school to facilitate a smoother transition from school to school within the complex. Middle schools have implemented teaming and advisory to provide students with a smaller learning community to ease the transition from elementary to middle school and to foster better student-teacher relationships so that students know they have an adult on campus that they can seek help and support from when needed. High schools have also implemented smaller learning communities to foster better student-teacher relationships and to ease the transition from middle to high school as well as from grade to grade within high school. Schools with a large population of students in a military family have established transition centers for all students entering the school to provide new students with a buddy to help them navigate through and transition to the school. The Office of Curriculum, Instruction and Student Support will support complex areas and schools by providing supports in understanding the data and identifying the strategies that would best address the specific needs of the schools.

To monitor the progress of our students, HIDOE schools have implemented the Response to Intervention (RTI) model, a comprehensive student support system, and the Early Warning System, which identifies students who are at risk of not being successful in school due to grades, attendance, or behavior. The Office of Curriculum, Instruction and Student Support will continue to provide training on the comprehensive student support system and the Early Warning System so schools have the means to identify the needs of their students and provide the supports necessary to ensure their students are successful throughout their education. Currently, of particular focus is supporting students in grade 9 to ensure they are on-track to graduate from high school on time. HIDOE Leadership and high schools have been reviewing the data, discussing the challenges, and researching evidence-based strategies to support 9th grade students.

To provide alternative education settings for secondary students who continue to struggle in the traditional schools, Hawaiʻi is exploring alternative high school programs. HIDOE currently provides alternative education programs through its Storefront/High Core program, Olomana School, and two Community Schools for Adults. The Storefront program and Olomana School are alternative education settings aimed at reforming at-risk students. Storefront students graduate with a high school diploma from their home school; Olomana’s students earn a high school diploma from Olomana. The Community Schools for Adults, which receive federal funding through the Workforce Innovation and Opportunity Act of 2014, provide a competency-based program and a high school equivalency preparation program and issue a community school diploma upon the successful completion of these programs. HIDOE will expand our alternative education opportunities by creating innovative learning options for students to earn a high school diploma within our K-12 structure.

To promote a successful transition from high school to college or the workforce, HIDOE will provide schools with the means to promote college- and career-readiness. HIDOE will
offer schools the supports they need to expand their Advanced Placement and dual credit offerings. HIDOE has partnered with the University of Hawai‘i Community Colleges to offer high school students with the opportunity to earn college credits through the Early College program. HIDOE will also support the high schools’ career academies and pathways. Our Career Technical Education Program has established partnerships with numerous business and industry organizations to provide the educational experiences needed for students to develop the skills needed to be successful in the workplace and to allow for a successful transition from high school to the workforce.

HIDOE will continue our efforts to ensure an effective transition within Hawai‘i’s public education system for all students by continuing to analyze student data and research potential strategies and interventions that will best support student success.
B. Title I, Part C: Education of Migratory Children  
1. **Supporting Needs of Migratory Children (ESEA section 1304(b)(1))**: Describe how, in planning, implementing, and evaluating programs and projects assisted under Title I, Part C, the State and its local operating agencies will ensure that the unique educational needs of migratory children, including preschool migratory children and migratory children who have dropped out of school, are identified and addressed through:
   i. The full range of services that are available for migratory children from appropriate local, State, and Federal educational programs;
   ii. Joint planning among local, State, and Federal educational programs serving migratory children, including language instruction educational programs under Title III, Part A;
   iii. The integration of services available under Title I, Part C with services provided by those other programs; and
   iv. Measurable program objectives and outcomes.

Intentional planning to support students’ transitions can make the critical difference for student success. A little more than 2,000 students in Hawai‘i (1%) are considered “migratory” because they change schools across Hawai‘i school complex boundaries or move from another state because of their parent/guardian’s employment as a migratory agricultural worker or fishers. The Hawai‘i Migrant Education Program helps migratory students overcome challenges of mobility, frequent absences, late enrollment into school, social isolation, and other difficulties associated with a migratory life to transition successfully throughout their educational experiences [HIDOE/BOE Strategic Plan, Goal 1, Objective 4]. The Hawai‘i Migrant Education Program prioritizes services to migratory students who are failing or at risk of failing to meet HIDOE’s content and performance standards and whose education has been interrupted during the regular school year. The Hawai‘i Migrant Education Program is unique in that migratory students qualify for services by crossing school complex lines in addition to qualifying by moving to or from other states. Thus, most migratory movement occurs within the state rather than from outside the state.

In April 2013, a comprehensive needs assessment was conducted to review and improve the Hawai‘i Migrant Education Program. The Hawai‘i Migrant Education Comprehensive Needs Assessment revealed five evidence-based conclusions:

- There is a need to focus migrant services and resources in the areas of reading and math. This conclusion is evidenced by assessment results showing that migrant student proficiency in reading and math is substantially below that of all students in Hawai‘i.
- There is a need to focus services on helping migrant students attain the credits necessary to graduate from high school with their peers.
- There is a need to focus migrant services and resources on support for education access. Staff and parents note that due to poor economic conditions, frequent mobility, and cultural differences, students may not have the needed resources for school success.
• To a lesser extent than in reading, math, and graduation, school readiness needs exist for young migrant children in Hawai‘i.

• Beyond identified needs in reading, math, graduation, and school readiness, there is a need for migrant coordination and support in areas identified by migrant educators; migrant recruiters; and teachers, tutors, and administrators who work with migrant students who were surveyed. These include parent involvement strategies, information and instructional/content strategies for general classroom teachers working with migrant students; transportation to and from school when services are offered beyond the school day; health and wellness; and continuation of active recruitment.

These conclusions are addressed in the Hawai‘i Migrant Education Service Delivery Plan. Based on the Comprehensive Needs Assessment and the Service Delivery Plan, Hawai‘i’s Migrant Education Program will focus on the following four areas of needs for migratory students: Reading/English Language Arts (ELA); Mathematics; School Readiness (Preschool); and Graduation from High School. Both the Comprehensive Needs Assessment and the Service Delivery Plan meet the guidelines set forth in Section 1306 [20 U.S.C. 6396] of the ESSA law. Table B.1 outlines the strategies HIDOE will deploy to address the four areas of need for migratory students.

Table B.1. Strategies to address the four areas of need for migratory students

<table>
<thead>
<tr>
<th>Area of Need</th>
<th>Strategies</th>
</tr>

</tbody>
</table>

The Migrant Education funds are designed to enable complex areas and schools the ability to provide migratory students the opportunities to acquire the knowledge and skills
included in the challenging state content and performance standards developed for all children to ensure these students are able to demonstrate that they are on a path towards success in college, career, and citizenship. The Migrant Education Program is responsible to help migratory students meet achievement targets in ELA and mathematics on the annual statewide assessments, which is a critical part of the school accountability system measuring the assurance that migratory students graduate from high school. Assessment scores provide data to help schools and complexes monitor student progress and to identify the resources and support schools and complexes need for students who are struggling. Once the needs of migratory students are identified, students benefit from a comprehensive continuum of services through regular school programs as well as through extended learning opportunities. With additional funds to address the unique learner needs of the migratory population, schools and complexes can customize services to meet program objectives. Performance goals and expectations in language arts and mathematics are targeted for improvement.

HIDOE will also differentiate instruction to meet the academic needs of our migratory students. Funded migrant schools at the elementary level use a state-supported curriculum that has differentiated instruction built into each lesson. Differentiated instruction is also addressed by schools with a high English learner population through their English Language Learner Program staff and the GLAD (Guided Language Acquisition Design) training which some of our Migrant Education Program tutors received training in from their school. Since the Migrant Education Program is a supplemental program to the regular education program, other support for our migratory students include online reading and math programs such as iReady, Imagine Learning, and Kid Biz which our schools are already using. Secondary credit recovery programs are used by our high schools to help the students meet the requirement of credits for graduation. By differentiating instruction and providing our migratory students with various learning activities, HIDOE aims to increase student engagement and empowerment through relevant, rigorous learning opportunities [HIDOE/BOE Strategic Plan, Goal 1, Objective 1].

To address concerns regarding school readiness, Hawai‘i will be looking to expand preschool opportunities for all students. With a limited number of preschools in our rural communities, migrant students do not always have the opportunity to get a head start on their formal education. Networking with the HIDOE preschool program, the IDEA program, and Head Start offers preschool opportunities for the migrant education students in those communities. Some schools receiving migrant education funds have also partnered with private schools through their complex support in a home-based and school-based family literacy program which has a migrant criterion in their recruitment process. These family literacy programs offer migratory students the opportunity to better prepare themselves for success in school. Hawai‘i provides a variety of early learning opportunities to ensure our migratory students are able to transition into early elementary grades ready to learn and with a cognitive foundation for reading that prepares them for the future [HIDOE/BOE Strategic Plan, Goal 1, Objective 4].

Hawai‘i also provides learning opportunities for migratory children who have dropped out
of school. HIDOE has two Community Schools for Adults with campuses and sites on four islands offering programs for basic education, secondary education, and English language instruction education for English learners. Through the Community Schools for Adults, migratory children who have dropped out of school will be able to earn an HIDOE Hawai‘i Adult Community School Diploma through a competency-based program or a high school equivalency test such as the GED. Classes are offered during the day and in the evening and offered in multiple communities to accommodate students with various schedules and transportation concerns.

To ensure we are appropriately addressing the needs of our migratory students, Hawai‘i has established measurable program objectives. Hawai‘i’s measurable program objectives were developed through the Comprehensive Needs Assessment and Service Delivery Plan process. These measurable program objectives are evaluated annually by META Associates, an educational consulting and program evaluation firm, and the outcomes results are used for program improvement. HIDOE’s measurable program objectives focus on the four areas which schools can use their subgrant funds to address: (1) English Language Arts/Literacy, (2) Mathematics, (3) School Readiness, and (4) Graduation from High School. The measurable program objectives for each focus area are listed in Table B.2.

### Table B.2. Measureable Program Objectives

</tbody>
</table>
### Areas of Need | Measurable Program Objectives
--- | ---
4a | Graduation from High School
There will be a decrease of .01% in the statewide dropout rate for migratory students participating in the Migrant Education Program for at least 2 quarters.

4b | Graduation from High School
50% of migratory parents/families surveyed will report parent satisfaction with educational services to help their children graduate

4c | Graduation from High School
80% of high school migrant education staff surveyed will report that they received relevant resources to help them support migratory students in graduating.

In addition to educational supports and services, migratory students also receive assistance with the non-academic requirements of school in HIDOE’s attempt to remove the barriers to education. Migratory students receive free school meals and transportation and may be provided with school uniforms and school supplies throughout the school year to ensure students’ well-being is addressed. This will foster a sense of belonging and resiliency.

To further promote a sense of belonging, parent and community involvement are highly encouraged. At the state level, the State Migrant Education Parent Council meets on an annual basis to provide input into the status and direction of HIDOE’s service delivery plan. At the school level, the School Community Council meets monthly and provides an opportunity to discuss progress on any applicable migrant education program. Included in the School Community Council membership are parent representatives, community members, and business representatives. In addition to the monthly School Community Council meetings, school-level migrant programs conduct annual parent nights along with other parent engagement activities. Throughout the school year, migrant programs, along with other federal- and state-funded programs, such as Title I, Part A; Title III; Title IV; and Parent Community Networking Center (PCNC), hold joint information sessions for all parents in the school community.

2. Promote Coordination of Services (ESEA section 1304(b)(3)): Describe how the State will use Title I, Part C funds received under this part to promote interstate and intrastate coordination of services for migratory children, including how the State will provide for educational continuity through the timely transfer of pertinent school records, including information on health, when children move from one school to another, whether or not such move occurs during the regular school year.

Inter/intrastate collaboration is a Migrant Education Program requirement focused on data collection and the timely transfer and maintenance of migratory student records. This is accomplished through activities such as identifying and recruiting migratory students throughout the year, coordinating secondary credit recovery with counselors and educators in schools where Migrant Education Program students are enrolled, participating in Migrant Education Program consortium arrangements, and transferring educational data. These
activities are coordinated by HIDOE with school Migrant Education Programs playing a key role in the collection, transfer, and maintenance of data. Inter- and intrastate collaboration activities in which Hawai‘i Migrant Education Program staff participated are:

- Counseling students and parents on the importance of education and completing course credits toward graduation;
- Providing advanced notification to other states of migratory students and families who are moving to ensure that education and support services are in place when they arrive;
- Participation in the Migrant Education Program consortium focused on reading: Migrant Literacy CORE;
- Participation in the National Association of State Directors of Migrant Education (NASDME) and the Interstate Migrant Education Council (IMEC);
- Participation in the Migrant Student Information Exchange (MSIX) data transfer/training; and
- Participation in community council meetings and local and state government activities.

Hawai‘i participates in the Migrant Literacy CORE consortium along with twelve other states. The goal of the Migrant Literacy CORE is to help migratory students improve their reading proficiency to become successful students and lifelong learners. This consortium addresses the reading needs of migratory students through online student tutorials aligned with the Migrant Literacy NET reading lessons, screening assessments, and an online electronic student portfolio to document student learning and progress.

Hawai‘i also currently participates in the Interstate Migrant Education Council and the National Association of State Directors of Migrant Education, bringing a focus to the state’s involvement on the national level.

Information on family eligibility is updated daily in MIS2000, which is the HIDOE Migrant Education Database. Every night, MIS2000 uploads the migrant data into the HIDOE Statewide Student Enrollment System that helps with intrastate transfer of records. This information is also shared with other HIDOE data systems, such as Infinite Campus, HIDOE’s student information system, and the Longitudinal Data System, which houses data on student demographics, assessment, health, and course history. MIS2000 also transfers migratory student records to Migrant Student Information Exchange (MSIX), the national migrant database. This information-sharing provides schools with timely and user-friendly data to best support our migratory students.
3. **Use of Funds** *(ESEA section 1304(b)(4))*: Describe the State’s priorities for the use of Title I, Part C funds, and how such priorities relate to the State’s assessment of needs for services in the State.

While there is considerable flexibility in using Migrant Education Program funds, these funds must be used to address the unmet needs of migratory children that result from these children’s lifestyle to permit them to participate effectively in school. Priority for service is given to the eligible migratory school-aged children whose education has been disrupted during the regular school year and who are failing or at-risk of failing to meet state academic and performance standards. Priority 1 students are those students who fall into this category, who became eligible for the program within the last 12 months, and whose achievement level is below or approaching in ELA and/or mathematics. Priority 2 students are those students who fall into this category, who became eligible for the program within the last 2-3 years, and whose achievement level is below or approaching in ELA and/or mathematics. All other migratory students are serviced based upon their academic needs.

Priority for service is an ongoing determination throughout the school year as students are assessed quarterly by their program on a universal assessment to determine their needs in the areas of ELA and/or mathematics.

Schools input student data in the areas of Disruption of Education, ELA Assessment, and Math Assessment for eligible migratory students into an At-Risk Worksheet. Schools are able to use this worksheet throughout the school year to determine a student’s priority for service status. The At-Risk Worksheet data is also used to determine funding for the school for the following school year. Priority 1 and Priority 2 students are given a higher weighted value in the funding formula to ensure appropriate services are provided.
C. Title I, Part D: Prevention and Intervention Programs for Children and Youth who are Neglected, Delinquent, or At-Risk

1. Transitions Between Correctional Facilities and Local Programs (ESEA section 1414(a)(1)(B)): Provide a plan for assisting in the transition of children and youth between correctional facilities and locally operated programs.

Hawai‘i strives to ensure all students demonstrate they are on a path toward success in college, career, and citizenship regardless of where they receive their public education in the state [HIDOE/BOE Strategic Plan, Goal 1]. This includes incarcerated youth who are served by Title I, Part D programs in the Hawai‘i State Department of Public Safety (DPS) and the Hawai‘i State Department of Human Services’ (DHS) Hawai‘i Youth Correctional Facility (HYCF). Last year, approximately 250 youth at these facilities, or 0.1 percent of Hawai‘i public school students, were served by Title I, Part D programs. The primary goal of these programs is ensuring incarcerated students are exposed to the same rigorous standards as other HIDOE students and providing them the opportunity to earn a high school diploma, set life goals, and transition to postsecondary or career options that meet each student’s goal.

HIDOE’s responsibility is to provide the Title I, Part D funds for the programs supporting incarcerated youth in the DPS correctional facilities (Oahu Community Correctional Center, Halawa Correctional Facility, Hawai‘i Community Correctional Center, Maui Community Correctional Center, Kauai Community Correctional Center) and DHS’ Hawai‘i Youth Correctional Facility. HIDOE administers services at Olomana and has Memorandum of Agreements with DPS and DHS to educate students while they are incarcerated at State of Hawai‘i facilities to oversee the programs and services offered. HIDOE provides technical assistance and monitors DPS and DHS to ensure that statutory and regulatory requirements are being met.

HIDOE, DPS, and DHS each designate staff to coordinate the successful transition of children and youth from incarceration to schooling or careers.

- For transitions to schooling, the goal is for each student to earn their high school diploma or equivalent. This includes ensuring academic credits are transferred from Title I, Part D programs to the student’s school, counseling on appropriate school options, assistance in enrolling in school, and case management.
- For students transitioning into careers, this entails ensuring each student has a GED or equivalent, vocational or career training, case management, and life skills.

To ensure services are being delivered to eligible children and youth, state agencies receiving funds must:

1) Submit an annual count of eligible student to HIDOE in January of each year;
2) Submit a program evaluation to HIDOE at least once every three years to determine the impact on participants in:
   a. Maintaining and improving educational achievement,
b. Accruing school credits that meet state requirements for equivalency, promotion and graduation,
c. Completing secondary school or equivalency requirements and obtaining employment after leaving the correctional facility or institution for neglected or delinquent children, and
d. Post-secondary education and job-training programs; and

3) Annually collect, analyze, disaggregate and report on needed data fields for the Consolidated State Performance Report and other required reports.

2. Program Objectives and Outcomes (*ESEA section 1414(a)(2)(A)*): Describe the program objectives and outcomes established by the State that will be used to assess the effectiveness of the Title I, Part D program in improving the academic, career, and technical skills of children in the program.

Hawai‘i’s program objectives and outcomes that are used to assess the effectiveness of the Title I, Part D programs offered across the state are outlined in Table C.1.

**Table C.1. Program Objectives and Outcomes**

<table>
<thead>
<tr>
<th>Program Objectives</th>
<th>Program Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Objective 1: Provision of rigorous academic program standards that all students in HIDOE schools are expected to meet</td>
<td>All programs offer students the same rigorous academic programs that all students in HIDOE schools are expected to meet.</td>
</tr>
<tr>
<td>Objective 2: Students will set education goals and actively participate in their educational program</td>
<td>Students in the educational program will show improvement on measures such as attendance, participation, and educational performance that align with their educational goals. Students in the educational program will be challenged by college degree requirements for their career and community passions and to acquire the knowledge and skills to achieve their life goals.</td>
</tr>
<tr>
<td>Objective 3: Students will set vocational goals and actively participate in their transition services</td>
<td>Students in transition services will show improvement in attendance, participation certification, training or apprenticeship, and performance that align with their career goals.</td>
</tr>
</tbody>
</table>

**HIDOE Continuous Program Improvement**

HIDOE recognizes the importance of regularly evaluating progress and continuously improving performance, which is a core value of the Nā Hopena A‘o initiative [Strengthening Sense of Excellence]. To achieve this, state agencies receiving funds will
collect needed Consolidated State Performance Report data and provide to the HIDOE annually:

- Number of students who have earned a high school diploma,
- Number of students who have earned high school credits,
- Number of students who have earned a GED or equivalent,
- Number of students who were accepted or enrolled in post-secondary education,
- Number of students earning training or vocational certificates,
- Number of students who enrolled in job-training courses or programs, and
- Number of students receiving transition services that address further schooling, employment, or both.

HIDOE will administer a risk assessment to determine the level of monitoring, technical assistance, and professional development the agencies will receive from HIDOE. HIDOE will also conduct interviews and surveys with program administrators, staff, and other key stakeholders at least twice a year to further identify strengths, challenges, and opportunities for improvement.

The collected Consolidated State Performance Report data, risk assessment, and interviews and surveys will identify strengths, challenges, and areas for improvement of the programs being offered through the use of Title I, Part D funds. In addition, the data collected and interviews will allow HIDOE to work with the agencies on improving services delivered to students, ultimately improving the students’ opportunities for success.
## D. Title II, Part A: Supporting Effective Instruction

1. **Use of Funds (ESEA section 2101(d)(2)(A) and (D))**: Describe how the State educational agency will use Title II, Part A funds received under Title II, Part A for State-level activities described in section 2101(c), including how the activities are expected to improve student achievement.

Hawai‘i’s goal is to ensure all Hawai‘i public schools have a high-performing culture where employees have the training, support, and professional development to contribute effectively to student success [HIDOE/BOE Strategic Plan, Goal 2]. The key to transforming the quality of education in Hawai‘i is to ensure a high-quality teacher in every classroom and a great leader in every school, complex area and state office. HIDOE will use Title II, Part A funds to continue to provide a continuum of induction, professional development, and advancement opportunities to support educators from beginning teachers to school principals and state and complex area educational leaders. As stated in the Governor’s Blueprint, “Teachers, principals, and school support staff are the heart of our instructional system. Our keiki [children] in Hawai‘i deserve the best school leaders and educators we can provide” (p. 19).

HIDOE will use Title II, Part A funds to support the HIDOE/BOE Strategic Plan by providing professional development opportunities “to develop and grow employees to support student success and continuous improvement” [HIDOE/BOE Strategic Plan, Goal 2, Objective 1]. To ensure we are providing the appropriate professional development opportunities to meet the needs of our educators, HIDOE relies on our tri-level system of support (Table D.1). HIDOE provides activities to improve student achievement at the state, complex area, and school levels.

### Table D.1. Tri-Level Supports for Educators

<table>
<thead>
<tr>

</tbody>
</table>
School

- School Academic Reflection Team will identify schoolwide professional development needs
- School Academic Reflection Team will monitor progress and school improvement activities at the school level
- Data teams will analyze student outcomes data to determine success and challenges to identify professional development needs
- School administrators will serve as the liaison between the school and the complex area to ensure school improvement needs are met.

The Office of Human Resources uses Title II, Part A funds to ensure HIDOE employees have the training, support, and professional development they need to contribute effectively to student success. Through the Office of Human Resources, HIDOE facilitates induction and mentoring, state certification for teachers and school leaders, and teacher evaluation activities.

**Induction and Mentoring**

Approximately 20 percent of Hawai‘i’s teachers are in their first three years in the profession, many of whom are placed in schools that are considered hard-to-fill. Of these beginning teachers, approximately 25 percent are starting their careers prior to earning a professional teaching license. For Hawai‘i to have a highly effective teacher for every student, a quality induction program that accelerates beginning teacher development must be in place. Rigorous induction and mentoring of new teachers has been shown to improve student achievement, advance teacher practice, and enhance new teacher retention in districts across the country.

In August 2011, HIDOE established the Hawai‘i Teacher Induction Center (the Center) in partnership with the New Teacher Center during Race to the Top to implement a comprehensive and consistent statewide induction and mentoring program to support probationary teachers and reduce teacher turnover. The New Teacher Center is a national non-profit organization whose mission is to improve student learning by accelerating the effectiveness of new teachers, experienced teachers, and school leaders. The New Teacher Center uses a collaborative approach, combining partners’ context-specific knowledge with the New Teacher Center’s broad and deep understanding of research and best practices. The Center uses the New Teacher Center’s proven teacher induction model and nationwide experience to advance new teacher practice, reduce teacher turnover, and close the student achievement gap in Hawai‘i.

In October 2011, the Center collaborated with complex areas, the New Teacher Center and other stakeholders and researched best induction practices to develop the Hawai‘i Teacher Induction Program Standards. These standards guide the development and implementation of high quality induction programs in Hawai‘i so that every beginning teacher has access to a comprehensive induction program.

Outlined in the Hawai‘i Teacher Induction Program Standards is Hawai‘i’s vision of induction where every beginning teacher will participate in a comprehensive three-year
induction program. The program will engage beginning teachers in a system of support that includes working with a highly skilled, trained instructional mentor to accelerate teacher effectiveness and student learning. The induction program will also improve the retention of quality teachers in the profession and strengthen teacher leadership. The broader vision of induction is the opportunity to do professional development in a way that supports teachers in an extended learning, job-embedded environment. It is also a way to build collaborative learning communities for all educators and provide excellent teachers the opportunity to develop as educational leaders. Key program features include:

1. Participation in complex area and school orientations;
2. Information about Hawai‘i’s cultures and norm;
3. Working with a trained instructional mentor 1-2 hours per week and developing a professional growth plan;
4. Mentors and beginning teachers in their first and second year engage in a variety of mentoring practices which include:
   - reflection of practice,
   - focused observations with feedback,
   - lesson planning,
   - analysis of student work,
   - co-observing an effective teacher,
   - co-attending school or complex area professional development,
   - modeling of lessons,
   - differentiating instruction for all learners, and
   - creating a positive, inclusive and respectful environment; and
5. Professional development and professional learning communities for beginning teachers, mentors & coordinators.

Implementation of induction and mentoring programs for beginning teachers statewide, tri-level supports for induction and mentoring, and beginning teachers consistently receiving mentoring supports were established during the prior Strategic Plan with support from the 2010 Race to the Top award. Supported by a variety of funds including Title II, Part A, complex areas each have an induction and mentoring program which provides job-embedded supports and individual mentors for beginning teachers in their first two years as probationary teachers, in accordance with Board Policy 204-1 which was revised in 2012 and which states, "All probationary teachers shall participate in the Department's mentoring program, as guided by the Hawai‘i Teacher Induction Program Standards." The Hawai‘i State Teachers Association further validated this work of the Center by including language in the teacher contract stating that "Probationary teachers in their first and second year will be provided a dedicated teacher mentor in accordance with their complex area's induction and mentoring program and as required by Board Policy 5100 [since revised as Board
Policy 204-1]."

Each Complex Area Superintendent is responsible for the evaluation, implementation, development and sustainability of their complex area induction program with the flexibility to do so in a way that meets both the induction program standards and the unique needs of the complex area schools. Complex areas use the standards to self-assess their programs and identify areas of strength and growth as well as to set program goal, plan, and allocate of resources. Self-assessments are shared with the Center who supports complex areas in unpacking the standards and identifying and developing tools and strategies to address program goals and progress on a continuum of program development.

In addition to Title II, Part A funds, Hawai‘i Teacher Induction Center is supported by a variety of other funding sources including state, federal, grants and private donations. The Center works directly with complex areas, schools, principals, mentors and beginning teachers to help translate the vision of teacher induction into action via the following supports:

- High Quality Professional Development for Mentors, Beginning Teachers, Induction Program Coordinators and School Administrators informed by a triangulation of data sources which include stakeholder needs assessments, formal and informal surveys, and field observations.
  - New Teacher Center Professional Learning Series Mentor Training
  - New Teacher Center Presenter’s Academy to build capacity of mentor leaders to deliver mentor trainings
  - Mentor and beginning teacher forums and professional learning communities
  - Induction-aligned professional development for administrators
- Induction Leadership Coaching & Consultation
  - Program evaluation, implementation, development and sustainability
- Stakeholder Communication and Advocacy
- Statewide Hawai‘i Teacher Induction Survey Administration, Reporting and Evaluation
- Induction Program Coordinator Networks
  - Facilitated data analysis, program & budget planning
  - Induction resource sharing
  - Leadership development

The New Teacher Center’s Professional Learning Series is a targeted professional development series designed to advance the skills, abilities, and knowledge of mentors and coaches with limited release time. The series is designed to ensure that experienced teachers, who are recruited to mentor beginning teachers, become effective teachers of teachers.
The Professional Learning Series is made up of eight two-day sessions that advance mentoring practice in the following areas:

- Identifying and meeting beginning teachers’ developmental needs;
- Guiding teachers to differentiate instruction based on assessed learning needs and rigorous student learning standards and outcomes;
- Focusing on equitable and responsive instruction;
- Creating a sustainable community of mentoring professionals with common language, frameworks, and approaches to instructional mentoring; and
- Applying select, research-based tools and protocols in NTC’s Formative Assessment and Support system.

Complex areas and HIDOE schools invest in mentor and beginning teacher professional development by providing substitutes, stipends, and release time.

Data from the Hawai‘i Teacher Induction Survey illustrates the impact teacher induction has had since the implementation of the Hawai‘i Teacher Induction Program Standards (Table D.2).

**Table D.2. Hawai‘i Teacher Induction Survey results**

Induction in Hawai‘i has had a positive impact on student learning, teacher efficacy, and school and department culture. An added value has been identifying and training excellent teachers to serve as instructional mentors on their campuses. This has brought about intentionality to growing the leadership pipeline and building a bench of teacher leaders in the HIDOE. The development of knowledge and skills that support mentor leadership allows these teacher leaders to advocate for equitable teaching and learning conditions.

HIDOE is committed to expanding induction and mentoring efforts to better support the many Special Education, ELL, and Kaiaupuni teachers through the development and implementation of principal, mentor and beginning teacher professional development including cultural induction, mentoring for social emotional learning and equity. This will
be done through ongoing collaboration across HIDOE offices and with the community.

To prepare beginning teachers to work in areas with students of high-need, the Hawai‘i Teacher Induction Center will work with HIDOE state offices (i.e., the Office of Hawaiian Education, the Community Engagement Office, and the Office of Curriculum, Instruction and Student Support) to establish processes to collaboratively develop cultural induction professional development. The aim of the professional development is to raise cultural awareness, identify available resources and share culturally responsive instructional strategies, interventions and inclusive practices to reach all students.

**Advancement for Teachers, Principals, and Other School Leaders**

HIDOE also encourages teachers to be teacher-leaders and serve as mentors, advocates, and change agents. Teacher-leaders may participate in the Teacher Leader Academy for job-embedded professional development which includes organizational change and strategies to improve professional practice.

Increasing the academic achievement of all Hawai‘i’s students is not possible without great leadership. HIDOE recognizes the importance of shared and effective leadership at all levels. Several partners support a continuum of leadership development, reflecting the shared leadership model promoted by HIDOE’s Leadership Institute which is housed within HIDOE’s Office of Human Resources. The Leadership Institute, which was established in 2013, is committed to developing Leadership Competencies for leaders throughout all levels of the state’s education system which reflect our Nā Hopena A‘o values and ensure that our leaders have high expectations, focus on equity, and display cultural understanding. Competencies include:

1. Achievement Focus,
2. Instructional (System Support*) and Learning Leadership,
3. Family and Community (Stakeholder*) Engagement,
4. Talent Development,
5. Reflection and Integrity,
6. Communication and Relationships,
7. Change Leadership, and

*Competencies adjusted to meet State Office Leader needs.

The Leadership Institute was established in 2013 to develop leadership capacity system-wide, preparing leaders to implement systemic change and transform schools to secure the futures of the children we serve. The Leadership Institute developed the Leadership Competencies with input from all leadership role groups. The Competencies are used as the foundation for all of its programs and supports. The Leadership Institute offers a series of aligned leadership academies, networks, and certification for administrators which
leverage existing structures to enable deep reflection and continuous learning for HIDOE leaders. Programs include the Hawai‘i Certification Institute for School Leaders, Hawai‘i Teacher Induction Center, the Teacher Leader Academy as well as the two-year New Principal Academy, the quarterly Secondary Principals Forum, Principal Collaborative Networks on Oahu and Maui, the newly formed Hawai‘i Innovative Leaders Network, and the recently created State Office Leadership Academy for state-level educational officers.

The Leadership Institute also provides support for Complex Area Superintendents and educational officers. Each Complex Area Superintendent has a coach and participates in the Academic Leadership Team, which focuses on best practices and strategies for success as education leaders.

The Leadership Institute leads the Academic Reflection Team, formerly known as the Academic Review Team. The Academic Reflection Team focuses on shared leadership at the school level and school leader improvement processes at the state, complex area, and school level. The Academic Reflection Team provides complex areas and schools with a means to analyze the effectiveness of the strategies implemented to increase student achievement and success in the schools through data analyses – both quantitative and qualitative – and focus on school leadership and improvement through reflection.

All of the programs and services under the Leadership Institute aim to develop and grow employees to support student success and continuous improvement [HIDOE/BOE Strategic Plan, Goal 2, Objective 1]. The following guiding principles drive the work of the Leadership Institute:

- **Focused and Targeted** – Learning opportunities are designed to enable leaders to effectively implement strategies that have the greatest impact on student outcomes.

- **Relevant and Timely** – All programs directly support the success of students and staff by providing timely, role-relevant, and differentiated development that makes the work of leadership more effective, easy and enjoyable.

- **Proactive and Systemic** – The Leadership Institute proactively builds a system of leadership support and a capacity-building culture throughout HIDOE – in schools, Complex Areas, and state offices.

- **Active and Experiential** – Development activities reflect effective adult learning practices and are problem-based, job-embedded, and, wherever possible, integrated into the systems and facilities within which the work is done.

- **Coaching and Support Networks** – On-the-job coaching, professional learning communities, learning networks, and support systems are integrated into formal development programs and ongoing supports.

- **Continuous, Organization-Wide Learning** – All HIDOE employees are engaged in developing their leadership potential at every stage of their leadership career.
Professional Development

HIDOE has a tri-level approach to providing focused, ongoing and sustained professional development to support the professional growth, improvement, and advancement of teachers. Professional development activities related to curriculum and instruction are offered at the state, complex area, and school levels with the purpose ranging from the implementation of statewide initiatives to addressing school-specific needs. HIDOE provides ongoing professional development on the data teams process, formative instruction, comprehensive student support systems, and academic standards implementation to facilitate a system-wide effort in increasing student achievement and improving classroom and school practices in all schools.

The Office of Curriculum, Instruction and Student Support will use Title II, Part A funds to provide state-level support to complex areas and schools in their efforts to build educator capacity to improve the academic achievement of all students. Content experts at the Office of Curriculum, Instruction and Student Support will design, lead, and implement the relevant strategies and programs that focus on increasing equitable access to a rigorous well-rounded education. The Office of Curriculum, Instruction and Student Support provides professional development focused on the implementation of the standards, curriculum, instructional strategies, and tiered student supports. Content specialists are the subject matter experts in their area and will work with teachers in their discipline to address content specific concerns, professional development needs and to share powerful instructional strategies that are evidence- and research-based.

The state support system provides the structure to build the capacity of complex areas to provide relevant services to schools. In the past, the Complex Area Support Team (CAST) was formed to create systems, structures and processes focused on preparing students for college, career and community. For the past four years, the CAST design was based on six priority areas that would be the focus of state, complex area and school improvement efforts. These priority areas, which have been systematized into school practices, included implementing:

- Hawai‘i Common Core State Standards in English Language Arts and Mathematics,
- Formative instructional practices and data teams to foster collaboration among teachers,
- Response-to-Intervention programs within our comprehensive student support system,
- Academic Review Teams to analyze data and systematize the Plan-Do-Check-Act (PDCA) process,
- A systemic induction and mentoring program for beginning teachers, and
- An Educator Effectiveness System focused on improving student learning.

The statewide focus on priority strategies provided common expectations and language
about curriculum, instruction, student support and school improvement. Schools will continue to use practices from these priority strategies which are being systematized into school practices. Based on their needs, schools and complex areas can choose to further emphasize these strategies as priority activities or rely on the developed practices as a foundation for school improvement.

With the implementation of the updated HIDOE/BOE Strategic Plan, the redesigned Professional Learning Networks will support four areas of the HIDOE/BOE Strategic Plan. These networks will focus on:

1. Whole Child: Social-Emotional Learning,
2. Well-Rounded Curriculum: Evidence-Based Practices,
3. Transitions: 9th-Grade On-Track, and

Built upon the successful structure of the CAST, these networks will:

- Create a shared focus,
- Create better instructional supports for all students,
- Model better professional learning supports for educators, and
- Build the capacity within the state to address evolving initiatives.

These networks will offer information, build capacity, and provide opportunity for educators in complex areas and schools to continuously improve the performance of their coordinated roles to facilitate staff and student success.

Schools and complexes have the flexibility to select the professional development opportunities that best meet their need. Complex Area Superintendents are responsible for supporting their principals and ensuring schools are taking the steps necessary to meet the needs of their students. Thus, Complex Area Superintendents monitor school data and regularly discuss with their principals the progress being made at their respective schools to identify the areas of need that could be addressed by the complex area support staff as well as to uncover best practices that could be shared complex-wide.

HIDOE will use funds to provide professional development for Kaiapuni teachers in the subject areas taught as well as for the development of the Hawaiian language and cultural perspective. Hawai‘i is unique in that its state law allows for the establishment of Hawaiian medium schools within the public school system. In Ka Papahana Kaiapuni, HIDOE’s Hawaiian language immersion program, students are taught using the Hawaiian language and perspectives. One of the challenges of these schools in ensuring teachers are qualified and competent to teach is the fact that not only do teachers need to be knowledgeable in the subject area taught, but they also need to be fluent in the Hawaiian language. To encourage individuals fluent in the Hawaiian language to teach, the Hawai‘i Teacher Standards Board and the Office of Hawaiian Education establish a Hawaiian
Permit, a special permit issued to potential teachers fluent in the Hawaiian language to provide instruction in Ka Papahana Kaiapuni.

In addition to providing professional development and supports for teachers and school leaders to increase student achievement, HIDOE will use Title II, Part A funds to provide professional development and support for the Educational Assistants who assist teachers in the classroom. Educational assistants supplement classroom instruction by providing one-to-one and small group supports for students who need additional help and should receive the supports necessary for them to better assist teachers in elevating student learning.

At the state level, the Office of Human Resources monitors the use of Title II, Part A funds while the Monitoring and Compliance Office monitors our compliance with the statute.

2. Use of Funds to Improve Equitable Access to Teachers in Title I, Part A Schools (ESEA section 2101(d)(2)(E))

Ensuring that every student has a caring, prepared teacher for every class begins with attracting, hiring, and assigning teachers in a timely manner to fulfill educational programs at every school. Some schools and students are disproportionately affected by vacancies, which impacts HIDOE’s ability to ensure equitable resources in education for all students across the state. Recognizing that there are teacher shortages, state offices, complex areas, and schools endeavor to ensure that the most vulnerable students are taught by a highly-qualified teacher [HIDOE/BOE Strategic Plan, Goal 2, Objective 2].

HIDOE is considering using an optional reservation of up to 5 percent of Title I, Part A funds for Financial Incentives and Rewards for teachers serving in schools with the most struggling students or student subgroups (identified for ESSA’s Comprehensive Support and Improvement or Targeted Support and Improvement). This program could provide opportunities to experiment with new teacher recruitment strategies such as loan forgiveness, grow-your-own strategies, housing allowances or offering teacher candidates with Bachelor’s degrees the opportunity to substitute and gain experience in our more challenged schools. Many financial incentives would require agreement from the teachers’ union, but innovating to recruit teachers for hard-to-staff schools is a shared priority.

Hawai‘i’s Equitable Access to Excellent Educators plan, which was submitted in November 2015, identifies the three most likely causes for the disproportionality of teacher distribution: the location of schools with higher rates of out-of-field and inexperienced teachers, the shortage of qualified teachers, and teacher turnover. HIDOE will use Title II, Part A funds to improve equitable access to effective teachers by addressing the causes of disproportionality. Activities will include increasing targeted recruitment and grow-your-own within high-needs schools’ communities, induction and mentoring, and professional development. Table D.3 outlines the strategies HIDOE will use to address the causes of disproportionality.
Table D.3. Causes of Disproportionality

<table>
<thead>
<tr>
<th>Likely Causes of Most Significant Differences in Rates</th>
<th>Strategies</th>
</tr>
</thead>
</table>
| Distant location of high-needs schools                 | ● Increase efforts to recruit teacher candidates who reside in the communities in which the high-needs schools are located  
● Increase grow-your-own efforts to develop local students into teacher candidates through partnerships with local educator preparation programs, high school career pathway programs, and Hawai‘i Teachers Standards Board |
| Teacher shortage                                       | ● Increase out-of-state recruitment efforts and included school principals in such efforts, giving priority to principals of high-needs schools  
● Implement targeted efforts to recruit educators for specialized assignments and high-demand skills and abilities (e.g., special education, EL, mathematics, science) |
| High teacher turnover                                  | ● Strengthen and expand the induction and mentoring program to improve supports for novice teachers and their mentors, especially in high-needs schools  
● Provide support for all teachers to be qualified in their assigned content area  
● Provide support for all teachers to address the diverse needs of their students (e.g., poverty, language development, special needs, homelessness) |

3. System of Certification and Licensing (ESEA section 2101(d)(2)(B)): Describe the State’s system of certification and licensing of teachers, principals, or other school leaders.

The HIDOE is committed to ensuring that we have a pipeline of high quality, effective teachers, principals, and educational leaders at all levels within our organization. To achieve this, under state law, we require teachers to be licensed to teach by the Hawai‘i Teachers Standards Board (HTSB) as a requirement for employment with HIDOE. Principals and other school leaders are required to meet HIDOE leadership certification requirements.

In addition to meeting minimum employment requirements to ensure equity and excellence for all students, who are ready for career, college, and community, teachers once employed in the HIDOE must be either HTSB-licensed or state-certified in all subject areas they are assigned to teach.

Teacher Licensure

In 1995, the Hawai‘i State Legislature created the Hawai‘i Teacher Standards Board (HTSB), an entity independent from HIDOE, to set licensing standards for Hawai‘i public school teachers. Teachers are required to meet these standards to become licensed in Hawai‘i and teachers must hold a valid teacher license issued by HTSB to be employed in a Hawai‘i public school. HTSB issues standard, provisional, and advanced licenses; Career and Technical Education special permits; emergency hire permits; and the new Hawaiian
permit for potential teachers for Ka Papahana Kaiapuni, the Hawaiian language immersion program.

Relicensing rules require teachers to renew their license every five years. HIDOE teachers must receive an “Effective” or better performance rating on their teacher evaluation and must have verification of successful teaching experience in the last five years to be eligible for license renewal. Teachers must also have evidence to verify they have met the Hawai‘i Teacher Performance Standards, which describe what teachers should know and do to ensure student learning within the classroom and beyond.

Teacher Certification

HIDOE provides licensed teachers who are assigned to teach in subject areas outside of their Hawai‘i teacher license subject area with multiple pathways to demonstrate subject matter competence in other content areas by certifying those who meet the following criteria as qualified to teach the subject area:

1. Holds a valid Hawai‘i teaching license,
2. Is assigned within grade level of license or permit, and
3. Demonstrates subject matter competence through one of the following content-specific methods:
   - Passing scores on Praxis II or other content examination deemed equivalent,
   - College major or equivalent in the content area (30 credits),
   - National Board certification in the content area,
   - Completion of a HIDOE Subject Rubric (for teachers with an “Effective” or better performance rating on their teacher evaluation), or
   - NCLB Highly Qualified Teacher Certificate.

This approach offers teachers multiple ways to demonstrate subject matter competence. This is especially important for teachers in non-“core” subjects since ESSA extends demonstration of content-area preparation from core subjects to all subjects.

Teachers will be encouraged to seek a state certificate in multiple subjects. By offering educators the opportunity to be certified in additional subject areas, HIDOE better ensures students’ progress towards becoming ready for career, college, and community by having a teacher who is qualified and competent in the subject area they are assigned to teach.

Certification of School Leaders

Given the isolation of our state and our unique statewide education system, HIDOE has a long history of cultivating its own school leaders. HIDOE’s Professional Development and Educational Research Institute (PDERI) is responsible for the school leadership pipeline to ensure each school is led by highly qualified and highly effective administrators.

Currently, PDERI administers the Hawai‘i Certification Institute for School Leaders program, certifying all school-level principals and vice principals. The program has
expanded over the years and provides a unique blend of university course work, a yearlong residency in a vice principal position, mentoring by a sitting principal, and coaching by a program specialist. The program is generally two years long and delivered in two phases: Phase I focuses on leadership foundations and technical knowledge needed to be an effective vice principal and Phase II focuses on preparing candidates for principalship. During Phase I and II, vice principals participate in professional learning communities to discuss topics relevant to school leadership and to learn about best practices from veteran school administrators.

HIDOE has a strong culture of care and nurturing of its aspiring leaders. During the two-week intensive Summer Institute, experienced principals volunteer their time to teach and assess candidates. Throughout the school year, principals continue to teach and assess as they serve as mentors and coaches. They view this as an opportunity to give to an aspiring leader what they received when they were training.

4. **Improving Skills of Educators (ESEA section 2101(d)(2)(J))**: Describe how the SEA will improve the skills of teachers, principals, or other school leaders in order to enable them to identify students with specific learning needs, particularly children with disabilities, English learners, students who are gifted and talented, and students with low literacy levels, and provide instruction based on the needs of such students.

Hawai`i understands the importance of addressing the specific learning needs of our students to increase student achievement and ensure all students are on the path toward success in college, career, and citizenship. HIDOE has various mechanisms in place to identify students with specific learning needs. Data systems such as eCSSS (the electronic Comprehensive Student Support System) and the Longitudinal Data System provide data on students that identify the students who are at risk, either academically or behaviorally, of not being successful in school. The Early Warning System of eCSSS informs schools of the students who are at-risk based on statewide assessments (SBA, KAEO, and HSA), grades, attendance, and behavior. Schools also have processes, such as team meeting times and peer reviews, in place for teachers, counselors, and school administrators to discuss students who are struggling or excelling to determine if the students have needs that need to be addressed.

HIDOE has also established a comprehensive student support system to identify students with specific learning needs. Schools use a universal screener as an assessment tool to identify students who need academic support. The eCSSS system houses the universal screener data so schools can triangulate data and plan, deliver and monitor supports. Once schools have identified students with specific learning needs, teachers utilize the appropriate instructional practices to meet these learning needs. Schools have implemented programs such as Response to Intervention (RTI), AVID, special education, and the English learner program to provide the academic support students need to successfully meet Hawai`i’s academic standards. The intent is to enhance existing structures and programs and deepen teachers’ understanding of the needs of the students identified as needing additional supports.
The Office of Curriculum, Instruction and Student Support provides state-level support to complex areas and schools in their efforts to build educator capacity to improve the academic achievement of all students. The content and program specialists (such as the specialists with Special Education, the English Learner Program, or the gifted and talented program) will offer opportunities to increase the knowledge and skills of complex area and school staff members in identifying students with specific learning needs and providing appropriate instruction based on the needs of such students. These specialists will design, lead, and implement the relevant strategies and programs that focus on increasing equitable access to a rigorous well-rounded education. For example, ELA, mathematics and science specialists have collaborated with our English Learner and Special Education staff to sponsor content-specific professional development opportunities focused on the needs of the subgroup learners. HIDOE will utilize evidence-based strategies on effective processes that address the diverse needs of the subgroups, such as the Standards Implementation Process Model, data teams, differentiated instruction, and universal learning design.

The Office of Curriculum, Instruction and Student Support provides professional development focused on the implementation of the standards, curriculum, instructional strategies, and tiered supports for all students to ensure our educators are able to support student success and continuous improvement.

5. **Data and Consultation (ESEA section 2101(d)(2)(K))**: Describe how the State will use data and ongoing consultation as described in ESEA section 2101(d)(3) to continually update and improve the activities supported under Title II, Part A.

Hawai‘i strives to ensure our schools have a high-performing culture where employees have the training, support, and professional development to contribute effectively to student success [HIDOE/BOE Strategic Plan, Goal 2]. HIDOE has implemented the use of data teams and the Academic Reflection Team (formerly Academic Review Team) at all three levels of our public education system – school, complex, and state – to facilitate data-driven decision-making processes and to monitor the implementation of state and complex area initiatives. HIDOE will continue to utilize the Plan-Do-Check-Act (PDCA) framework, which has been consistently reinforced and utilized in the Academic Review Team process and the Data Teams cycle, integral parts of HIDOE’s efforts to increase data-driven decision-making system-wide.

This PDCA model embodies the federal model of implementation and has been a working model for the implementation in previous efforts through Race to the Top and the ESEA Flexibility Waiver (Figure D.1). With further emphasis on data to inform and identify needs and the added implementation of evidence-based intervention strategies in all areas, schools, complexes and HIDOE state offices are provided with the flexibility to innovate and create a system designed to meet their specific needs. Performance monitoring to examine and reflect upon the effectiveness of interventions is critical to determine whether work is continued or modified. An important component of this monitoring has been the emphasis on “Bright Spots” to help schools and complexes learn and share what has worked in light of a response to a particular need. In Switch, Chip and Dan Heath state,
“These flashes of success—these bright spots—can illuminate the road map for action and spark the hope that change is possible.” This sharing has been critical in community-building and firmly establishing the PDCA process.

**Figure D.1. Plan-Do-Check-Act Model**

At the state level, HIDOE’s Professional Learning Networks allow the Office of Curriculum, Instruction and Student Support and the Office of Human Resources to obtain feedback on the state initiatives implemented and professional development conducted throughout the year. The Professional Learning Networks meet monthly to discuss progress made with the implementation of state initiatives and to analyze complex area data to determine the effectiveness of the initiatives implemented. The complex area educational officers who participate in the Professional Learning Networks serve as the liaison between the schools and the state and bring to the state’s attention the types of professional development that are needed at their schools to ensure staff success.

The complex areas meet with school administrators regularly as a complex Academic Reflection Team to discuss the implementation of state and complex area initiatives and analyze student outcome data at the school level. Schools share with complex area leadership their successes and challenges so that complex area leadership can determine what types of professional development are needed to increase student achievement and to support the successful implementation of the state and complex area initiatives.

Schools also have Academic Reflection Teams that meet to discuss implementation of state and complex area initiatives and the outcomes of the implementation. Schools utilize data teams of teachers to analyze student outcomes to measure the success of the programs being implemented and to identify their professional development needs.

By examining the data and reflecting on the outcomes at all three levels of our education system, HIDOE is able to make better decisions on what professional development needs to be provided and what initiatives would better ensure staff and student success.
6. **Teacher Preparation** (*ESEA section 2101(d)(2)(M)*): Describe the actions the State may take to improve preparation programs and strengthen support for teachers, principals, or other school leaders based on the needs of the State, as identified by the SEA.

Hawai`i believes all students deserve teachers who are effective, empathetic, and innovative. Thus, HIDOE is committed to ensuring that all students have a teacher who is qualified and competent in the subject area they are assigned to teach. HIDOE will continue to work with local educator preparation programs through its participation in the Teacher Education Coordinating Committee, consisting of representatives from HIDOE, the Hawai‘i Teacher Standards Board, Hawai‘i P-20 Partnerships for Education, and state-approved teacher education programs to increase the pool of qualified teacher candidates and will continue to build upon and strengthen the supports offered to teachers and school leaders.

HIDOE will increase professional development activities and expand the activities to include all teachers, not just the program teachers, to better support educators who work with our special populations of students, such as our English learners, children with disability, and economically disadvantaged students. HIDOE will also increase training on mentoring and coaching to build capacity at the school level so more mentors and coaches will be available for our teachers and school administrators.

The offices within HIDOE will collaborate more closely to align our supports for our educators so that the supports are provided in a more efficient and effective manner. For example, the Office of Curriculum, Instruction and Student Supports could work with the Office of Hawaiian Education to provide Kaiapuni teachers with professional development on subject content and the Office of Hawaiian Education could provide professional development on how to contextualize the content to make it more relevant to our students to increase student engagement. By working as a comprehensive system with partners who are invested in our public education system, Hawai‘i will be able to increase efficiency and transparency of instructional supports to promote student learning [HIDOE/BOE Strategic Plan, Goal 3, Objective 3].
E. Title III, Part A, Subpart 1: English Language Acquisition and Language Enhancement

1. Entrance and Exit Procedures (ESEA section 3113(b)(2)): Describe how the SEA will establish and implement, with timely and meaningful consultation with LEAs representing the geographic diversity of the State, standardized, statewide entrance and exit procedures, including an assurance that all students who may be English learners are assessed for such status within 30 days of enrollment in a school in the State.

To ensure all students are on the path toward success in college, career, and citizenship, students must be given the means to transition successfully throughout their educational experiences [HIDOE/BOE Strategic Plan, Goal 1]. Hawai‘i is a multicultural state where no one ethnic group is a majority. In SY 2016-17, 12,924 (7%) of HIDOE students were identified as English learners, with the five most common languages spoken being Ilocano, Chuukese, Tagalog, Marshallese, and Spanish. Hawai‘i views the students’ home languages and cultures as assets, as affirmed by its multi-lingual education policy (Board Policy 105-14).

Hawai‘i’s English Language Learner (ELL) Program provides the supports necessary to ensure English learners have access to educational opportunities to achieve English language proficiency and meet the challenging state academic content and performance standards all students are expected to meet. The ELL program supports students from identification as an English learner to monitoring after the English learner has achieved English language proficiency and exited the program.

As a unitary SEA and LEA, Hawai‘i has a long-standing practice of uniform statewide entrance and exit procedures. When students enter Hawai‘i’s schools and the home, first, or most used language listed on their HIDOE enrollment form is not English, the school assesses the students’ English language proficiency. HIDOE requires that all potential English learners be screened using the WIDA Screener (grades 1-12) or the WIDA-ACCESS Placement Test (kindergarten) to determine placement in the ELL program within 30 days of enrollment or request for assessment. If a potential English learner scores below a minimum Overall Proficiency Level score of 5.0, which HIDOE has set as the criteria for exiting the ELL program, the student must be provided ELL program services. Only the overall WIDA Screener English language proficiency score of less than 5.0 is used to determine eligibility.

To further assess a potential English learner’s low performance on the screener, a bilingual school-home assistant or other trained staff fluent in the students’ home language interviews the potential English learner in the home language. Students who are unable to demonstrate basic skills in their home language and in English are sometimes referred for special education screening.

Based on these assessment results, students may be identified for support in the ELL program. The ELL program is designed for students to achieve English proficiency – sufficient to exit the ELL program – within a target of five years or less based on their initial assessment of English proficiency. Students’ progress in acquiring English
proficiency and in making academic progress are also formatively assessed by classroom teachers and annually through statewide assessments (e.g., SBA) that determine progress and identify students’ needs.

To exit the EL program, an ELL student must score a minimum Overall Proficiency Level score of 5.0 on the WIDA ACCESS 2.0 assessment, which is administered annually to all ELL students from kindergarten through grade 12. HIDOE has increased the minimum Overall Proficiency Level score from 4.8 to 5.0 beginning School Year 2017-18 due to concerns regarding students being exited before they are truly able to succeed in the academic setting without program supports. To ensure English learners are able to transition throughout their educational experience successfully, we need to be sure our students no longer need program supports when they exit our ELL program. The decision to increase the minimum Overall Proficiency Level score has been discussed with the WIDA Consortium Research Department and state-level, complex area-level, and school-level ELL service providers. The HIDOE’s ELL program exit criteria do not include performance on the annual statewide assessments for language arts and mathematics. However, HIDOE did use data from the ACCESS 2.0 English language proficiency results and the SBA mathematics and language arts results for our English learners to determine the zone of appropriate English language skill based on ACCESS 2.0 results needed to be able to be proficient on statewide content assessments. Thereafter, the decision was made to set the exit criteria at 5.0, taking the needs of high school students, who need both more depth and breadth of academic language, into special consideration. HIDOE does not include any data in addition to the ACCESS 2.0 score as part of the ELL program exit criteria.

The HIDOE entrance and exit criteria are consistent with federal civil rights obligations. Schools monitor students’ progress for two years after the students have exited the ELL program to ensure students are successful in the classroom.

2. **SEA Support for English Learner Progress (ESEA section 3113(b)(6))**: Describe how the SEA will assist eligible entities in meeting:
   
i. The State-designed long-term goals established under ESEA section 1111(c)(4)(A)(ii), including measurements of interim progress towards meeting such goals, based on the State’s English language proficiency assessments under ESEA section 1111(b)(2)(G); and
   
ii. The challenging State academic standards.

Hawai’i’s English Language Learner (ELL) program goals are to ensure students with limited English proficiency have access to educational opportunities to attain English language proficiency, develop high levels of academic attainment in English, and meet challenging academic content and achievement standards all students are expected to meet. Services to ELL program students include instructional services consisting of English as a Second Language instruction and acculturation activities. The program supports HIDOE’s mission to provide standards-based education through
supplementary instructional and acculturation activities.

Addressing State Academic Standards Using WIDA Standards

The WIDA English Language Development Standards were adopted by HIDOE and approved by the BOE on May 21, 2009. The WIDA English Language Development Standards are aligned with the Hawai‘i Common Core Standards, Hawai‘i Content and Performance Standards, and Next Generation Science Standards; help to guide English language development and instruction for English learners; and present a framework for addressing the needs of English learners with a particular focus on the language of the content areas. The WIDA English Language Development Standards also serve as the basis for the summative annual English language proficiency assessment, the ACCESS for ELLs 2.0, to determine whether a student is making progress towards or has achieved English language proficiency.

HIDOE ELL Program Strategies to Address Academic Standards

ELL program strategies range from providing or securing English language development training, onsite observations, and needs assessments based on complex area staff and participant feedback. Strategies also include the following:

1. Provide online English language development professional development webinars for educators with a focus on the English Language Development Standards and how to integrate language and content instruction.
   - The following Series of Webinars have been created:
     - Introduction to English Language Development Standards
     - Academic Language Series: Language Arts
     - Academic Language Series: Math
     - Academic Language Series: Science
     - Academic Language Series: Social Studies
     - Academic Language Series: Social and Instructional

2. Expand and integrate professional development options via content areas to include English language acquisition strategies to better address the academic language development needs of students across programs (e.g., English Language Arts, Mathematics, Social Studies, Next Generation Science Standards).
   - In collaboration with the ELL Program, content specialists are reframing and integrating content area professional development for educators tailored to address the needs of English learners.
● The ELL Program continues to emphasize a team approach to its training sessions to allow for the EL Program staff to learn, plan and articulate about how to best address EL needs.

3. Collaborate with Institutes of Higher Education to facilitate development of professional development pathways to ELL licensure using teaching standards such as Teaching English to Speakers of Other Languages (TESOL), National Council for Accreditation of Teacher Education (NCATE), and Interstate Teacher Assessment and Support Consortium (InTASC) model core teaching standards as a guide to support ELL professional development options for in-service and pre-service teachers. As a byproduct, this articulation will help ensure there is greater alignment in what is taught to pre-service teachers and help ensure teachers are better prepared to meet the needs of Hawai’i’s diverse English learner population.

Hawai’i will provide supports and services to assist the complex areas and schools in ensuring all English learners meet the ELL program goals and HIDOE/BOE Strategic Plan targets. The following steps outline HIDOE’s plans to assist complex areas and schools.

1. **Conduct Ongoing Needs Assessment**: The state identifies English learner needs based on school outcomes over time (outcomes and growth over time on English language progress and proficiency as well as content assessment proficiency rates, graduation rates, and retention rates.). This is done through desktop monitoring and onsite visits in collaboration with the complex area. HIDOE has also been developing online data capacity to monitor school results.

2. **Provide Support to Complex Areas and Schools**: Based on identified needs, the ELL state program staff collaborates with the complex areas to provide:

   a. Guidance around federal and legal requirements of the ELL Program to address Core English Learner Program needs;

   b. Technical assistance with regard to implementation of federal guidance, both Core English Learner Program and Title III Language Instruction Education Programs that enhance and enrich the Core English Learner Programs.

   c. Title III funding to support the following activities:

      i. Language Instruction Education Programs that supplement the Core English Learner Program

      ii. Professional development to support teachers, both ELL and
content teachers, around English Language Development

iii. Parent Engagement Activities

iv. Extended Learning Opportunities for students beyond the school day (e.g., after school, during the intersession, and during the summer)

v. English Language Development software to support students in ELOs and enrich the core English Learner Programs

vi. Build teacher leader and administrator capacity, which includes complex area ELL staff and school-level ELL coordinators.

3. **Evaluate Supports Provided:** Conduct evaluations focused on ELL supports which including complex area, administrator and teacher feedback; student academic performance; and English Language Proficiency data and growth. Qualitative and quantitative data will be reviewed, as appropriate, at the state, complex area, and school level.

4. **Adjust, Change, or Improve Programs:** If any of the supports provided by the state are not helping, adjustments will be made to more appropriately support the complex areas and schools in need. HIDOE also works in partnership with various entities to build capacity at every level – state, complex area, and school – to ensure program success. Examples include collaboration and partnerships with Institutes of Higher Education and Pacific Resources for Education and Learning and consultation with the WIDA Consortium to identify more effective strategies to facilitate staff and student success.

HIDOE’s ELL program administrators and resource teachers at the state level will ensure ELL program administrators and resource teachers at the complex area level and ELL coordinators and teachers at the school level have the training, support, and professional development necessary to contribute to the success of our English learners [HIDOE/BOE Strategic Plan, Goal 2].

3. **Monitoring and Technical Assistance (ESEA section 3113(b)(8))**: Describe:

   i. How the SEA will monitor the progress of each eligible entity receiving a Title III, Part A subgrant in helping English learners achieve English proficiency; and

   ii. The steps the SEA will take to further assist eligible entities if the strategies funded under Title III, Part A are not effective, such as providing technical assistance and modifying such strategies.

The state ELL program staff in the Office of Curriculum, Instruction and
Student Support meets monthly with Title III Administrative Sub-Units (complex areas) and also interacts with the complex area ELL staff throughout each month to monitor the progress on school ELL programs. Through these monthly interactions, the state ELL program is able to obtain formative data on how complex areas and schools are performing.

HIDOE also conducts desk monitoring through the electronic submission of monitoring documents and fiscal expenditures to manage the complex area and school use of Title III, Part A funds and monitor the progress schools are making towards increasing the percentage of students on track to English language proficiency. HIDOE is also considering the creation of teams from across complex areas to pair with the state ELL staff to learn from and with each other, targeting not only struggling schools, but also schools who have positive English learner data and trends to serve as success models.

The state ELL program staff further monitors schools’ English language proficiency rates, annual statewide assessment proficiency rates, and other student data including but not limited to student grades, retention rates, graduation rates, and chronic absenteeism rates. HIDOE has built the infrastructure to provide training for schools to access and be able to review student data in the aggregate form as well as down to student level. HIDOE will continue to expand the functionality of our electronic database systems, such as our Longitudinal Data System and electronic Comprehensive Student Support System, to better capture and use data at every level and make student data available online and in a timely manner to complex areas and schools. The accessibility to data will help complex areas and schools make more effective programmatic decisions to better support their English learners.

To assist complex areas and schools who are struggling to meet the state ELL goals, state ELL program staff provides system-wide support based on federal guidance, legislation, and judicial precedence. State ELL program staff and complex area ELL staff work collaboratively to identify and provide needed technical assistance and strategy modification to these schools. Supports range from securing training, onsite observations, and needs assessments for the complex area, school, and classroom.

Currently, supports are tailored and based on expressed complex area and/or state identified needs with the state ELL program providing system-wide guidance on what elements must be included in their ELL and Title III Programs.

The state ELL program will continue to provide technical assistance and multiple supports to complex areas through the roll-out of English Language Proficiency Standards. Technical assistance and supports include the following:
● Collaboration with core content specialists and other federal programs within the Office of Curriculum, Instruction and Student Supports to ensure English learner needs are being addressed in all courses as well as in other programs, such as special education, as applicable;

● Online programs such as Imagine Learning English, which supplements classroom learning through an online literacy curriculum designed to enrich language acquisition, and the e-Learning Series, developed by HIDOE and WIDA, which builds awareness of the needs of English learners;

● Professional development activities in collaboration with WIDA, such as webinars on standards implementation and instructional strategies and in-person professional learning community activities;

● Supports from the state ELL staff and external partners, such as the University of Hawai‘i and Hawai‘i P-20, who have collaborated with HIDOE for the Asian American and Pacific Islander data disaggregation grant, which Hawai‘i has used to focus on providing ELL educators at the state, complex area, and school levels with actionable information to better understand and close achievement and opportunity gaps between English learners and English-speaking students; and

● Targeted support for English learners at the secondary school level through a collaboration with the Pacific Regional Comprehensive Center.

ELL staff at the state level will work collaboratively with the complex areas and schools to ensure the needs of our English learners are met so they may fully engage in high-quality educational opportunities available to them. Thus, the ELL staff at the state level will need to ensure that the ELL staff at the complex area and school level has the means to support student success and support continuous improvement. To further ensure student success, the Office of Curriculum, Instruction and Student Support’s ELL program will prioritize professional development for all educators and school and complex area administrators to increase the knowledge, understanding, and ability to use inclusive practices and multi-tiered supports with our English learners, who would benefit from the use of diverse instructional methods.
F. Title IV, Part A: Student Support and Academic Enrichment Grants

1. **Use of Funds** (*ESEA section 4103(c)(2)(A)*): Describe how the SEA will use funds received under Title IV, Part A, Subpart 1 for State-level activities.

Hawai‘i is considering transferring Title IV, Part A, Subpart 1 funds to Title II, Part A to further advance Title II initiatives aimed at promoting a “high-performing culture where employees have the training, support, and professional development to contribute effectively to student success” [HIDOE/BOE Strategic Plan, Goal 2]. The purpose of Title IV, Part A, Subpart 1 is to improve our students’ academic achievement by increasing the capacity of the state, schools, and local communities to—

1. Provide all students with access to a well-rounded education;

2. Improve school conditions for student learning; and

3. Improve the use of technology in order to improve the academic achievement and digital literacy of all students.

To increase the capacity of the state, complex areas, and our schools to meet these objectives, Hawai‘i will need to provide professional development focused on curriculum and instruction, managing student behavior, and the use of technology in the classroom as well as provide targeted support through induction, mentoring, and facilitated professional learning communities. We recognize that teachers, school administrators, and school support staff “are the heart of our instructional system” and we must ensure they are provided with the tools they need to be successful in order to best support our students’ needs and facilitate student success (Blueprint, pg. 19).

Hawai‘i will use Title II, Part A funds to support the HIDOE/BOE Strategic Plan’s goal of seeing all students demonstrate they are on a path toward success in college, career, and citizenship [Goal 1]. Hawai‘i’s Student Success goal, or Goal 1 of the HIDOE/BOE Strategic Plan, includes four objectives:

1. All students are empowered in their learning to set and achieve their aspirations for the future.

2. All students are safe, healthy, and supported in schools, so that they can engage fully in high-quality educational opportunities.

3. All students are offered and engage in a rigorous, well-rounded education so that students are prepared to be successful in their post-high school goals.

4. All students transition successfully throughout their educational experiences.

These objectives are closely aligned to the purpose of the Student Support and Academic Enrichment Grants. Hawai‘i knows that to increase academic achievement, we must meet the needs of the "whole child" so that our students are "empowered" to succeed in the classroom and show that they are "prepared" to successfully advance in their educational journey and "resilient" enough to overcome the challenges they face along the way.
Stakeholder input was gathered at convenings of teacher leaders and community partners, as well as from state, complex, and school administrators and staff, parents, and community members via a public comment survey. Community input confirms prioritizing school conditions for safe and nurturing learning environments. Stakeholder input also confirms an emphasis on well-rounded education across all content areas, including the arts, health education, physical education, world languages, and career and technical education. While technology use and student transitions continue to be important objectives, public input indicates that these priorities continue to be appropriately addressed.

As a unitary SEA/LEA, Hawai‘i is responsible for utilizing federal funds to improve student academic achievement across the state. In reviewing HIDOE’s data, half of our students are proficient in language arts and less than half are proficient in mathematics. Our data also shows a substantial gap between our "all students" group and our children with disabilities, English learner, economically disadvantaged student, Pacific Islander, and Native Hawaiian subgroups in proficiency as well as in graduation rates. HIDOE will use Title II, Part A funds to help close the achievement gaps while increasing academic achievement overall.

**Access to a Well-Rounded Education**

Hawai‘i strives to provide access to a well-rounded, standards-based education for all students to promote academic achievement and close the achievement gap. There has been a concerted effort to support and model interdisciplinary approaches — integrating English language arts, fine arts, math, science, and social studies — through professional development offered at the state, complex area, and school levels. For the past four years, the state has also partnered with independent schools to offer teachers and curriculum coordinators a two-week institute for thematic instruction that crosses multiple disciplines and capitalizes on students’ curiosity and interests. The Arts Integration efforts have also included posters series that were co-developed by HIDOE, the Museum of Arts, and a local private school. A poster entitled “View of Honolulu from Punchbowl” integrates skills and content from English language arts (analysis and comparison of similar themes), fine arts (visualization), science (landscape change over time), and social studies (political and economic influences on a public space). These professional development sessions and partnerships provide strategies and resources to integrate multiple content areas, expanding the emphasis on English language arts and math.

In addition, the Office of Curriculum, Instruction and Student Support has facilitated teacher work groups for English language arts, mathematics, fine arts, health, physical education, science, Science Technology Engineering Math (STEM), and social studies. These work sessions resulted in the creation of standards-aligned curricular and instructional materials. As an example, the social studies work group created Inquiry Design Model units aligned to the College, Career, and Civic Life (C3) Framework for Social Studies and practiced building collaborative civic spaces using the philosophy for children Hawai‘i (p4cHI) strategy. State program specialists have provided leadership in meeting the needs of our special education students, English learners, and other student subgroups through teaming with English language arts and science specialists. These
partnerships focus on evidence-based strategies that address the academic and language development needs of these students with the goal of ensuring equity and excellence for all students.

Moving forward, integration will continue to be one approach to ensure that a well-rounded education is accessible to all students. In promoting and supporting integrated approaches, the state, complex areas, and schools will ensure that teaching and learning is standards-based and rigorous to promote academic achievement. Leadership at each level will use stakeholder input and data to determine the priority for and appropriateness of integration of different subject areas in professional development and curriculum. Funds will be used to continue and expand on these efforts.

In addition to designing and implementing interdisciplinary units of learning, Title II, Part A funds will also be used to ensure our students are college- and career-ready by providing the means to offer educators professional development focused on programs allowing students to earn college credits while in high school, such as Advanced Placement (AP), International Baccalaureate Programme, and dual credit college courses, as well as programs aimed at building employability skills, such as the career academies and Career and Technical Education. These experiences have shown to increase the number of students that go on to college, especially economically disadvantaged students. HIDOE will ensure every student has an identified next step after high school that is aligned with their future aspirations through a personal transition plan.

HIDOE is currently collaborating with the Chamber of Commerce Hawai‘i, the Department of Labor and Industrial Relations, the Hawai‘i Carpenters Apprenticeship and Training Fund, and the University of Hawai‘i as the “Connect to Career” (C2C) coalition. This initiative prepares students for success in high-skill, in-demand careers, providing students with more opportunities to develop career-readiness in finance and banking, cybersecurity, carpentry, food manufacturing, health occupations, computer science, and construction and engineering. Partnerships with different industry leads provide mentoring, shadowing, and research experiences to both teachers and students to build students’ academic preparation for college and employability skills.

*Improve School Conditions for Student Learning*

School conditions for student learning extends beyond the “brick and mortar” of the school to its culture and sense of well-being. Goal 1, Objective 2 in the HIDOE/BOE Strategic Plan states:

> Students’ physical, social, mental, emotional and cognitive development are critical as they move from early childhood to adolescence to adulthood. Students’ well-being and health increase their readiness to learn. Students succeed when their individual needs are met and their innate gifts and abilities are nurtured.

Hawai‘i’s main strategy is to focus on the whole child through an increased attention to social-emotional learning as well as through family, community and industry partnerships. Focused on academics, health and well-being, and connection to community and place,
these partnerships aim to provide relevant learning experiences for students and remove barriers to learning.

HIDOE’s Nā Hopena A’o (HĀ) framework describes culturally-responsive outcomes for all K-12 students. These identified core values and beliefs are embedded in professional development opportunities, as well as curricular and instructional resources, designed to leverage Hawai’i’s unique culture and geography. For example, the Ethnomathematics Institute is a partnership with the University of Hawai’i at Manoa that allows teachers to experience and integrate culturally-responsive pedagogy. In addition, science professional development supports teachers in exploring Hawai’i-specific phenomena and social studies resources help students take informed action to address global and local issues.

Initiatives are in place to increase access to these learning experiences. With the premise that health is strongly linked to academic success and that academic success is linked to overall wellness, the Hawai’i Keiki partnership with the University of Hawai’i’s School of Nursing allows complex areas to provide school-based health and wraparound services. Access to immunizations, oral health care, and chronic condition management helps improve student attendance and academic performance.

Students’ belonging, learning, character, and well-being are addressed through interconnected networks of coordinated academic, instructional, and social and emotional supports. These networks provide structures and processes aimed at the building of strong, trusting and caring relationships.

*Improve the Use of Technology in Order to Improve the Academic Achievement and Digital Literacy of all Students*

Hawai’i will use Title II, Part A funds to increase the use of technology in promoting and extending learning opportunities and data analyses. Efforts are underway to provide ongoing professional development and networking to ensure educators and students are computer and digital literate. As examples, Project Inspire courses help teachers integrate technology in a standards-based curriculum and Google Apps for Education training supports teachers in applying productivity tools that enhance standards-based instructional and assessment strategies.

Reliable internet access provides our schools with the tools necessary to prepare for careers and college and helps schools achieve greater equity for all our students. Hawai’i is way ahead of the pack in delivering bandwidth to students and teachers¹⁰. Hawai’i is the only state providing 100 percent of needs in four categories: Connectivity (meeting 100 kbps per student minimum goal), Fiber (percentage of schools with fiber connections needed to meet bandwidth targets, Wi-Fi (sufficient access in all classrooms), and Affordability (maximizing bandwidth for the budget). Much of this work was completed in 2014 with the Converged Infrastructure Initiative. With optimal connectivity, teachers have access to resources, tutorials, and additional supports that could be expanded to improve the digital

¹⁰ [stateofthestates.educationsuperhighway.org](http://stateofthestates.educationsuperhighway.org); click "ranking" for comparison
literacy of our students. In order to close the achievement gap, teachers will be provided with training to use technology tools such as Google for Education and Blackboard to increase the options for students to learn, making access to standards-based education more equitable for student subgroups. For example, current online courses available to middle school students will be expanded to advanced core subjects and non-core subjects, including an orientation to online learning.

Using technology as a tool, our teachers are able to prepare our students for the increasingly complex life and work environments in the 21st century and help our students develop the skills needed to separate them from those who are not prepared. Teachers will be provided with professional development that focus on promoting creativity, critical thinking, communication and collaboration with technology to prepare students for the future.

2. **Awarding Subgrants (ESEA section 4103(c)(2)(B))**: Describe how the SEA will ensure that awards made to LEAs under Title IV, Part A, Subpart 1 are in amounts that are consistent with ESEA section 4105(a)(2).

Hawai‘i is a unitary SEA/LEA and is considering transferring Title IV, Part A, Subpart I funds to Title II, Part A. Thus, this is not applicable to Hawai‘i.
G. Title IV, Part B: 21st Century Community Learning Centers

1. Use of Funds (ESEA section 4203(a)(2)): Describe how the SEA will use funds received under the 21st Century Community Learning Centers program, including funds reserved for State-level activities.

As a unitary state-funded school system, Hawai‘i is uniquely positioned to optimally maximize and leverage the impact of its state resources in combination with federal and other dollars to support student success. The 21st Century Community Learning Centers (CCLC) program offers public schools the means to foster innovation to meet and exceed our educational goals and provide adequate resources to support school and community-based plans for student success [HIDOE/BOE Strategic Plan, Goal 3, Objectives 1 and 2]. By aligning out-of-school-time activities to national and state educational priorities, the 21st CCLC program provides Hawai‘i a valuable opportunity to engage partners in leveraging these learning spaces to progress and advance educational priorities and objectives and in fostering innovative ideas that directly translate to student success.

Based on the statewide vision that every school in Hawai‘i successfully, actively, and sustainably engages their community so every student thrives, the vision for 21st CCLC is to ensure all students have access to and participate in opportunities that span academics, health and well-being, and character and connectedness. The achievement gap trends along markers of race, ethnicity, gender, and socioeconomic status; students’ lack of access to learning opportunities during non-school hours because of these factors contributes to this gap. Hawai‘i believes that access and participation through quality out-of-school-time programs that encompass a coordinated network of strategic partnerships, combined with engaging curriculum, strong leadership, quality teaching, restorative practices, and parent and family engagement, will translate to student success in ways that will contribute to minimizing the achievement gap.

Based on an asset and needs assessment performed by schools; school and complex area academic and financial plans; and DOE strategic plan the HIDOE will align out of school programs and services funded by 21st CCLC monies, and priorities identified by these guiding documents.

Additional 21st CCLC funds provide opportunities for well-rounded and supportive educational experiences and opportunities. These funds will also be used to provide academic enrichment opportunities, such as tutorial services that assist students in meeting the challenging state academic standards, particularly students who attend low-performing schools. The 21st CCLC funds give schools and organizations the ability to offer students a broad array of additional services, programs, and activities. The funds not only assist students, but enables families the opportunity to actively and meaningfully engage in their children’s education. 21st CCLC funds currently provide a range of programs and services, including youth development activities; health and social supports; college, career, and citizenship; expanded learning opportunities; engaging instruction; and family and

---

11 “Community Schools: Transforming Struggling Schools into Thriving Schools”, February 2016.
To continue to progress towards eliminating the achievement gap, four main strategies are proposed:

1. Implement statewide program quality standards;
2. Align opportunities to school, complex area, and state priorities;
3. Improve data collection and evaluation systems that correlate participation to attendance, behavior and coursemarks; and
4. Reinvigorate PLCs to both deliver and deepen professional development.

**Awarding Subgrants (ESEA section 4203(a)(4))**: Describe the procedures and criteria the SEA will use for reviewing applications and awarding 21st Century Community Learning Centers funds to eligible entities on a competitive basis, which shall include procedures and criteria that take into consideration the likelihood that a proposed community learning center will help participating students meet the challenging State academic standards and any local academic standards.

HIDOE uses 21st CCLC funds programs that deliver high-quality services to support student learning, family engagement and development and to support the continued efforts of the 21st CCLC program to increase student achievement through a broad array of services and programs that are aligned to the State Strategic Plan and statewide initiatives.

**Request for Proposals Process**

The Community Engagement Office of HIDOE is responsible for all components of the 21st CCLC process, which includes the screening, awarding, and technical assistance of the grant. The Community Engagement Office develops the 21st CCLC Request for Proposal (RFP) and application with input from the Superintendent, other appropriate state officials and agencies administering before and after-school (or summer recess) programs and activities, the heads of the state health and mental health agencies or their designees, statewide after-school networks and representatives of teachers, complex areas, and community-based organizations. These include noted strategic partners such as Hawai‘i Afterschool Alliance, Department of Parks and Recreation, Lieutenant Governor’s office, Department of Human Services, Office of Youth Services as well as other private and not-for-profit providers and partners.

The Community Engagement Office will release the 21st CCLC RFP to non-HIDOE entities via the State Procurement website (http://spo.Hawai‘i.gov/) and the application to Complex Area Superintendents via a posted memo on the HIDOE email system. The Community Engagement Office will also email the RFP link directly to private schools that indicated their interest in applying for the 21st CCLC grant, as determined by the Annual Private School Survey.

The Community Engagement Office will also continue to work with various community organizations (e.g., Hawai‘i Excellence in Education, Hawai‘i Association of Nonprofit

---

12 Coalition for Community Schools: communityschools.org
Organizations and the Hawai‘i Afterschool Alliance) to ensure that non-HIDOE entities are provided multiple avenues to be made aware of the release of the RFP and the proceeding Bidders Conferences and provided opportunities to attend. The Community Engagement Office will provide information to all potential applicants during the Bidders Conference, which is scheduled during the release window of the RFP and application period. In addition, the Community Engagement Office provides technical assistance on addressing grant specifications during the Bidders Conference and the ongoing RFP/application process. Information discussed may include the application process and review, data collection requirements, schedule of professional development offerings including those that may be applicable for PDE3 credits (HIDOE’s professional development system), HIDOE responsibilities and expectations, and overall 21st CCLC programmatic intentions and objectives.

Employing multiple venues to advertise the release of the RFP ensures that the Community Engagement Office is providing opportunities for all eligible entities (local educational agency or community and faith-based organizations) to apply for 21st CCLC grant funds.

Screening/Peer Review

The completed applications undergo a rigorous screening process by a peer review committee of HIDOE personnel familiar with the programs and activities allowable under 21st CCLC to ensure completeness and applicant eligibility. The peer review committee members are selected based on their expertise in providing effective academic, enrichment, youth development, and related services to children. Moreover, members are unbiased, which means that they are not an applicant, or representative of an applicant, who has submitted an application for the current application period. Former peer review committees included representatives from the Lieutenant Governor’s office, state agencies such as Department of Human Services, Hawai‘i Afterschool Alliance, and Hawai‘i Excellence in Education.

Committee members undergo comprehensive training on policies and procedures for the general scoring process and the quality control procedures throughout the peer review process. This ensures consistency in scoring and, thus, creates opportunities for the selection of the awards to achieve geographic diversity, including urban and rural communities.

Peer review will focus on an evaluation of the array of school-based/school-linked services; the delivery model and data collection and evaluation procedures; the experience and knowledge of the school communities being supported; the professional development provided and partnerships; and service coordination and integration.

Awards

The HIDOE awards funds to eligible entities strictly on a competitive basis, by ranking proposals (scored by the peer review committee) from highest score to lowest score and ensures that the following overarching point is emphasized and readily evident throughout
the proposal: the likelihood that a proposed community learning center will help participating students meet the challenging State academic standards, complex area standards/initiative and state standards/initiatives.

The Community Engagement Office personnel are available to provide technical assistance/debrief to all non-selected offerors to strengthen proposals for future submissions.

Awards are granted for a period of not less than three years and not more than five years. The amounts of the awards may not be less than $50,000 and all awards will be of sufficient size and scope to support high quality, evidence-based programs.

**Priorities**

21st CCLC applications must address the following priorities:

1. Services for students who attend CSI or TSI schools or other schools determined by the complex area to be in need of intervention and support to improve student academic achievement and other outcomes.

   OR

   Services for students who may be at risk for academic failure, dropping out of school, involvement in criminal or delinquent activities, or who lack strong positive role models; and the families of those students.

2. Joint proposal by eligible entities consisting of not less than one complex area receiving funds under part A of title I and another eligible entity that demonstrates that the activities are not accessible to students; or would expand accessibility to high-quality services that may be available in the community.

3. Plan for sustainability after funding has ended and the guidance of an Advisory Council.
H. Title V, Part B, Subpart 2: Rural and Low-Income School Program

1. Outcomes and Objectives (ESEA section 5223(b)(1)): Provide information on program objectives and outcomes for activities under Title V, Part B, Subpart 2, including how the SEA will use funds to help all students meet the challenging State academic standards.

2. Technical Assistance (ESEA section 5223(b)(3)): Describe how the SEA will provide technical assistance to eligible LEAs to help such agencies implement the activities described in ESEA section 5222.

Hawai‘i currently does not participate in the Rural or Low-Income School Program.
I. Education for Homeless Children and Youth program, McKinney-Vento Homeless Assistance Act, Title VII, Subtitle B

1. Student Identification (722(g)(1)(B) of the McKinney-Vento Act): Describe the procedures the SEA will use to identify homeless children and youth in the State and to assess their needs.

Hawai‘i strives to ensure our homeless students demonstrate they are on a path toward success in college, career, and citizenship by providing these students with a caring, safe, and supportive learning environment through which they are able to transition successfully throughout their educational experiences and feel empowered in their learning to set and achieve high aspirations for their future [HIDOE/BOE Strategic Plan, Goal I].

The McKinney Vento Act guides the direction of HIDOE’s Education of Homeless Children and Youth Program (HIEHCY). HIDOE has established protocols and practices to identify homeless students and provide comparable services, including transportation, meals and enrollment assistance. Annual training and ongoing technical support are provided to guide the field to facilitate full student participation and success in school across grade levels for children experiencing homelessness.

During the 2016-17 school year, approximately 3,000 students (2%) identified themselves as experiencing unstable living situations, from “couch surfing” to living in a homeless shelter to being unsheltered. Most schools have identified at least one student who qualifies as “homeless” under McKinney-Vento criteria, but schools may have as many as 25 percent of students identified and many students are “hidden homeless” who have not identified their living situations to school officials and are not receiving supports. Of these homeless students, 74 percent are on Oahu.

Our students who are experiencing homelessness are struggling in our schools with more students chronically absent, fewer demonstrating academic proficiency, more being suspended, and more having lower grades. Chronic absenteeism and suspensions contribute to low academic performance. The root cause of these students’ challenges is multi-faceted and influenced by being homeless and otherwise unstable with regard to basic human needs.

HIEHCY staff members are currently conducting more rigorous analyses of students’ needs. Moving forward, HIDOE plans for more ambitious efforts to support our students experiencing homelessness. This begins with requesting additional state funding to increase our regionally based homeless service coordinators to full-time status to increase support for identifying students experiencing homelessness and coordinating services; a legislative budget request for full time social workers across the state has been approved. HIEHCY staff will strengthen its collaborative alliances with other state agencies and nonprofit community organizations, including coordination with the Governor’s Ohana Nui initiative and with the Governor’s coordinator on homelessness, to determine and remove barriers to identifying students as homeless and to providing necessary services so that all students are safe, healthy and supported.
Homeless students are mainly identified during the enrollment process through the annual administration of the McKinney-Vento-1 (MV1) form. The MV1 serves as verification of homeless status for meals, transportation to school of origin, and for housing support. HIDOE posts translated posters and brochures which outline the rights of homeless students in school offices and in the community and collaborates with shelters and other family-serving agencies such as Catholic Charities, Aloha United Way, Waikiki Health/Youth Outreach and Partners in Care to ensure homeless students are identified and are receiving the appropriate services. Moving forward, HIDOE is stepping up focus on identification of children ages 0-5 and unaccompanied youth by working with the Executive Office on Early Learning, Head Start, Hawai‘i Early Intervention Coordinating Council, and the state’s Homeless Management Information System.

HIDOE is coordinating a multi-level assessment of student needs, from big picture at state level, through district, complex and school. Data teams at all levels have access to newly created MVA cohort data. Data-sharing agreements with shelters, Hawai‘i’s Homeless Management Information System, Head Start, and the Hawai‘i Early Intervention Coordinating Council are being explored to move beyond self-identification and reach children who are not attending school.

2. **Dispute Resolution** *(722(g)(1)(C) of the McKinney-Vento Act)*: Describe procedures for the prompt resolution of disputes regarding the educational placement of homeless children and youth.

A dispute resolution process is defined, in writing, in the event that a parent/legal guardian disagrees with a principal’s enrollment decision. If a student’s living situation does not meet the definition of homeless under the McKinney-Vento Act and the student currently lives outside of the school community, the principal may decide to not enroll the student. If a parent initiates a dispute, the child remains at school pending a resolution. The principal consults with the Complex Area Superintendent and, if still unresolved, at the Deputy Superintendent’s level. At each level, decisions are communicated within 30 days. Moving forward, the Dispute process will be documented in the common Student Information System (SIS). In HIDOE, enrollment disputes are rare.

3. **Support for School Personnel** *(722(g)(1)(D) of the McKinney-Vento Act)*: Describe programs for school personnel (including the LEA liaisons for homeless children and youth, principals and other school leaders, attendance officers, teachers, enrollment personnel, and specialized instructional support personnel) to heighten the awareness of such school personnel of the specific needs of homeless children and youth, including runaway and homeless children and youth.

HIDOE’s central office for the Education of Homeless Children and Youth is housed in Office of Curriculum, Instruction and Student Support, within the Student Services Branch. The office is staffed by a State Coordinator and a Teacher, providing outreach, planning and training. Each of the 15 complex areas employs at least one Liaison (HCL) to assist with identification, enrollment and family outreach. HCL are under direct supervision of
A McKinney Vento 101 module is updated annually and posted online, outlining basic requirements of MVA, the unique needs of homeless students, and the state’s processes for implementation. Additional, differentiated support is provided to address current issues and updates, including student data analysis, allowable expenditures, and modification of policy to remove barriers to success for homeless students. Follow up support is triggered by request from Principal or Complex Area staff, common questions, and relevant updates. There is coordination with the Title I office to ensure effective coordination between the two programs.

4. **Access to Services (722(g)(1)(F) of the McKinney-Vento Act):** Describe procedures that ensure that:

   i. Homeless children have access to public preschool programs, administered by the SEA or LEA, as provided to other children in the State;

   ii. Homeless youth and youth separated from public schools are identified and accorded equal access to appropriate secondary education and support services, including by identifying and removing barriers that prevent youth described in this clause from receiving appropriate credit for full or partial coursework satisfactorily completed while attending a prior school, in accordance with State, local, and school policies; and

   iii. Homeless children and youth who meet the relevant eligibility criteria do not face barriers to accessing academic and extracurricular activities, including magnet school, summer school, career and technical education, advanced placement, online learning, and charter school programs, if such programs are available at the State and local levels.

**Preschool:** Information on available options will be disseminated via shelters and family-serving agencies in partnership with providers (Hawai‘i Head Start, Executive Office on Early Learning (EOEL) and the LEA administered preschools, including those dedicated to students receiving Special Ed services. Barriers to identification of eligible children are being explored with the same partners.

**Separated Youth and Credit:** As Hawai‘i is a unitary state system, students who transfer from one school to another remain in the system, and are able to complete common courses. Options for partial credit earned and online supplemental courses are currently being explored. HIDOE’s goal is to provide a menu of approved course alternatives to facilitate student support. While provision of options may prevent some students from separation, HIEHCY is exploring ways to continue providing outreach and educational support for those who ultimately leave the system, in partnership with HIDOE’s Community Schools, and shelters that serve homeless youth.

**Access to Academic and Extracurricular Activities:** Students experiencing homelessness have the same opportunities to participate in academic
activities as their housed peers. Any associated fees for participation or equipment required for experiences offered to all students may be covered with McKinney Vento funds to enable a homeless child to participate. As of SY 2017-18, Athletic Directors have been included in MV training, specifically as it relates to full participation. Barriers to extracurricular participation include lack of transportation, addressed below. As school level data teams look at homeless students individually, efforts will be made to identify interests and help students to access clubs and courses as available.

Transportation: Transportation services accorded to all eligible homeless students will extend to homeless preschoolers attending Hawai‘i’s public preschool programs.

Transportation will expand to accommodate students eligible for extracurricular activities to remove barriers to participation. Funds are allocated to provide uniforms, equipment, and associated fees.

Meals: All students identified as homeless via the MV1 and TANF (Temporary Assistance for Needy Families) are automatically eligible for free meals at school. The Community Eligibility Provision Pilot Program (CEP) captures any unidentified students in high poverty areas, as meals are provided to everyone at qualifying schools.

5. **Strategies to Address Other Problems (722(g)(1)(H) of the McKinney-Vento Act):** Provide strategies to address other problems with respect to the education of homeless children and youth, including problems resulting from enrollment delays that are caused by—
   i. requirements of immunization and other required health records;
   ii. residency requirements;
   iii. lack of birth certificates, school records, or other documentation;
   iv. guardianship issues; or
   v. uniform or dress code requirements.

Immediate Enrollment: HIDOE’s immediate enrollment policy is intended to prevent enrollment delays and retention. If a student is identified as homeless, immediate enrollment is granted. Aside from a negative TB result, no previous records are required for enrollment. If a student tests positive for TB, schoolwork is provided. If a student lacks a TB test, the Homeless Concerns Liaison and school designee work together to obtain the student’s records to ensure a smooth transition to the new school. School staff and liaisons are trained to ensure immediate enrollment of students, preventing delays and related problems. In the event that transportation is preventing TB testing or delaying the securing of records, one-way public bus passes are offered.

Hawai‘i’s status as a unitary system facilitates transfer of records due to a single student information system (SIS). Enrollment details and other records
remain with the students and are updated upon transfer of schools.

6. **Policies to Remove Barriers (722(g)(1)(I) of the McKinney-Vento Act):** Demonstrate that the SEA and LEAs in the State have developed, and shall review and revise, policies to remove barriers to the identification of homeless children and youth, and the enrollment and retention of homeless children and youth in schools in the State, including barriers to enrollment and retention due to outstanding fees or fines, or absences.

HIDOE/OCISS is committed to several strategies to make it easy for all stakeholders with homeless students in their charge to provide attention & care, and to remove barriers to full participation and success in school.

- To remove barriers to identification, enrollment and retention of homeless students, the HIEHCY is represented on several state committees, including the Hawai‘i Interagency Council on Homelessness (HICH) and Hawai‘i Early Intervention Community Council (HEICC). Ongoing communication with stakeholders facilitates identification of barriers, as well as supports collaborative removal of barriers.

- Provide ready access to localized data at district and complex. Facilitate analysis and identification of need. Collaborate with Title I, Data Governance and Analysis Branch (DGA) Branch, PIPE Branch, and others.

- Allocate funding to districts/complex areas, per pupil, with guidance on allowable use. Work with Title I, Complex Area Business Managers, and Principals to identify barriers and utilize funding to address and remove them. (Goal 3, Successful Systems of Support, Adequate and Expanded Resources, 2c).

- Supplement supports inside of school such as tutoring, 21st Century Community Learning Centers (CCLC), counseling, athletics and other extracurricular activities. Actively engage homeless students (Strategic Plan Goal 1 Student Success, Whole Child 2a-b).

- Supplement supports outside of school with educational liaisons, tutors, site licenses, equipment, and inter- and intra-agency agreements (Strategic Plan, Goal 1 Student Success, Whole Child, 2b).

- Facilitate collaboration through state level partnerships and agreements to address student identification, enrollment, attendance and success (Hawai‘i Headstart, EOEL, shelters, and Partners in Care (PIC)) (Strategic Plan, Goal 1, Student Success, Whole Child 2b-c).

- Expand the web of support around students to include educational liaisons, counselors, school social workers and school psychologists within the existing student support system. Supplement with McKinney-Vento funding, as indicated by need (Strategic Plan, Goal 1, Student Success, Whole Child, 2b).
7. **Assistance from Counselors (722(g)(1)(K))**: A description of how youths described in section 725(2) will receive assistance from counselors to advise such youths, and prepare and improve the readiness of such youths for college.

HIDOE recognizes that homeless youth may face barriers accessing and completing postsecondary education, and is moving toward increased collaboration between counselors and Homeless Concerns Liaisons (HCL) to better prepare and improve college readiness for such students. HIDOE School Counselors across the state are currently being engaged as part of the support web around homeless students, to ensure individualized counseling regarding progress toward earning a HS diploma, college/post HS preparation and selection, the application process, financial aid, and the availability of on-campus supports. The Homeless Concerns Liaisons (HCL) will reach out to counselors to help identify the homeless students, and connect to family, and off-campus resources, such as testing, application fee waiver options and university level homeless student supports.

Guidance will be provided to the counselors regarding unaccompanied homeless youth and their status as independent students. As independent students, parent information on the FAFSA is not required, and Federal financial aid is calculated without the expectation of parental financial support. (Section 722(g)(6)(A)(x)(III)). HCL will assist youth in receiving verification of such status for federal student aid purposes.
J. Children in Foster Care

Hawai‘i strives to ensure our students in foster care demonstrate they are on a path toward success in college, career, and citizenship by providing these students with a caring, safe, and supportive learning environment through which they are able to transition successfully throughout their educational experiences and feel empowered in their learning to set and achieve high aspirations for their future [HIDOE/BOE Strategic Plan, Goal I].

HIDOE’s Foster Care program is emerging. HIDOE, in collaboration with Hawai‘i Department of Human Services (DHS) has worked with its Student Transportation Services Branch; Information Technology Services Branch; Data Governance and Analysis Branch; and Performance, Innovation, Planning and Evaluation Branch to identify and articulate what new requirements under the Foster Care provision in Title 1, Part A shall be emphasized and implemented. HIDOE is currently developing guidelines for state-wide implementation of the “Ensuring Educational Stability for Children in Foster Care” guidance13 that incorporate key elements of this legislation: best interest determination process for children in foster care, dispute resolution process, transportation procedures and immediate enrollment and records transfer, as well as identifying key points of contact at each school. HIDOE’s goal is that all shareholders will:

1. Understand the educational needs of children and youth in foster care
2. Gain knowledge of the process and procedures of the educational stability components
3. Establish and maintain positive relationships with those responsible for the care of children and youth in foster care

HIDOE is committed to the processes and procedures to ensure that collaborative efforts prevail in serving the needs of the foster children. To begin the Educational Stability process, the DHS caseworkers notify HIDOE in writing whenever a child enters or re-enters foster care. A child who enters foster care remains in his/her school of origin unless a determination is made that remaining in his/her school of origin is not in his/her best interest. By default, a child who comes into care remains in his/her school of origin unless it is not in his/her best interest. The underlying goals are to reduce barriers, provide stability and increase opportunities for children in foster care.

All HIDOE schools are committed to the best interest determination process which includes collaboration with DHS (the child welfare agency) to determine the best interest of the child based on the student's' input, proximity to school, length of commute, appropriateness of the current educational setting, appropriateness of educational programs in the current school or another school, expected length of foster care placement, proximity to family, number of school disruptions the child has already experienced, involvement in extracurricular activities, and other factors.

Given such coordination requirements between HIDOE and DHS, these agencies collaboratively determine the appropriate school placement of children in foster care. If there is disagreement regarding school placement for a child in foster care, an Educational Stability Meeting is held within the required timeframe.

DHS is uniquely positioned to assess vital non-educational factors such as safety, sibling placements, the child’s permanency goal, and the other components of the case plan. The child welfare agency also has the authority, capacity, and responsibility to collaborate with and gain information from multiple parties, including parents, children, schools, and the court in making these decisions. If the child in foster care is IDEA or 504 eligible, the IEP or modification team is the decision-making authority in determining the child’s school placement.

If HIDOE and DHS cannot agree on a child’s school placement at the Educational Stability Meeting, the dispute resolution procedure is triggered. An Educational Stability Meeting is not necessary if all parties are in agreement. Dispute resolution procedures entail a review of the case by a team comprised of representatives from HIDOE and DHS and guardian ad litem, if one has been appointed. If the review team still cannot reach an agreement, the decision will be at the discretion of the dependency judge. Legislation requires disagreements to be resolved expeditiously and places the burden of proof on the child welfare system to show that its decision is in the child’s best interest.

DHS ensures that children in foster care who do change schools are promptly enrolled in their new school. Children in foster care can enroll immediately in a new school even if the normally required enrollment documents and school records cannot be produced.

HIDOE enrolling schools immediately contact the school last attended by the child to obtain relevant records, which then immediately transfer those records (ESEA section 1111 (g)(1)(E)(iii)). Immediate enrollment ensures entry to new school as soon as possible in order to prevent educational disruption. Enrollment must not be denied or delayed due to unavailability of documents normally required for enrollment (ESEA section 1111 (g)(1)(E)).

Children in foster care are provided with transportation, as necessary, to their schools of origin. HIDOE collaborates with DHS with regard to how transportation will be provided, arranged and funded for the duration of the child’s time in foster care. Children in foster care needing transportation promptly receive that transportation in a cost-effective manner and in accordance with section 475(4)(A) of the Social Security Act. Students in foster care also receive free breakfast and lunch at school.

HIDOE has designated an Educational Specialist to serve as a point of contact for child welfare agencies and to oversee implementation of educational stability for foster children in HIDOE. The HIDOE point of contact ensures the importance of collaboration between DHS and schools to maintain the educational stability and provisions are established in order to improve outcomes for children in foster care. HIDOE maintains separate points of contacts for the Education of Homeless Children and Youths of the McKinney-Vento Homeless Assistance Act and Educational Stability for Students in Foster Care Act.

The HIDOE point of contact coordinates with DHS to issue joint state guidance for implementation of uniform guidelines with regard to children in foster care. One of the goals of the department’s foster care program is to build additional capacity with DHS through data sharing, while incorporating federal and local laws pertaining to student privacy. The HIDOE point of contact regularly monitors schools to ensure timely and responsible implementation of state guidelines,
presents material on Educational Stability for Children in Foster Care.

HIDOE is in the process of implementing an electronic data collection mechanism into its online student information system in effort to accurately capture and report on student achievement, attendance, transfers, meetings and graduation rates for students in foster care. Such student data is also critical to raise public awareness about the unique educational needs of youth in foster care.

HIDOE and HI Department of Human Services (HIDHS) Child Welfare Services have worked collaboratively to implement new educational stability protections for children in foster care. HIDOE School Counselors and HIDHS Social Workers shall be trained jointly on the components of the process as well as implementing with fidelity. The process includes best interest determination guidance for when a child enters or changes foster care placement. It is the hope of both agencies that joint training will maximize interagency camaraderie, quality of working relationships and delivery of support services to the children our agencies have in common.

HIDOE & Board of Education approved a 2017-2020 Strategic Plan on December 6, 2016. The mission of the department is that “Hawai’i ’s students are educated, healthy, and joyful lifelong learners who contribute positively to our community and global society”. Three primary goals continue to serve as our organizational framework: Student Success, Staff Success and Successful Systems of Support. Goal 1, Objective 3 addresses student engagement in a well-rounded rigorous education which prepares students to be successful in their post high-school goals. Objective 4 indicates that all students are prepared and resilient and shall transition successfully through their educational experiences. These acclaimed goals and objectives are particularly meaningful for foster care children.
Appendix A: Measurements of interim progress

Instructions: Each SEA must include the measurements of interim progress toward meeting the long-term goals for academic achievement, graduation rates, and English language proficiency, set forth in the State’s response to Title I, Part A question 4.iii, for all students and separately for each subgroup of students, including those listed in response to question 4.i.a. of this document. For academic achievement and graduation rates, the State’s measurements of interim progress must take into account the improvement necessary on such measures to make significant progress in closing statewide proficiency and graduation rate gaps.

Appendix B: The Hawai‘i Department of Education & Board of Education
Strategic Plan 2017-2020
Hawaiʻi’s students are educated, healthy, and joyful lifelong learners who contribute positively to our community and global society.
Our Strategic Plan centers on the students who entrust their education and their futures to the State’s public schools. When the Department of Education (DOE) and Board of Education (BOE) embarked on their first ever joint Strategic Plan in 2012, we anchored the plan to our primary goal of Student Success. We came together this year to review our progress, reflect on lessons learned, and make necessary changes to achieve our ambitious goals for all of our students. We began with input from our students. How do they define “success,” and how can we best support them? We are inspired by the hundreds of students who shared their ideas at focus groups, participated in design thinking workshops, took online surveys and submitted photos and stories. Their aspirations and hopes are the backbone for the significant shifts and ambitious goals in this Strategic Plan.

The DOE and BOE worked with partners to expand our student focus groups into a statewide listening tour with educators, parents, community members, and peer organizations. People gave generously of their time and helped us find common ground for a community-based definition of Student Success that includes:

- Giving back to the community, environment, and world;
- Discovering and pursuing their passions so they can reach their full potential;
- Demonstrating strong academic and life skills (General Learner Outcomes), and showing an ability to think critically, solve problems, and apply knowledge to new situations or contexts;
- Being prepared for life after high school, including setting clear goals and developing short-term and long-term engagement in learning;
- Exhibiting strength, confidence, and resilience in their everyday lives, and being generally healthy and happy; and
- Gaining a strong sense of cultural understanding and appreciation for Hawai’i.

We are heartened by how much these community priorities align with growing initiatives and investments within the DOE and public education in Hawai’i. A new statewide career readiness initiative for strengthened career pathways complements the DOE’s college and community readiness partnerships. The establishment of the DOE’s Office of Hawaiian Education and BOE’s adoption of Nā Hopena ʻāo in 2015 support all of us in applying the Hawaiian values and knowledge that will make us better leaders, learners, and community contributors. The hard work of our teachers, leaders, and staff in carrying out the 2012 Strategic Plan resulted in an infrastructure to support teaching and learning that did not exist statewide previously. Now we can build on that solid foundation to support community-led pathways in this Strategic Plan toward success for all students in our public schools.

Our students have high hopes for their future, and they deserve every support we can give them. The future of our special island home depends on them—and all of us, together—to go beyond what we believed was possible. Mahalo nui loa for supporting the future of Hawai’i’s keiki and our island home.

KATHRYN MATAYOSHI
Superintendent
I. About the Strategic Plan

Every student, school, and community is unique with its own strengths, aspirations, assets, and challenges, but the Strategic Plan describes shared objectives for equity and excellence for every child across Hawai‘i’s nearly 300 public schools, including our public charter schools and Hawaiian language medium schools.

The Strategic Plan provides a common foundation of expectations and supports for all students in Hawai‘i’s public schools and recognizes both of Hawai‘i’s official languages. Many schools will aspire to achieve all of the Strategic Plan’s Student Success objectives while some schools may already meet these objectives and will focus on further advancing success for all of their students and sharing their learning with others.

The Strategic Plan is a compact between the BOE, DOE and community about the state’s goals for public education and the support and investment necessary to achieve the goals. It will inform implementation plans within DOE state offices, Complexes and schools, education budget requests to the legislature, state office initiatives, Complex Area supports, and community partnerships. The plan will also inform the Hawai‘i State Public Charter School Commission and public charter schools by providing reports about schools’ progress, supporting priorities for federal programs, impacting legislative funding for schools, and providing policy direction from the BOE.

The Strategic Plan will also guide planning to leverage any new flexibility in the federal Every Student Succeeds Act (ESSA), which President Barack Obama signed into law in December 2015. ESSA is the education law that replaces No Child Left Behind and provides many of the federal requirements for K-12 education.

In April 2016, Governor David Ige convened an “ESSA Team” to create an aspirational Governor’s Education Blueprint. The combined efforts of the Governor, BOE, and DOE provided unprecedented opportunities for public conversation about education in 2016.

Multiple rounds of meetings held throughout the state by both the BOE and Governor’s ESSA Team engaged thousands of residents in discussions. BOE and DOE meetings focused on developing a near-term Strategic Plan for K-12 education that aligns with the Governor’s Education Blueprint, which is long-range and addresses education broadly including early childhood, higher education and workforce development.

II. Our Journey

Our belief in the ability and potential of each and every child in our public schools led the BOE and DOE to set clear statewide standards linked to high expectations for all students. In a rapidly changing world, we cannot know what our entering kindergarteners will one day dream of achieving when they graduate from high school or the opportunities and challenges that they will address as they grow into leadership locally and globally. Our job is to equip these students with the knowledge and capabilities to succeed at their chosen path in life.

The establishment of the first joint DOE/BOE Strategic Plan in 2012 built upon reforms we began 10 years ago in response to critical challenges: Hawai‘i’s student achievement lagged nationally, and students who struggled to meet proficiency in core subjects were unable to progress successfully through their K-12 journey. Too many of our high school graduates were not meeting the entry requirements for workforce, college, apprenticeship programs, or military service options. We focused our efforts on ensuring students had the skills, values, and supports necessary for their next steps in life.

To best support students’ goals in 2012, we implemented comprehensive statewide supports. We focused on rigorous standards-based instruction and ensuring the quality of the high school diploma. We continued to invest heavily in collecting, reporting and supporting use of transparent, real-time data so we could better understand and mobilize around students’ needs and progress. We established statewide teacher induction and mentoring, and focused professional development and feedback on improving teachers’ professional
practice. These initiatives provided a common foundation for educators to support students—including a common language and high expectations for teachers’ professional practice and student learning. With this new infrastructure in place, and a great deal of hard work on the part of educators, students, families, and key community partners, Hawai‘i was one of two states that led the nation in overall gains in national math and reading proficiency over 10 years.¹

Building on an improved foundation in math and reading, a statewide “P-20” effort—from early childhood education through lifelong learning—has helped us work with early education and higher education partners to increase students’ career, college, and community readiness. Advanced course-taking and early college programs in which high school students earn college credit have both increased substantially.

Lastly, as we look to the future, we know that part of the legacy of our special island home is to support the community relationships, culture, values, and sense of place that enables students to thrive. Since the launch of the 2012 Strategic Plan, the BOE passed policies establishing the Office of Community Engagement and the Office of Hawaiian Education (OHE). These new offices are a crucial component to support all students becoming career, college, and community ready.

With clear goals, Hawai‘i can be a national leader in education by mobilizing the incredible strengths of our diverse communities behind the high standards our students deserve.

III. Equity and Excellence: The Next Leg of Our Journey

Over the past 10 years, Hawai‘i has achieved steady progress in students’ educational outcomes—whether measuring academic achievement or college enrollment. We are inspired by the growth to date; however, our students are not succeeding equally, and we see persistent gaps in achievement between students. Supporting positive outcomes for all of our students from this point on will require the DOE, charter schools, state agencies, and family and community stakeholders to come together in new ways, and we have therefore made significant changes in this updated and extended Strategic Plan. Since the Great Recession, a historic shift has occurred in our state. Despite an improving economy and low state unemployment, many families continue to struggle financially — more than 50 percent of Hawai‘i’s public school students are now economically “high needs.” Other high-needs students include English Learners and students receiving special education services. In total, 57 percent of students were high needs in 2015. We must also consider the needs of students in ethnic groups that are historically underrepresented in career, college, and community success metrics; it is important to recognize the role of multiculturalism and multilingualism in providing a meaningful and equitable education for student achievement. Hawai‘i, like many states across the country, continues to struggle with an “achievement gap” that separates the engagement and achievement of high-needs students from that of their non-high-needs peers. It is of the highest priority that schools address the needs of our struggling students.

As we reviewed the Strategic Plan during the 2016 update with students, educators, and other key members of our community, we focused on building upon our strengthened foundation to close the achievement gap and attain
equity and excellence for all students. Our commitment to transparency in reporting student data and establishment of new data tools and partnerships has helped us understand the scope and scale of our achievement gap, and made us national leaders in moving beyond federal categories of high-needs students to create a candid local picture in the best interest of our students and islands. During the first years of the Strategic Plan, implementation of our strategic priorities helped us increase teachers’ and leaders’ skills and knowledge to make data-informed decisions in the best interest of students. This work will now continue to be complemented by new real-time data resources, focused professional development for classroom, school, and regional strategies to address every student’s needs and close the achievement gap to attain equity and excellence. This also requires partnerships with families and the community for student needs that extend beyond the classroom.

The impact of the Strategic Plan depends on the effectiveness of implementation and the extent to which students benefit from our aligned efforts to provide high-quality education and key supports. Schools are supported by 15 Complex Areas that include their regional K-12 schools and by DOE state offices. The BOE and DOE will focus state office resources on transparent and efficient supports for statewide operations and on key statewide strategic initiatives to close the achievement gap and support equity and excellence in student outcomes. Statewide strategic initiatives will work in concert with the updated objectives for our three main goals of Student Success, Staff Success, and Successful Systems of Support to ensure all students and schools are proficient in critical building blocks of learning. We must be steadfast in our mission to develop our keiki so that each student and each graduate is prepared to succeed in their post-high school pursuits of careers, postsecondary education and training, and contributing to our community.

IV. Vision
Hawai‘i’s students are educated, healthy, and joyful lifelong learners who contribute positively to our community and global society.

V. Mission
We serve our community by developing the academic achievement, character, and social-emotional well-being of our students to the fullest potential. We work with partners, families, and communities to ensure that all students reach their aspirations from early learning through college, career, and citizenship.

VI. Nā Hopena A‘o

We believe that our special island home prepares us to lead globally. Our unique values, sense of place, and strong community relationships are increasingly important here and around the world.

In 2015, the BOE approved policy E-3, Nā Hopena A‘o, or HĀ, to help advance our mission: “HĀ is a framework of outcomes that reflects the Department of Education’s core values and beliefs in action throughout the public educational system of Hawai‘i. The DOE works together as a system that includes everyone in the broader community to develop the competencies that strengthen a sense of Belonging, Responsibility, Excellence, Aloha, Total well-being and Hawai‘i (“BREATHE”) in ourselves, students, and others. With a foundation in Hawaiian values, language, culture and history, HĀ reflects the uniqueness of Hawai‘i and is meaningful in all places of learning. HĀ supports a holistic learning process with universal appeal and application to guide learners and leaders in the entire school community.”

HĀ is being implemented in the DOE through a three-year action plan (2016-2018) developed and led by the Office of Hawaiian Education. Other partner organizations are also adopting HĀ. To learn more about implementing HĀ and OHE, please visit bit.ly/NaHopenaAo.
VII. Student Goals and Aspirations

BOE policy 102-15 establishes a Vision of a Hawai‘i Public School Graduate that states all graduates will:

- Realize their individual goals and aspirations;
- Possess the attitudes, knowledge, and skills necessary to contribute positively and compete in a global society;
- Exercise the rights and responsibilities of citizenship; and
- Pursue postsecondary education and/or careers.

Recent statewide surveys of public school students’ aspirations show that 93 percent of all high school juniors hope to pursue additional education or certification sometime after high school. We must work together with all stakeholders to provide students with the tools and knowledge that allow them to reach their goals and access opportunities. The same rigorous foundation of academic skills, General Learner Outcomes and other “life skills” are needed for a full range of postsecondary aspirations, whether students are pursuing industry certifications, a college degree, military training, on-the-job training, a trade apprenticeship, or the launch of their own enterprise.

VIII. Goals and Objectives for Achieving Student Aspirations

The three primary goals of the 2012 Strategic Plan continue to serve as an organizing framework: Student Success, Staff Success, and Successful Systems of Support. As we work together to fulfill the community mandate for supporting Student Success, we know that closing our state’s achievement gap and achieving equity for all students will require expanded financial and community resources for teachers and lenders. The Strategic Plan objectives under each goal are intended to set a common direction statewide for schools and community partners. These objectives will be implemented in a tailored and customized approach through school- and Complex-level implementation plans, which address existing school and community strengths and challenges.
GOAL 1  STUDENT SUCCESS

All students demonstrate they are on a path toward success in college, career, and citizenship.

OBJECTIVE 1: EMPOWERED. All students are empowered in their learning to set and achieve their aspirations for the future.

K-12 learning opportunities expand students’ horizons through a range of topics, solutions, and possibilities for their education and their future. Students’ personalized plans, including career, postsecondary, and training goals, are informed by learning opportunities throughout the K-12 continuum. Students are engaged and motivated because learning is relevant and builds on their strengths. Students’ voice and curiosity are nurtured, which prepares them to have and exercise positive choices for their learning, their future, and their contributions to family and community.

1a. Increase student engagement and empowerment through relevant, rigorous learning opportunities that incorporate students’ voices. Students are encouraged to apply their learning through life experiences, questions, and challenges. Students practice creative problem solving and can see themselves as part of a community effort to address complex questions and challenges that impact our islands and the world.

1b. Ensure that high school graduates demonstrate the General Learner Outcomes (GLOs) and have the abilities, habits, and knowledge to set and achieve their short-term and long-term career, community, and postsecondary education goals. Students can identify the training, certificate, apprenticeship, and/or college degree requirements for their career and community passions, and are equipped with the knowledge and skills to set and achieve their goals.

1c. Throughout their K-12 education experience, students have diverse opportunities to explore, plan, and prepare so that they graduate from high school ready to succeed. Students have access to high-quality career and college counseling, mentorship opportunities, internships and advanced courses (e.g., Early College) to support their long-term success.

OBJECTIVE 2: WHOLE CHILD. All students are safe, healthy, and supported in school, so that they can engage fully in high-quality educational opportunities.

Students’ physical, social, mental, emotional, and cognitive development are critical as they move from early childhood to adolescence to adulthood. Students’ well-being and health increase their readiness to learn. Students succeed when their individual needs are met and their innate gifts and abilities are nurtured.

2a. Provide students with learning environments that are caring, safe, and supportive of high-quality learning.

2b. Address students' physical, mental, and behavioral health through school programs and partnerships with families, community organizations, and government agencies that support students’ well-being.

2c. Cultivate a community and school culture where attendance is valued, encouraged, and supported. Extend this culture of attendance to the home; encourage families to plan for family vacations, travel, and other events during school breaks, holidays and other non-student days.
OBJECTIVE 3: WELL-ROUNDED. All students are offered and engage in a rigorous, well-rounded education so that students are prepared to be successful in their post-high school goals.

All students should experience a rigorous and well-rounded standards-based education that covers a variety of academic subject areas. In response to long-standing federal accountability law, our schools' curriculum and instruction too often focused narrowly on reading and mathematics. Students should experience the interdisciplinary nature of education, and develop the abilities and skills necessary to have a “breadth of knowledge that leads to joy in learning, respect for others, and a lifelong spirit of inquiry…” (BOE Policy E-105). The federal Every Student Succeeds Act requires standardized testing. In addition to federally required tests, schools may choose to assess students to inform planning for learning by teachers, schools and policymakers, and to validate and report students’ academic progress to students, their families, lawmakers and the community. This Strategic Plan does not mandate additional testing, and schools should select additional assessments for their value to learning and school improvement in consultation with stakeholders.

3a. Provide students of all backgrounds, ages, and needs with a challenging and quality standards-based education in all subject areas.

3b. Ensure that each student’s learning is personalized, informed by high-quality data, and advances them toward readiness for success in career, college, and community.

GOAL 2 STAFF SUCCESS

Public schools have a high-performing culture where employees have the training, support, and professional development to contribute effectively to student success.

OBJECTIVE 1: FOCUSED PROFESSIONAL DEVELOPMENT. Develop and grow employees to support student success and continuous improvement.

Education is a “people business.” Research, student feedback, and our own experiences confirm that competent and committed teachers have the greatest influence on student achievement beyond students’ families. Our greatest investment and primary strategy to retain teachers is supporting teachers’ professional and collegial practice including coaching and mentoring so that they are successful in the classroom with their students. When teachers excel, students thrive.

1a. Realign professional development resources to support student success objectives as needed by individuals, schools, complexes, and state offices (e.g., interdisciplinary and relevant lessons, social-emotional learning, language development, instructional strategies to address all types of learners, quality classroom assessments). Aim for a constant experience of caring educators and quality instruction to enable students to progress toward becoming ready for career, college, and community.

1b. Prioritize professional development for educators and leaders that increases knowledge, understanding, and ability to use inclusive practices and multi-tiered supports with students that need diverse instructional methods, including special education students and English Learners.

1c. Strengthen the teacher, principal and educational leader development pipeline to support shared and effective leadership at all levels.

1d. Provide support for new employees to become effective (e.g. quality induction and mentoring for all beginning teachers, new principals, and leaders).

OBJECTIVE 4: PREPARED AND RESILIENT. All students transition successfully throughout their educational experiences.

Students who feel connected to school are more likely to engage and to learn. Students’ transitions between schools — whether advancing to middle or high school or transferring between schools — can disrupt their sense of connectedness to school. Intentional planning to support students’ transitions can make the critical difference for student success.

4a. Identify and address student strengths and challenges early so students may transition into early elementary grades ready to learn and with a cognitive foundation for reading that prepares them for the future.

4b. Support students’ transition in adolescence (grades 5-10) through school practices, counseling, and research-based experiences that advance total well-being.

4c. Create innovative learning options to earn a high school diploma.

4d. Support students who are transitioning between grade levels or transferring to a new school.

4e. Ensure that every high school graduate or completer has an identified next step after high school aligned with their future aspirations.
Objective 2: Timely Recruitment and Placement. Timely recruitment and placement of applicants to better serve all students to address achievement gaps and attain equity.

Ensuring that every student has a caring, prepared teacher for every class begins with attracting, hiring, and assigning teachers in a timely manner to fulfill educational programs at every school. Some schools and students are disproportionately affected by vacancies, which impacts our ability to ensure equitable resources in education for all students across the state. Recognizing that there are teacher shortages, especially special education teachers, schools must endeavor to ensure that the most vulnerable students are taught by a highly qualified teacher.

2a. Implement targeted efforts to recruit and place educators for specialized assignments and high demand skills and abilities (e.g., special education, secondary science, career-technical education, deaf and hard-of-hearing, Hawaiian language, multilingual).

2b. Implement targeted recruitment efforts to fill vacancies in locations with consistent shortfalls at the beginning of the school year.

Objective 3: Expanded Professional Pipeline. Expand well-qualified applicant pools for all Hawaii educator positions and expand the number of candidates who are prepared to support Student Success objectives.

Local and national trends point to declines in the number of candidates in teacher preparation programs. Partnerships are critical to expanding the number, type, and quality of candidates for educational positions to serve our students. This includes partnerships with public schools to interest young people early on in education as a profession, and support from higher education institutions and community organizations to promote the teaching profession. There will be an emphasis on developing partnerships that result in more Hawaii-connected educators, as locally connected teachers are more likely to be retained.

3a. Partner effectively with local educator preparation programs to develop qualities and competencies that facilitate Goal 1 Student Success objectives. Educator preparation programs include teacher certification programs and middle and high schools’ career pathways programs to develop future teachers.

3b. Partner with appropriate organizations to develop programs to fill gaps in preparing a full range of educator positions (e.g. behavioral analysts, physical therapists, school counselors).

3c. Celebrate the teaching profession in partnership with professional associations and other community organizations to attract more candidates to the teaching profession and public schools as a place of work and service.
GOAL 3  SUCCESSFUL SYSTEMS OF SUPPORT

The system and culture of public education work to effectively organize financial, human, and community resources in support of student success.

OBJECTIVE 1: INNOVATION. Foster innovation and scaling of effective instructional and operational practices to meet and exceed our educational goals.

Meeting the challenges of our students, communities, and world for today and the future requires innovation and creativity in our approaches to teaching, learning, leading, and problem solving. Hawaiʻi public schools will foster innovation and the expansion of existing public school “Bright Spots,” which includes learning from charter schools that were established as innovation labs. Supporting innovation includes making changes based on lessons learned, and providing opportunities for risk taking that are balanced by awareness of the impacts of failure for our students and boundaries of law and collective bargaining agreements.

1a. Identify and scale local public education “Bright Spots” through statewide professional networks to best support Strategic Plan objectives and statewide strategic initiatives.

1b. Foster a culture of innovation to support Student Success and to improve operations (e.g., through collaboration, time, resources, flexibility, safe space for risk taking, recognition).

OBJECTIVE 2: ADEQUATE AND EXPANDED RESOURCES. Secure adequate resources to support school and community-based plans for student success.

Analyses of Hawaiʻi’s school funding repeatedly find that resources are distributed equitably but are inadequate for quality public schools. Public education funding has not maintained pace with inflation and has endured budget cuts and restrictions that have required education leaders to maximize available resources and make difficult choices. Additional funds and partnerships are needed to achieve the goals of this Strategic Plan for all schools and every student.

2a. Work with stakeholders to secure and maximize state resources for public education (i.e., state funding, capital improvements and repair and maintenance of facilities, partnerships with state agencies).

2b. Partner with families and communities to engage relationships, resources, and expertise to support Student Success strategies (e.g., through School Community Councils, grants and gifts, family education, partnerships, etc.).

2c. Maximize allocation of resources toward strategic uses to advance equity and excellence (e.g., through review of base funding in weighted student formula, charter schools’ per-pupil funding).

OBJECTIVE 3: EFFICIENT AND TRANSPARENT SUPPORTS. Increase efficiency and transparency of instructional and operational supports to promote student learning and help schools while stewarding public education resources.

Public education’s human, social, community, and financial resources must support student learning. State office operational supports will be efficient and transparent to provide a high level of service and accountability.

3a. Enhance support for development, implementation, and reporting of schools’ Academic and Financial Plans and expenditures.

3b. Provide timely and user-friendly data to support strategic decision-making and accountability for Student Success.

3c. Implement department-wide priority projects for heat abatement, student information and reporting systems, and environmental and resource sustainability.

3d. Strengthen culture of continuous improvement to provide efficient transactions and operations.

3e. Continue to improve communication to promote understanding and engagement of stakeholders.
IX. Implementation

The Strategic Plan influences the educational opportunities and outcomes for all public school students. While local and national goals are shared by schools statewide, there is flexibility in how schools and Complex Areas will develop their implementation plans to meet these goals and objectives because each community has different strengths, challenges, priorities and resources.

Successful implementation of the Strategic Plan requires sound decision making and information sharing throughout the entire organization with particular emphasis on the three main levels of decision making and responsibility within the DOE: school, Complex and state office. Implementation within this “tri-level” structure enables schools, Complexes and state offices to better meet the education needs of unique learners and communities across the state. Leaders at each of these levels make long term (strategic), short term (tactical) and daily (operational) decisions regularly. These decisions should be in overall alignment with BOE and DOE policies, this Strategic Plan, and state and federal laws and regulations.

This updated Strategic Plan strikes a new balance between maintaining shared expectations for all schools and students, and supporting diverse approaches and community-based objectives. Schools, classrooms, Complex Areas and communities have diverse perspectives about how to define, measure and achieve success. As schools and Complex Areas determine how best to align their implementation and Academic and Financial plans to the updated Strategic Plan, they will be addressing statewide expectations represented in this Strategic Plan while prioritizing actions and strategies that are meaningful to their students, school, and community. This Strategic Plan increases flexibility in the priorities for school-level implementation to address local strengths, aspirations, assets and needs.

The BOE adoption and approval of this plan will require schools, Complex Areas and state offices to immediately begin key discussions, decisions and implementation plans aligned to this Strategic Plan. Parents, caregivers, community organizations and other education stakeholders and partners are encouraged to participate at each level and support implementation efforts in their local school and Complex Area.

| SCHOOL LEVEL | The Principal leads the school’s effort to develop an Academic and Financial Plan that aligns to the state Strategic Plan based on the strengths and needs of their students and community. Each school’s plans are reviewed by its School Community Council and approved by the Complex Area Superintendent. Public charter schools’ plans are approved by their local governing board within the context of each school’s performance contract, which is approved by the Hawai‘i State Public Charter School Commission. School budgets are primarily funded by the state legislature and allocated based on each school’s student enrollment. DOE schools’ budgets are further allocated on student characteristics of needs, based on a Weighted Student Formula, as legislatively required by Act 51, Reinventing Education Act of Hawai‘i (2004). |
| COMPLEX AREA LEVEL | Complex Area implementation plans ensure that resources are allocated appropriately within the region. The Complex Area Superintendent provides direct support and oversight for school-level implementation. Many Complexes’ schools share common objectives and strategies to provide a seamless experience for students and ensure smooth transitions between the grade levels and between schools when students transfer among schools within a Complex. |
| STATE LEVEL | There will be statewide implementation plans for efficient and transparent operations of our public schools, and for key statewide strategic initiatives to close the achievement gap and to ensure equity and excellence for our students. The state office coordinates statewide professional learning networks, “Bright Spot” best practices sharing, and innovative partnerships to advance statewide strategic initiatives. Examples of these initiatives include: |

Well-Rounded Education

Well-rounded, standards-based education should be engaging and relevant to students and build on their strengths. Statewide training, clear standards in all content areas, learning networks, assessments, and resources will focus on helping students develop the rigorous skills and joy for learning that will serve them throughout their lives.

Inclusive Practices

Experience and research show that inclusive practices are best for high-needs students. Students who are most severely impacted by our achievement gap, including those receiving special education services and English Learners, deserve high-quality education in a regular classroom setting. Statewide training and support will be provided for inclusion in classrooms that is balanced with specialized supports.

K-12 Career Readiness Pathways

K-12 career pathway programs can increase student engagement and support long-term student success through real-world learning opportunities and empowering students to achieve their aspirations. The DOE will be launching a career readiness initiative between business, higher education, and state agencies to improve K-12 career pathways statewide and increase the career and college readiness of high school graduates.

Leadership Institute

DOE leadership practices throughout the education system will support Strategic Plan objectives at school, Complex Area, and state office levels. This includes state-led induction and mentoring, ongoing professional development, and administrator certification to identify and cultivate leaders — teachers and administrators — who support shared responsibility for instruction. Complex Area and school leadership development will include a special focus on isolated, rural locations and designing education career pathways for middle and high school students.

Transitions

Proactive planning to support student transitions between grade levels makes a critical difference in student success. The DOE will provide data and supports to identify and address student strengths and challenges early and implement holistic best practices at key transition points in a student’s educational journey (kindergarten, middle school, high school, and graduation). This includes identifying policies and practices that support innovative ways to earn a high school diploma.
X. Statewide Indicators for Equity and Excellence

To measure progress on the Strategic Plan, the BOE and DOE commit to regular reporting on key statewide success indicators and ensure students achieve the BOE’s Vision of a Hawai‘i Public School Graduate (Policy 102-15). We strive to increase our graduation rate to 90 percent by 2025. We also strive to ensure that the high school diploma is meaningful and represents career, college, and community readiness as embodied by academic standards and General Learner Outcomes, and to contribute to our state’s “55 by ‘25” goal of more working age adults having a 2- or 4-year college degree.

Data on statewide indicators will be reported regularly to the BOE and the public on a “dashboard” to monitor progress toward equity and excellence. Information for each indicator on Status, Progress, and Equity will be reported at least annually. The data will be analyzed and reported for different groups of students and schools to ensure equity in outcomes and so we can direct our efforts and resources effectively.

Statewide indicators represent the overall health of public education, focusing on those which have greatest impact on student success, as well as state and federal requirements. They do not comprehensively represent diverse measures of success valued by our state’s nearly 300 schools. Schools can address their unique approach to indicators through their Academic and Financial Plans and charter school contracts.

STATEWIDE STUDENT SUCCESS INDICATORS

1. CHRONIC ABSENTEEISM. Percentage of students who are absent for 15 or more days during the school year. Student attendance is a powerful predictor of student success, even accounting for other factors such as prior academic preparation and poverty. Students need to be in school to achieve and grow. The habit of “showing up” is an important life skill. 15% 9%

2. SCHOOL CLIMATE. Percentage of students reporting positive school climate as measured by the safety dimension of the School Quality Survey. Feedback during the Strategic Plan review identified school climate as key for student success. 73% 79%

3. INCLUSION RATE. Percentage of students receiving special education services who are in general education classes for 80 percent or more of the school day. Inclusion is a commitment to success for all students. Research shows that inclusive practices result in better attendance, achievement, referral rates and postsecondary outcomes. 37% 51%

4. THIRD GRADE LITERACY. Percentage of 3rd graders demonstrating reading of “At or Near” or “Above” grade-level expectation on Smarter Balanced Assessment. Reading at grade level by 3rd grade is a critical milestone of student success because literacy is a foundation for future learning. 65% 76%

5. NINTH GRADE ON-TRACK. Percentage of first-time 9th graders promoted to 10th grade on-time. Transitioning successfully into high school is a critical milestone—students who are on-track in 9th grade are more likely to graduate. 90% 94%

6. ACADEMIC ACHIEVEMENT. Percentage of students meeting achievement targets on statewide assessments in English Language Arts/Literacy (ELA), Mathematics, and Science. Our assessments are designed to measure progress toward college and career readiness. ELA 51% 61% MATH 42% 54% SCIENCE 43% 64%

7. ACHIEVEMENT GAP. Difference in meeting achievement standard between high-needs students (e.g., economic disadvantage, special needs, English Learners) and non-high-needs students. Statewide assessments measure performance of different student subgroups to reflect whether we have equity in student outcomes. ELA 32% TBA* MATH 35% TBA*

8. HIGH SCHOOL GRADUATION. On-time rate based on federal methodology for Adjusted Cohort Graduation Rate of students for earning a diploma within four years. A high school diploma represents rigorous standards of learning and the vision of a Hawai‘i public school graduate. 82% 86%

9. CAREER & TECHNICAL EDUCATION CONCENTRATOR. Percentage of 12th graders who complete a CTE Program of Study, which provides opportunities to learn/apply academic and technical skills and knowledge within a career pathway. 38% 50%

10. COLLEGE-GOING GRADUATES. Percentage of high school completers enrolled in postsecondary institutions nationwide (vocational or trade schools, 2- or 4-year colleges) in the fall following graduation. Enrollment in postsecondary education to attain a certification, degree or other career training means a greater likelihood of employment, higher earnings, and health. 56% 62%

11. TEACHER POSITIONS FILLED. Percentage filled as of August 1 each year. Teachers are our greatest investment in the quality of our students’ education. We commit to filling positions with qualified teachers so that each school year begins with classrooms fully staffed, including hard-to-fill positions (e.g., special education, English Learners). 96% 98%

12. TEACHER RETENTION. Percentage of new teachers retained after five years. Continuing employment of qualified and effective teachers results in benefits to students as teachers gain experience, reduces recruitment expenditures. 52% 60%

13. REPAIR & MAINTENANCE BACKLOG. Dollar amount in list of unfunded or deferred major R&M projects. School facilities’ needs in the R&M backlog include infrastructure rehabilitation and structural improvements, among others. Must be accompanied by efforts to build new, state-of-the-art facilities to meet changing demographics and support innovative learning. $279M $239M

14. FAMILY AND COMMUNITY ENGAGEMENT. Indicator added as an amendment during discussion at the Board of Education Dec. 6, 2016 General Business Meeting (GBM). Metric to be determined with discussion at the Board’s Student Achievement Committee (SAC). TBA* TBA*

* indicator added at BOE GBM 12/6/16, metrics to be reviewed at SAC.
Appendix C: Hawai‘i’s Blueprint for Public Education
I am pleased to present to the community the first edition of Hawai‘i’s Blueprint for Public Education. We took the first step over a year ago when I formed a team to take advantage of new federal legislation that gave governors in each state the opportunity to listen to their communities and maximize education opportunities and possibilities.

Today, this Blueprint includes input from over 3,000 people from communities around our state, whether it was at the Education Summit in July 2016 or at the dozens of follow-up meetings. It truly reflects the community’s hopes and dreams for a public education system that efficiently delivers results for the people of Hawai‘i.

The Blueprint focuses on school empowerment. Specifically, this means allowing those who are closest to the students and understand best how they are motivated to make many of the instructional and programmatic decisions. Additionally, the Blueprint reflects the public’s desire for our schools to be places that value innovation and unleash curiosity and creativity in all learners.

The group of highly skilled volunteers who shaped the public input and created this document included award-winning teachers, current and former principals, community and business leaders. I thank them for the hundreds of hours they spent on this endeavor and their willingness to serve the public in this capacity.

Implementation of this Blueprint will be challenging and require an ongoing effort. I encourage residents across the state to remain engaged in the process. Together, we will make progress toward a public education system that includes the basics and adds new skills that prepare all our people to meet the challenges of the 21st century.

With warmest regards,

DAVID Y. IGE
Governor, State of Hawai‘i

Hawai‘i’s Blueprint for Public Education reflects the thoughtful, informed, and passionate voice of thousands of stakeholders from communities and islands across our state. It was developed as the result of an inclusive and transparent process to engage students, parents, teachers, principals, education leaders, state leaders, community leaders, and community members to create a blueprint that is organic, bottom up, and truly reflective of the collective wisdom of those who care deeply about our students and our schools.

Members of the Governor’s ESSA Team

Phil Bossert, Director of Strategic and International Programs for HAIS
Catherine Caine, Teacher, Waikiki Elementary School
Kamanao‘opono Crabbe, CEO of the Office of Hawaiian Affairs
Darrel Galera, Chairperson of Governor’s ESSA Team
Keith Hayashi, Principal, Waipahu High School
Michelle Kidani, State Senator, Chairperson of Senate Education Committee
Brennan Lee, Student Member of Hawai‘i BOE, Mililani High School
Andrea Lyn Mateo, Student Member of Hawai‘i BOE, Waipahu High School
Ann Mahi, Complex Area Superintendent, Nānākuli-Waianae Complex Area
Hubert Minn, Hawai‘i BOE
Lauren Moriguchi, State Director of Early Learning
Steve Nakasato, Principal, Pearl Ridge Elementary School
Takashi Ohno, State Representative, Vice Chairperson of House Education Committee
Alan Oshima, CEO of Hawaiian Electric Company
Catherine Payne, Chairperson of Charter School Commission
Amy Perruso, Teacher, Mililani High School
Stacey Roberts, Professor, University of Hawai‘i College of Education
Carol Shikada, Educational Specialist, School Transformation Branch, Hawai‘i DOE
Linda Chu Takayama, State Director for Labor and Industrial Relations and Workforce Development
Stephen Terstegge, Parent, SCC Chairperson, Castle High School
Executive Summary

On December 10, 2015, President Barack Obama signed into law the Every Student Succeeds Act (ESSA), a national education law that replaced the No Child Left Behind Act and subsequent state waivers for education policy. The passage of ESSA was described by the Wall Street Journal as the “largest devolution of federal control to the states in a quarter century” (Severs, 2015).

U.S. Senator Lamar Alexander, Chairperson of the U.S. Senate Education Committee and recognized by many as the “architect” of ESSA referred to the new law by stating, “What I believe is that when we take the handcuffs off, we’ll unleash a whole flood of innovation and ingenuity, classroom by classroom, state by state, that will benefit children” (Klein, 2016).

On April 14, 2016, Governor David Ige announced how Hawai’i would work toward a new vision and seize the opportunity provided for by the Every Student Succeeds Act. He then announced the formation of the “Governor’s ESSA Team” and stated that “the Governor’s team will work to develop a blueprint for Hawai’i’s public schools that is consistent with ESSA and will maximize opportunities and possibilities for Hawai’i to transform education.” Governor Ige shared his rationale:

“This is a major opportunity to change the face of public education in Hawai’i for the better. Our innovation economy depends on a well-educated workforce to meet the state’s goals in renewable energy, locally grown food production, environmental stewardship and more. It is my hope that the public will participate in this process to help our education system prepare students for high-skill careers in the 21st century. By law, the governor of each state must be involved in and must sign off on the new state education plans that ESSA requires. This is a significant opportunity to change public education in Hawai’i, and we definitely are grasping it.”

On April 28, 2016, nineteen members of the Governor’s ESSA Team convened for the first of many meetings to develop “Hawai’i’s Blueprint for Public Education”; a coordinated, strategic and transparent design that provides the vision, values, and beliefs for public education in Hawai’i. The blueprint was inspired by Governor David Ige and his passion for education and Hawai’i’s students. He called for the ESSA Team to start with a blank sheet and to be bold and innovative.

The Governor’s ESSA Team was fully committed to taking advantage of the passage of the federal Every Student Succeeds Act. Governor David Ige and the Team understand that Hawai’i has an unprecedented opportunity to establish a vision to create the best public education system in the nation.

The purposes of the Blueprint:

- Providing an inclusive and transparent process for engaging stakeholders across all islands
- Articulating a bold and aspirational, vision for public education
- Projecting a long-range view
- Reflecting and communicating the essence of Hawai’i, our unique history, culture, values, and beliefs
- Guiding educational strategic/operational plans, and educational policy for our schools and students
Hawaiʻi’s Blueprint for Public Education is organized around three “Vision Focus Areas” – Student Success, Educator Success, and System Success. Under each Vision Focus Area are the “Design Principles” as recommended by a diverse array of education stakeholders who were engaged in the Blueprint process in town hall meetings and forums held across the state. Each Design Principle is student centered and based on a theory of action that inspires engagement rather than compliance.

**Theory of Action:**
High Expectations + Visionary Leadership + Culture and Conditions that Support Empowerment = Inspiration to Innovate and Excel in Teaching and Learning in our Schools and Classrooms

The Blueprint sets bold aspirations for the future of Hawaiʻi public education

Each Vision Focus Area culminates with a section entitled ‘From Vision to Reality: Aspirational Targets for Success.’ It is in these sections that a new conversation begins for making an inspiring shared vision become real. This conversation begins with setting bold aspirations and challenging everyone to think innovatively as problem solvers creating new structures, processes, relationships, approaches and policies to implement the Hawaiʻi Blueprint for Public Education.
Hawaiʻi’s Collaborative Planning Framework

The passage of ESSA provided opportunities for state education policy leaders to review and align education visions and plans. Hawaiʻi leaders identified three separate but complementary plans to develop:

(1) the Hawaiʻi Blueprint for Public Education;

(2) the joint BOE/DOE Strategic Plan; and

(3) the state ESSA Plan to be sent to the United States Department of Education as required by law.

Governor David Ige convened three meetings for the purpose of bringing leaders of the respective planning efforts together to collaborate and align with one another. These joint meetings involved the Governor, State Board of Education, State Superintendent, members of the DOE leadership team, and members of the Governor’s ESSA Team. A collaborative planning framework was developed, agreed to by all participants, and used to facilitate the three meetings. A diagram of the framework used during the joint meetings is provided below.
State Education Framework

Hawai‘i’s Blueprint for Public Education is the aspirational document that codifies the Governor’s vision and sets broad targets for education reform. This document is not necessarily time-bound and encompasses all state stakeholders, most of which are outside Hawai‘i Department of Education. The joint BOE/DOE Strategic Plan in its current update (2017 - 2020) seeks to balance resources and provide the best possible education for our keiki under the current system. The state ESSA plan is the responsibility of the state DOE and is a derivative of both the blueprint and strategic plan and articulates our vision while complying with federal reporting requirements to receive continued necessary funding. Meanwhile, the law defines a new role for state governors in public education. During the joint education planning meetings, education leaders used the following graphic to guide discussion on the big picture of education in Hawai‘i, the important role of the Department of Education, and the important role of all state departments in supporting public education and the overall well-being of everyone in Hawai‘i.
A Foundation for Excellence

The foundation for Hawai‘i’s public education integrates learning from the past, understanding the present, and designing for the future.

Learning from the Past: He Nuʻu I Kālia ʻIa - A Summit Strived For

Hawai‘i is a special place with a long, complicated and somewhat progressive educational history. The foundation for public education in Hawai‘i was laid more than two centuries ago. In 1841, Kamehameha III organized a national department of public education, operated and taught in the Hawaiian language. Education was made compulsory, beginning at age four, in hālau hula-like schools run by communities to teach literacy. Schools were completely integrated, serving all races and genders and included support for multilingualism (Pukui, Haertig, & Lee, 1979; Wilson & Kamana, 2006). No other state has a history of an earlier compulsory education system, much less a racially integrated one, or one in which compulsory education began at the preschool level. In 1867, Hawai‘i participated in the World’s Fair in Paris, earning a gold medal for its central exhibit on its education system (Wilson & Kamana, 2006). At annexation in 1898, the literacy rate of those who had been educated in Hawai‘i exceeded that of the United States with a large percentage literate in Hawaiian and at least one other language (Wilson & Kamana, 2006; Reinecke, 1969).

With the overthrow and annexation, the purposes and structures of public education shifted. In 1896, the Republic of Hawai‘i closed all public schools taught through the medium of Hawaiian, only to be reestablished by the state legislature in 1986. The groundwork for much of our current system was laid in the context of an economic system driven first by sugar production and later by tourism and American military presence (Perkins, 2006; Sai, 2011). Under American influence, public schools became an explicit site of assimilation and cultural imperialism. Hawai‘i became “Americanized” as a territory, in the first half of the twentieth century, in part through the work of progressive American educators who helped to create two-tiered public school system (English Standard and regular public schools). The regular public schools were institutionalized for working class Native Hawaiians and the children of former plantation workers, who in the latter part of the century began to move from plantation work to the service industry of tourism and into work that was financially supported by increased occupation by the American military. English Standard Schools were developed for white “middle level plantation management and technicians, physicians, teachers, social workers, shop keepers, skilled craftsmen, and members of the American military” (Hughes, 1993; Meller, 1948).

Public education in Hawai‘i is also rooted in a historical context of international imperialism, racism and economic disparities (Kame‘elehiwa, 1992; Kaomea, 2001; Osario, 2002). The Hawaiian Kingdom was overthrown in 1893 and shortly thereafter the Republic of Hawai‘i closed all public schools taught through Hawaiian in preparation for annexation and an increased political control of the sugar plantation owning elite. These changes dramatically affected the public schools as the children of plantation workers grew from a minority of students in the public schools to the core public school population. There was also a major linguistic change from Hawaiian as the normal language of child peer group interaction in the schools to the gradual development of Hawai‘i Creole English for that purpose, albeit with much influence from the Hawaiian language and culture.

Hawai‘i was annexed to the United States at the same time as Puerto Rico and the Philippines. Those two areas then became the source of additional laborers to join Chinese, Portuguese and Japanese laborers already working in the plantations with a remnant group of Native Hawaiians.
there. Japan's imitation of European imperial expansion then resulted in Okinawans and Koreans brought to Hawai'i under national agreements. Public schools where the working-class children came together using Hawai'i Creole English, forged a unified unique local identity that placed high value on honoring ancestral ethnicities while working together under a shared aloha for Hawai'i.

During the long territorial period the ruling elite of Hawai'i, whose children did not attend the public schools, moved back and forth between educational policies that were designed to use the public schools to keep the non-white majority "in their place" and democratic ideals regarding the equity of all. These actions were influenced by a context elsewhere in the United States where, unlike anything in the previous history of Hawai'i, there was strict racial segregation and barriers to Asian immigrants acquiring citizenship. Added to this was American xenophobia emerging first with World War I and then, most harshly for Hawai'i's people, with World War II.

In spite of the historical structural misuse of our public school system, Hawai'i's people as a whole have much to be proud of in what has emanated from the traditional values and ideals that were cultivated by administrators, teachers, and students in our public schools. From the earliest territorial days, strikes and lawsuits against discriminatory practices were based on those ideals. As the shared local identity with Hawai'i grew, so did unified action against injustice. Many of the victories for equality that came to be shared by all the United States were first accomplished in Hawai'i lead by families whose hopes and dreams for the future were nurtured in Hawai'i's public school classrooms. Among such victories were Farrington vs. Tokushige that reaffirmed the right of parents to promote ancestral languages, the election of the first Asians and Pacific Islanders to high government positions, non-white Olympians, and the reversal of federal restrictions on indigenous Americans to use their languages as the medium of education.

Hawai'i's history, including the history of its educational systems, is very different from that of the other states. A clear theme that emerges in considering the history of Hawai'i public education is that the accomplishments which we as an island society are most proud have emerged from values, ideals and practices nurtured in our public-school classrooms and families. At the same time, the very system under which those classrooms operated was not fully aligned with those values, ideals, and practices. Imagine what Hawai'i could be if we could align the system to reflect what has made Hawai'i a beacon in the world that it has long represented.

**Understanding the Present: The Current State of Hawai'i Public Education**

Voices across our state agree that Hawai'i possesses the potential to be a global leader in public education. Our challenge is to engage in transparent, collaborative analysis of our strengths as well as the barriers that hinder innovative solutions to our challenges.

Our unique diversity, combined with our powerful cultural values, is a foundation for excellence. Our hard-working, committed educators possess creative and innovative ideas waiting to be unleashed. Our single state district provides more financial equity than is possible in states with multiple districts and has the potential for a more responsive and forward-moving approach to 21st century schooling.

Hawai'i is already the national leader in culture-based education that is now developing throughout our local communities. Hawai'i is also widely recognized as being in the top tier of international leaders in indigenous language medium education. Our recognition of two official languages, through either of which a student may pursue a full P-20 education, has been a groundbreaking change for equity since 1986. Education through immersion in Hawaiian must be
better integrated into federally funded education initiatives to assure equity to those participating in this model of education.

Moving forward, we need to build on the strengths that give our state public education system a stable foundation. The ESSA Team engaged in a thorough review of statewide data, gathered feedback from individuals and community groups, studied current research, and heard presentations from local and international experts. We have identified areas of excellence that should be sustained, critical challenges that must be addressed, and barriers to change that will need to be overcome.

### Understanding the Present: Areas of Excellence

Access to high expectations for learning

- 43% increase in enrollment of Early College while in high school from 607 (2011) to 789 (2014)
- 30% increase in the number of students taking Advanced Placement Exams from 5,813 (2011) to 8,270 (2015)

Decrease of Repair and Maintenance Backlog from $400 million (2010) to $279 million (2016)

*Data from Strategic Plan (Hawaiʻi Department of Education, 2016)*

### Understanding the Present: Critical Challenges

Here is a typical student moving through Hawaiʻi’s public education system in 2016:

- He or she may be one of the 3,675 students who receive the early learning support of an estimated 35,100 children who need it
- When he or she reaches grade 3, they may be part of the 65% deemed to be proficient in terms of literacy or part of the 35% not proficient
- When he or she reaches grade 11, they may be part of the 53% proficient in reading or part of the 47% that is not proficient
- When he or she reaches grade 11, they may be part of the 30% proficient in math or part of the 70% that is not proficient
- When he or she graduates, they may be part of the 56% going to college, or part of the 44% not going to college
Understanding the Present: Critical Challenges

For a different student who may have different needs:

- If he or she receives special education services
  - they may have an achievement gap of 48% in math
  - they may have an achievement gap of 55% in reading
  - they may have a least restrictive environment gap of 25% when compared to peers nationally

- If he or she receives English Language Learner (ELL) services, the student may part of the 53% of ELL students who graduate or part of the 47% that do not (as compared to 82% of all Hawai‘i students who graduate)

The academic story on average for all public school students in Hawai‘i is that 42% are proficient in mathematics, 43% are proficient in science, and 51% are proficient in reading.

*Data from Strategic Plan (Hawai‘i Department of Education, 2016)*

Another issue of highest priority is the shortage of qualified teachers for our public schools. While there are many reasons that have been identified as contributing to this problem, it has not always been the case that teaching positions were difficult to fill and there have even been teacher surpluses in the past. The isolation of the islands, the high cost of housing and other living expenses, and the relatively lower salary in comparison to other states are all significant factors that contribute to our shortage. However, the working environment and diminishing regard for teachers as professionals may be the greatest barriers to a stable workforce. If we do not address how to elevate the teaching profession in Hawai‘i, then we will have lost an opportunity and may be negligent in maximizing the learning opportunities for our students.

“How we define a successful student should be the measure of how we see a successful community. Our hope is for our students to sustain our community; we need to have that mirror. The current state is one that is encouraging. There is a lot of work yet to do, and understanding what a successful student is, is a key foundation for any blueprint.”

Art Souza, Complex Area Superintendent, West Hawai‘i, ESSA Blueprint Community Meeting, September 21, 2016 at Kealakehe Intermediate School

Public education in Hawai‘i mirrors the diverse communities throughout our island state. Where communities are thriving, the schools, and students are thriving. We recognize that there are areas within our state where issues that stem from poverty and homelessness can overwhelm families and schools. Therefore, we know that the educational solutions for some communities must include social and health supports, in addition to exemplary academics. We also know that approaches to curriculum and instruction need to be differentiated according to the needs of the students and that local schools and complexes are best able to make decisions about what is best. Equality of funding does not result in equity when student and community needs are not the same, and this must be more effectively addressed as we strengthen all Department of Education and Public Charter Schools. Diversity and empowerment go together to serve the various communities and schools and students of our state.
Understanding the Present: Barriers to Change

83% agree that the Hawaiʻi DOE should stop issuing mandates and focus on empowering schools

96% agree that Hawaiʻi needs to encourage innovation and creativity in schools

School-level personnel should be able to have input on how statewide standards and policies are achieved:

- 96% of teachers agree
- 93% of principals agree

Hawaiʻi Principals Survey by Ward Research – May 2016 N = 125
Governor’s ESSA Team Teacher Survey – July to September 2016 N = 834

72% of teachers disagree that “Hawaiʻi DOE schools as a whole are currently “empowered” to an appropriate degree”

69% of teachers disagree that “my school community currently has sufficient control over the curriculum decisions that directly affect our students”

86% of teachers agree that “the students at my school would benefit if my school community has more control over the educational decisions that affect our students”

Governor’s ESSA Team Teacher Survey – July to September 2016 N = 834

Harvard professor and former leader of Finland’s education system, Pasi Sahlberg offers valuable experience and insights:

“...there is another way to improve education systems ...by improving the teaching force, limiting student testing to a necessary minimum, placing responsibility and trust before accountability, and investing in equity in education ...” (Sahlberg, 2015).

Designing for the Future: Responding to a Changing World

Hawaiʻi’s education system needs to create the conditions and culture for decisions about teaching and learning to be made closest to the student learner. Combining our lessons from the past with our understanding of the present context, we can design our future-focused education system based on the following key principles:

- The culture of each school, complex area, and the culture of the entire organization must be positive, inspiring, supportive, and trusting
- There are only two categories of workers in the education system – (1) those who work directly and closely with students, and (2) individuals who support those who work with students
- Each school and community in Hawaiʻi is unique and how we engage students in learning will differ in each context
- Adequate resources must be provided to schools and classrooms with the highest level of transparency about how resources are used; Resources and supports need to be placed in the classrooms and schools or closest to students
Highly effective school principals who are expert instructional leaders, collaborative, and innovative are essential for the requisite empowering leadership at each school.

The system must elevate teaching as a profession, and support and empower teachers to maximize learning for each student.

All students, in all schools, in all classrooms need to be engaged in highly relevant, rigorous, and inclusive teaching and learning.

Students must be prepared to be successful in an innovation-driven economy; learning should foster curiosity, creativity, problem solving, and innovation.

Our design challenge is threefold: First, we must learn from the past and understand the present. Second, we must engage in open, transparent, and collaborative analysis that involves asking hard questions and seeking innovative solutions. Third, we need to anchor our blueprint on our state’s rich strengths and assets. These strengths and assets are exemplified in Board of Education Policy E-3, Nā Hopena A’o, approved in June 2015 (Board - Policies, 2016), and are integrated into the Blueprint’s three Vision Focus Areas.

“Our unique values, sense of place, cultural and linguistic, diversity and strong community are all increasingly important here and around the world.”

Patricia Halagao, University of Hawai‘i College of Education Professor, Testimony to Hawai‘i BOE on November 11, 2016

Nā Hopena A’o (HĀ) is a framework of outcomes that reflects the Hawai‘i Department of Education’s core values and beliefs in action throughout the public educational system. The education system works together and includes everyone in the broader community to develop the competencies that strengthen a sense of Belonging, Responsibility, Excellence, Aloha, Total-well-being and Hawai‘i (“BREATHE”) in ourselves, students and others. With a foundation in Hawaiian values, language, culture and history, HĀ reflects the uniqueness of Hawai‘i and is meaningful in all places of learning. HĀ supports a holistic learning process with universal appeal and application to guide learners and leaders in the entire school community. The purpose of this policy is to provide a comprehensive outcomes framework to be used by those who are developing the academic achievement, character, physical and social-emotional well-being of all our students to the fullest potential.

The HĀ philosophy is a set of six outcomes that are firmly rooted in Hawai‘i. These outcomes contain values that are universal to all cultures. Educating students in an environment of HĀ will add value to and strengthen each person who engages over the course of a learning journey. Education faculty, staff, and stakeholders should also be models of behaviors that direct students to what these outcomes might look like in practice. Those who are moved by the goals and intentions of HĀ are encouraged to use it in their everyday practice.

It is intentional that this education blueprint does the following:

(1) Set forth a bold vision for the future of public education in Hawai‘i;
(2) Use the inspiring outcomes of Nā Hopena A’o as a framework;
(3) Provide a compelling rationale for bold targets and innovative solutions.
Preparation All Students to Succeed Through Culture-Based Excellence in an Innovation Driven Economy

“Future-focused empowered school communities that inspire learning, innovation, creativity, and leadership in a healthy and safe learning environment.”

David Ige, Governor of the State of Hawaiʻi, Hawaiʻi Education Summit on July 9, 2016 at the Hawaiʻi Convention Center

All stakeholders understand the importance of system wide education policy. However, that policy should be crafted to provide schools with the flexibility and autonomy to best meet the needs of the students they serve. Statewide, process-specific mandates in education, like over-regulation in the business world, do not result in the innovation needed to improve education and do not recognize Hawaiʻi’s rich diversity. We believe educators should be held to the highest
standards and given the flexibility to apply their experience, knowledge, and innovative skills to match local needs to best support each individual student.

This document shapes a vision for public education in Hawai‘i to guide students, educators, legislators, labor, businesses, parents, and community members as we work together toward the common goal of fulfilling the promise of public education in Hawai‘i. To accomplish this, the blueprint is organized around “Vision Focus Areas” and “Design Principles” centered around the theme of empowerment within our cultural context.

Each of the three Vision Focus Areas represents an area of reform to our current system. In turn, the Design Principles set forth theories of action for how major growth or change in an area can be realized. Each Design Principle is student centered and is presented through two important frameworks. First are the six outcomes of the framework of Nā Hopena Aʻo to provide a cultural context that is unique to Hawai‘i. The second is a rationale for the Vision Focus Area to explain the sense of urgency and the educationally sound reasoning for the Design Principles that underpin it.

### VISION FOCUS AREAS

Vision Focus Area #1: Student Success

Our vision is for all students to strive for, possess, and apply global learner outcomes to succeed as contributing citizens and productive workers. Our education system will provide students with opportunities to be engaged and inspired by empowering them to make decisions about their learning. We believe that when we establish a context for learning that offers meaningful and relevant learning experiences, students will meet the high expectations for academic and personal development that will foster success in school and in their future.

Student Success and Nā Hopena Aʻo

The Design Principles for student success are soundly aligned to the framework of Nā Hopena Aʻo. First, universal early learning and a focus on positive relationships that grow and evolve through each year of school will strengthen a sense of belonging that is a foundation for sustained success. Next, holding high expectations of personal and academic accomplishment for all students will reinforce our values of responsibility and excellence. Reinforcing social and emotional development and providing pathways for multilingualism will result in strengthening a sense of aloha with respect and honor for Hawaiʻi throughout our public education system. We want to be deliberate about developing students who embrace diversity, empathy and compassion. They will be civic minded, and caretakers of our unique island environment as well as global citizens who carry the values of Hawaiʻi throughout the nation and the world. Finally, we recognize that social, emotional, and physical total well-being are essential components for personal development and success in life. This understanding will guide our decisions about curriculum, instructional practices, and student assessment as we move forward.

Rationale

When President Obama signed ESSA into law on December 10, 2015, he made a profound declaration about how we need to change existing thinking about student success:

“This law makes long overdue fixes to the last education law replacing the one-size fits all approach to reform with a commitment to provide every student with a well-rounded education. It helps states and districts reduce unnecessary standardized testing we want to get rid of unnecessary standardized tests so that more teachers can spend time engaging in student learning while at the same time making sure parents and teachers have clear information on their children’s academic performance” (Davis, 2015).

Governor Ige saw the potential for this legislation to be the impetus for positive changes in public education in Hawaiʻi. He began to gather information from both educators and the public about their ideas for this transformation, beginning with redefining student success.

The Executive Office of Early Learning presently provides publicly funded preschool for 420 students in 21 classrooms in 19 schools. This is only 2.4% of state’s four-year-old population. Research shows that a child’s learning begins long before kindergarten and 92% of brain development occurs before the age of five. Research also shows that students from economically disadvantaged families begin school an average of 12 to 14 months behind their peers in language development and reading skills. To improve public education in Hawaiʻi, we need to invest smarter and we need to start earlier by expanding early learning. Experts report that states can expect a significant return on investment for early education – a return of seven dollars for every dollar invested in high quality preschool programs when comparing resources required to attain successful outcomes in a school career. Research also supports the cost effectiveness of early
child development in helping to prevent achievement gaps, boost school achievement, promote better health outcomes, improve our workforce, increase productivity, and reduce crime.

In January 2016 Ward Research conducted a statewide survey on education issues in Hawai‘i. A surprisingly high percentage (44%) felt that there was too much emphasis on standardized testing in our state. This had not been discussed much in public venues and the researchers did not expect it to be of concern to so many. In July 2016 when Ward Research surveyed principals, 84% felt that the DOE should consider changes in the Smarter Balance Assessment and 85% agreed that the testing time should be reduced. Most principals (74%) recommended that the DOE consider alternatives to the Smarter Balance Assessment, such as portfolios, and demonstrations of competencies. In September 2016, the organizations representing Hawai‘i Elementary and Middle School Administrators Association (HEMSA) and Hawai‘i Association of Secondary School Administrators (HASSA) identified the need for more support in assessment literacy. In September 2016, the Governor’s ESSA Team surveyed teachers across the state and found that the clear majority (91%) felt that the DOE should consider changes in the current state testing program; and, like the principals, most felt the testing time should be reduced and that more authentic assessment models should be considered. In addition, there was a strong interest in the option offered by the new legislation for selected states to pilot new testing options. In 2010 forty-five states agreed to join a consortium that would teach and test Common Core Standards, which led to Hawai‘i’s commitment to Race-to-the-Top. As of 2016 we are one of only fourteen states still using the Smarter Balance Assessment. We believe it is time to reconsider our commitment, also.

**Design Principles**

*High Quality Early Childhood Education * Global Learner Outcomes
*Balanced Assessments and Testing in the Service of Student Learning * Student Empowerment, Student Voice * Student Wellness, Social Emotional Learning, Health/Fitness Needs *
Opportunities for Student Success * Pathways for Career and Technical Education *
Pathways for Multilingualism * Equity and Excellence: Eliminate the Achievement Gap*

**High Quality Early Childhood Education for All Learners**

Early childhood education is defined in statute as “developmentally appropriate early childhood development and education for children from birth until the time they enter kindergarten” (Relating to Public Early Childhood Education Act 109, 2015). Hawai‘i’s educational system will expand to include more access to high quality early childhood programs which will target those who are most in need. Children that because of their home and community environment, are subject to language, cultural, economic, and other disadvantages. Hawai‘i will continue to implement high quality early childhood programs based on what neuroscience tells us about how children learn best. Hawai‘i will also provide programs that increase the knowledge base of families, schools and communities so that they will be empowered and ready to support all children to be successful in school and life. Families are a child’s first and lifelong partner in education. Therefore, schools will embrace families by engaging them at the earliest possible stage in their journey to be true partners in their child’s development and learning.

In 2014, Act 122 appropriated $3 million for pre-kindergarten programs to be implemented in fiscal year 2015. Through a partnership with the Department of Education, the Executive Office on Early Learning launched Hawai‘i’s first Public Pre-Kindergarten Program which currently consists of 21 classrooms in 19 schools across the state and serves 420 four-year old students in the year before they attend kindergarten. In 2015, the program received a 9 out of 10 rating on the research-based National Institute for Early Education Research Quality Standards
Benchmarks. To sustain a high level of quality in the Public Pre-Kindergarten Program, Hawai‘i will implement an Early Learning Academy for principals and school teams to support and ensure the use of developmentally appropriate early childhood education practices such as aligning curriculum with Hawai‘i Early Learning and Development Standards (HELDS), use of formative child assessments, and classrooms that promote positive student-teacher relationships beginning with pre-kindergarten and continuing through the early elementary grades.

Hawai‘i’s high quality early learning system will be strengthened through cross-systems partnerships and “whole child” supports focused on the well-being of families, based on the concept of ‘Ohana Nui. ‘Ohana Nui is the State’s multigenerational approach that invests early and concurrently in children and families to improve health, education, employment, and other outcomes. ‘Ohana Nui is integrated into State programs, policies, and philosophies to ensure we address the root causes, or social determinants of health. These include healthcare, education, safety, living/work environments, and housing. A more targeted emphasis on healthy starts for all children, including access to health insurance, mental and dental services, and early intervention supports that include vision, hearing, developmental and mental health screenings early on will lay the critical foundation for success. This approach will empower Hawai‘i to more efficiently align programs and funding to make a bigger impact on Hawai‘i’s children and families.

Global Learner Outcomes

Our schools will prepare students for the unknown future world by assuring that they have the skills and dispositions of a global learner: Complex Thinker; Effective Communicator; Self-Directed learner; Community Contributor; Quality Producer; Effective and Ethical User of Technology; and Creative Innovator.

Balanced Assessments and Testing in the Service of Student Learning

Our Hawai‘i Public Schools will be guided by the core belief that education assessment will be conducted in the service of student learning and that all educators possess the skills for reflection and refinement of this professional practice. Schools will use a variety of assessments that measure student learning and allow students to show what they have learned in different ways. Standardized testing will be minimized as schools and teachers develop assessments that measure and support student growth.

There will be a clear distinction among assessments that are used to measure progress within the statewide system, progress within the school, and individual student growth. The priority will be assessment for individual student learning.

All educators will possess assessment literacy skills and will engage in reflection and decisions about refining this important professional practice. Professional educators will develop and determine appropriate assessments from a repertoire that includes measures that are formative, culturally relevant and performance-based.

System-wide performance can be measured by valid and reliable testing practices that involve sampling rather than requiring the testing of every student. Additionally, it should be determined whether testing needs to occur in grades 3-8 as is currently done.
Informed use of assessment must include differentiating assessments and their purposes as follows:

(a) large scale assessments used to inform the entire system performance, 
(b) assessments used to inform school performance, 
(c) assessments used to inform classroom performance, and
(d) assessments used to inform student performance.

Students should be assessed on the attainment of Global Learner Outcomes through performance tasks, senior projects, or other similar forms of authentic assessment.

Assessment policies and practices will be aligned to the areas we have identified as important for student learning. Testing results will be shared in a timely manner with students, teachers, and parents so that changes can be made in the teaching and learning process that will impact student progress.

Education assessments will be designed and prepared with integrity, and delivered with respect and caring for students. There will be recognition and appreciation of each student’s cultural history, language, and values.

Educational assessments will be designed to efficiently assess student learning and minimize testing time.

**Student Empowerment, Student Voice**

Students will be empowered to take more responsibility for their own learning. We will listen to their voices through a variety of meaningful venues, including the student member on the Board of Education, state and school student councils, student publications, and from feedback collected and used by teachers in the classrooms. When learning is more personalized and students are assessed authentically on self-directed projects we believe both rigor and engagement will be increased. It will be important to recognize that some students may not feel empowered as a result of language difference and so we must value their multilingual abilities as assets and resources for sharing their voice.

**Student Wellness, Social Emotional Learning, Health/Fitness Needs**

All Hawaiʻi students need explicit social emotional learning supports to access curriculum and programs in physically and emotionally safe environments. Students learn empathy in a diverse cultural environment where collaboration with and compassion for others is emphasized. We will continue to create school communities where aloha, well-being and belonging are valued and evident. We will include these considerations in teacher-recruitment efforts and expanded support for school counseling.
Opportunities for Student Success

Implementation of a new comprehensive system of pathways will be provided for all students beginning in elementary school. Pathways will guide all students who aspire either to traditional colleges or post-secondary career and technical education.

₁ There will be increased support for professional development for educators seeking effective strategies for student engagement. Educators with innovative ideas for implementing new and creative practices will be encouraged and supported.

₂ It will be important to have focused professional development based on the needs of students and communities. We will align professional development resources to support student success objectives and be responsive to the identities and needs of individuals, schools, community, complexes, and state offices (e.g. interdisciplinary and relevant lessons, social-emotional learning, instructional strategies to address all types of learners, special education inclusion, language development, and quality classroom assessments).

₃ There will be an early identification of student passions, aspirations, and curiosities that will be fostered through a strength-based approach. We will promote student voice and leadership throughout the school and the larger education system and encourage their engagement in addressing school problems and participating in decisions.

₄ There will be a focus on implementing the middle school philosophy for all middle schools, as well as differentiating support for elementary and high schools.

Pathways for Career and Technical Education

The students in our public schools will have opportunities to choose career pathways that lead to a range of professional and technical careers. We will expand partnerships with higher education and industry to assure that our students are well-informed and prepared for success beyond high school. Early college admissions, internships, and industry certifications will be available in a wide variety of pathways for all students to explore and develop specific skills.

Pathways for Multilingualism

Hawai’i’s educational system will continue to offer the choice of education through either of its two official languages. Both its Hawaiian and English medium schools will provide increased opportunities and support for multilingualism to include proficiency in Hawai’i’s immigrant languages as well as the two official languages.

Considering the new ESSA accountability system, which requires more English Language Learner (ELL) oversight, all levels will work together to increase resources to improve ELL services and develop new innovative initiatives focused on multilingualism. Resources will be provided to increase ELL staffing at the central office to provide stronger systemic support to schools and students. Resources will be provided at the school level for more professional development, curricula, translators and interpreters, and outreach support for families (i.e. bilingual/bicultural school-home assistants, newcomer centers). Resources will be provided toward dual language programs for its largest immigrant languages at the early-childhood and elementary levels, which are proven to show the most impact on academic achievement and English development. Hawai’i will develop a professional pipeline to recruit, train, and support multilingual community members who are para-professionals or part-time teaching assistants to gain teacher certification.
to increase the pool of qualified ELL and/or multilingual teachers. Hawai‘i will also develop a monitoring system to ensure that there are qualified teachers to serve our students.

**Equity and Excellence - Eliminate the Achievement Gap**

The Hawai‘i Public Schools will foster equity and excellence for all students through high expectations for learning the skills needed for success in the 21st century. Student success will be redefined to include more than test scores as schools are empowered to identify and address the strengths and needs of their own students. Quality early learning programs for all students, culturally and contextually relevant learning experiences in all schools, and licensed, certified, and effective teachers in every classroom will lead to the elimination of the achievement gap.

**Vision to Reality: Aspirational Targets for Student Success**

As we move forward we envision a renewed public education system that embraces a culture of empowerment, innovation, equity and visionary leadership. We believe that there are aspects of this blueprint that can begin immediately:

**High Quality Early Learning will be expanded and implemented in 2017**

- The State Early Learning Plan will be completed in 2017 and the Hawai‘i Early Learning Academy will be implemented in school year 2017-2018.
- ESSA Title I funding can be used to expand public preschools.

**The learning achievement gaps will begin closing in 2017 and will close by 2020**

- The larger system will empower schools to identify what they need to close the gaps in achievement that are experienced by special needs students, English language learners, and students from families who live in poverty. High quality professional development and resources, including Title I funding, to support the educators and schools where these students learn will be made available. As students gain proficiency and progress through a supportive system, the learning gaps will close.

**Hawai‘i will elect to pursue a new assessment model through the ESSA Pilot Program for Authentic Assessment.**

- All assessments we implement will recognize that the student is the center of all our professional practices and the accomplishments that we monitor should reflect our whole-child vision and values.

**Vision Focus Area #2: Educator and Staff Success**

Our vision is for all educators and staff to model the Global Learner Outcomes needed to succeed as innovative, contributing citizens of society as well as members of our workforce, community, family, and school. Educators and staff will be held to high expectations for modeling and fostering curiosity, creativity, collaboration, critical thinking, and risk-taking. Educators and staff will seek engaging, empowering, and inspiring opportunities to make decisions about and deliver meaningful and relevant teaching and learning experiences.

**Educator and Staff Success and Nā Hopena Aʻo**

The design principles in this focus area are naturally aligned to the framework of Nā Hopena Aʻo. Strengthening a sense of belonging begins with empowering educators and staff to build relationships that will sustain their communities and allow them to flourish. Enhancing
responsibility and excellence begins with high expectations that all educators and staff will embrace global learning outcomes and strive to achieve personal levels of excellence and equity. Strengthening a sense of aloha is embodied through our focus on developing schools where all educators and staff are empathetic, compassionate, civic-minded, caretakers of our natural environment, and protectors of the most vulnerable among us. Strengthening the sense of total well-being prioritizes support for the social-emotional, wellness, and health needs of educators, staff, and students. We will recognize the connections between mental, physical and spiritual well-being. We will sustain educators and staff who show deep understanding and appreciation in the values, principles, and beliefs of our history and culture. Our sense of Hawai‘i will reflect a commitment to treating others with compassion, tolerance, understanding and humility.

**Rationale**

Teachers, principals, and school support staff are the heart of our instructional system. Our keiki in Hawai‘i deserve the best school leaders and educators we can provide. School leaders are challenged to work with school communities, parents, teachers and students in meaningful ways to create relationships and a shared vision for the school. This challenge is made more difficult by the amount of time that must be dedicated to complying with system-wide directives and mandates. Principals and teachers have told us through surveys and at forums that they are spending less time on instruction and other student and professional peer interactions, and more time completing requirements that seem only marginally connected to student learning.

We have difficulty retaining new teachers with nearly 50% leaving before they complete five years of teaching. Experienced teachers are often choosing to leave the profession sooner than they had planned, or leave the public-school system for work in private schools. The recruitment of the next generation of qualified teachers has reached a crisis. Issues relating to teacher compensation, working conditions, and the loss of teacher autonomy are all contributing to the acceleration of this dramatic attrition rate. We must address this crisis through systemic and visionary policy shifts that will elevate the profession of teaching and create a pipeline of experienced and pedagogically grounded educators to deliver engaging and effective instruction in the classroom. Transformation of school culture to one of collaborative empowerment will occur when educators and administrators are empowered to engage their communities in creating a vision and acting to bring their unique visions for student learning into reality.

A recent report of the findings from principal forums of the HEMSA and the HASSA in October 2016, identified the following recommendations to address seven issues determined to be of highest priority:

- Create/support in every school, a system for formative assessment and instruction where teachers meet regularly under the guidance of a coach to deconstruct standards, review assessment data and determine appropriate instructional strategies.
- Create/support in every school, an accountability system that provides choices and options in measuring student progress that meets the needs of the school community in raising student achievement.
- Create/support in every school, administrator and teacher competencies in using differentiated practices for pre, formative and post assessment to raise student achievement for all students.
- At state, district, complex and school levels, use an adequate system of support for school leadership involving the voice of principals in making decisions regarding what is needed.
by the administrators and the teachers.

- Create/support in every school an adequate system for struggling students that engages all students in the learning process through unique interventions that meet each student’s learning targets.

- Create a culture that all work at the state, district and complex levels are focused on supporting schools in meeting their unique needs in unique ways and that one size does not fit all schools. The mission at state, district, complex, and school levels must promote and create opportunities for school innovations that meet all dimensions of students.

- Create an adequate system to support a creative (not rule bound) and growth mindset that aligns resources through involvement of principals in decision making, empowerment of all school/community level users and true team work among the various levels to support what’s best for schools.

**Design Principles**

* System Leadership * School and Principal Leadership and Support

* Classroom Teacher Leadership and Support *

**System Leadership**

System leadership, at its core, will be reconceived to include the Governor and key decision-makers from the BOE, DOE, and the State Legislature. Effective and empowering system leadership will create an environment of trust and empowerment. Our system will move from traditional accountability to collaborative, trust-based responsibility. Effective and empowering system leadership requires transparency in all processes. Effective and empowering system leadership finds innovative, collaborative, and effective ways to address these issues.

System structures will be thoughtfully designed using “futures thinking” that begins with the end goal in mind. Accountability and evaluation processes will provide clear, coherent, and inspiring expectations and visionary goals that drive desired best practices in classrooms, schools, and communities.

**School and Principal Leadership and Support**

Hawai‘i public schools will each have a highly effective instructional leader who is committed to students, staff, and the community. School principals will demonstrate the dispositions that foster innovation and creativity in learning. They are expert instructional leaders whose collaborative and innovative skills are essential for the requisite empowering leadership at each school. They will take risks and allow others to take risks throughout the processes of growth and innovation. They will understand that there is learning through failure, and that our positive response to failure, is essential to the learning process. School leaders will model and demonstrate empowering leadership. They will have a deep commitment to collaboration and shared decision-making.

To accomplish this transformation, we will need to reform the recruitment, selection, and professional development programs that develop and support school leaders. We will move from models of training for compliance to new models that identify emerging leaders who are committed to building and enhancing the qualities they will need to lead their schools in this new era. School leaders will be evaluated on their ability to establish or expand a culture of empowerment throughout their schools. An evaluation system that rewards empowerment,
innovation, collaboration and community-building will be implemented and will guide professional support for school leaders.

**Classroom Teacher Leadership and Support**

Individuals choose the profession of teaching because they want to help children, young people and adults explore their talents and learn the skills they need to live quality lives. For most in this profession, teaching is a passion that emerges from the joy they experience in learning. Our system must support and sustain teachers who come to our classrooms and schools committed to the mission of promoting the joy of learning in others.

The Hawai‘i public school system will attract, recruit, select, train, and retain the very best educators at all levels. All educators will be empowered to be empathetic, innovative, and courageous advocates for students, their schools and public education. These educators will be able to build strong relationships, make learning relevant, and foster success through rigorous student learning opportunities that promote sustainability, democratic principles, and shared values that are grounded in Hawai‘i’s history, culture and diverse society.

Students will be engaged in learning by teachers who are provided opportunities to teach to their passions, inspire innovative learning for curious and creative learners, and deliver relevant and rigorous instruction and assessment for attainment of global learning outcomes. Enthusiastic and passionate teaching leads to enthusiastic and engaged student learning.

Teachers will have more influence over their working conditions and their capacity, within positive learning environments, to contribute to student learning and engagement. Teachers will be empowered to make decisions on content and pedagogy through powerful professional learning communities in collaboration with their school community. This will contribute to a greater sense of efficacy and will increase teacher job satisfaction.

Teachers play a critical role in building student confidence and creating an environment in which students can begin to exercise democratic principles and empowerment. Empowered teachers are in the best position to empower students because they can effect change in their classrooms, and as part of the school’s professional learning community. There will be an understanding that empowerment is a process by which people make decisions closest to the place of implementation.

**Vision to Reality: Aspirational Targets for Educator Success**

As we move forward to implement a renewed culture of empowerment, innovation and leadership in our public school system, we will begin immediately to move toward the following targets:

- Hawai‘i will begin the redevelopment of leadership selection and training in 2017 and will have an exemplary leadership development program by 2020. Title II funds may be used to enhance this program.

- Our most qualified college students and graduates will regard the profession of teaching as a desirable aspiration and dedicated, qualified teachers will teach all public school students by 2020.

- Federal funds identified in ESSA can be used to support practices and policies designed to retain public school teachers and elevate their professional status.
Teacher evaluation will be designed in the service of student learning to support learning through promoting innovation, student engagement, student empowerment, and the recognition of teacher professionalism.

Vision Focus Area #3: System Success

Our vision for Hawai'i’s public education system is for a department that recognizes that its primary mission is to help schools address what principals and teachers have identified as priority needs in support of student success. The leaders in our statewide system of support will manage human, community and financial resources in a way that reflects a clear understanding that all efforts are focused on improving the experience of students in our classrooms. As with our visions for student and staff success, we believe that the Nā Hopena Aʻo framework will be the guide that supports the conditions for a new culture of empowerment, innovation, and leadership at every level within the Department of Education. Systems for accountability and evaluation will include high expectations for performance of students and staff, along with compassionate support for self-correction and continuous improvement.

System Success and Nā Hopena Aʻo

We are fortunate to share a history and culture in Hawai'i that values our diversity while embracing the value of aloha that is reflected in the framework of Nā Hopena Aʻo. We look to success as our public education system transforms for the 21st century and school communities are empowered by strengthened senses of belonging and responsibility as they develop ownership for improving educational programs for their students. Systems of support for the schools will build greater capacity for excellence and a renewed sense of well-being among those who work directly with students and among those who support them.

Rationale

There has been strong support from students, parents, teachers and school leaders for a renewed public education system that places authority and responsibility for decisions affecting students with those who work in the schools. The surrounding system should be one of support for teachers, principals and support staff who work directly with students. We have studied exemplary school systems both outside of the United States and within our country. They share qualities to which we aspire, including collaborative decision-making, financial transparency, authentic learning and assessment, and innovation that emerges from the unique needs of individual schools. They also have a high regard for and trust in the professionalism of educators. We can see the need to redefine success and develop a broader definition of student and school success. In Hawai‘i there are models of excellence in both the charter and regular Department of Education schools. We can look to these schools and their leaders to show the way as we work to establish a statewide system where all schools can be models of excellence.

Over the last two years there has been considerable feedback from teachers and school leaders through surveys and forums in support of a system that is turned “right side up” so that reform is driven from the school and community with a surrounding system of support from state and complex staff. We believe that there is the needed leadership, expertise and commitment within Hawai‘i to accomplish this.
Design Principles

* School Empowerment * Empowering Communities * Engaging Parents and Families *
Innovation for Learning * Learning Environments * Continuous Improvement
* Transparency for Resources and Funding *

School Empowerment

Decisions about students, teaching and learning will be made as close as possible to the classroom. Our public schools and communities will design a system that recognizes and trusts the wisdom and judgment of educators in the schools and reverses the current model that operates through “top-down” mandates. State and Complex Area Leadership along with principals and school staff will receive support and professional development as we move into this new era.

Our new system will reflect our core values and beliefs and include clearly defined responsibilities at all levels within the Department of Education. There will be significantly more autonomy in decisions that concern schools, students and those who work with them. The statewide system will be transparent about resources and expenditures to provide support to schools in alignment with identified needs. We will see collaboration among leaders across all levels and between principals and school staff. Our new system will have accountability systems that promote empowerment, innovation, student engagement, and total well-being of learners.

Empowering Communities

The communities that surround and support our public schools will be encouraged to engage with their local schools to design the new system where decisions are made close to the classrooms. School-community empowerment will include partnerships with state agencies, organizations, colleges, public libraries, and businesses that will join with us to foster learning throughout the state.

Engaging Parents and Families

Supporting parent and family engagement will be a priority for school leaders, teachers, and support staff. Principals will be encouraged to develop engagement strategies that consider the culture and recognize the individual and collective needs within the community. Schools that no longer include resources for Parent and Community Networking Centers (PCNC) may want to revisit that option and training support should be made available. Schools will build partnerships with families, honor their contributions, and provide share decision-making opportunities to sustain connections that are aimed at improving student learning.

Innovation for Learning

The Hawai’i public schools will create and sustain a culture that values innovation and unleashes curiosity and creativity in all learners. Innovations by charter schools will be embraced and supported. Leadership development will focus on engagement, empowerment, and innovative practices and approaches in leading, teaching, and learning.

Our public charter schools will be recognized system-wide as models of innovation and will be recognized through Board of Education policy for their role as incubators for diverse approaches
to learning. There will be visionary leadership, implementation, and support for the sharing of ideas, knowledge, and experiences among charter and regular Department of Education schools.

System leadership will establish a culture that encourages innovations, and safe environments for taking risks. Leadership will provide opportunities and support for teachers, schools, and complexes to pursue innovations that they identify as promising strategies for their communities.

**Learning Environments**

We recognize that as we move further into this new education century, our public school learning environments will need to adapt. We will identify innovative, cost-effective strategies that will provide the best possible environments for students and teachers in both early learning and K-12 programs. We will transform traditional schools and classrooms into flexible, well-resourced learning areas that are clean, safe, ecological, and conducive to creative, engaging teaching and learning. We have models to learn from in both our charter and regular public schools and we can leverage existing laws, such as Act 155, and work with the legislature and Board of Education leadership to identify where new laws or policies are needed.

Our schools will find ways to incorporate learning environments that take full advantage of local community resources with existing or renewed environments within school facilities.

**Continuous Improvement**

Continuous system-wide renewal depends upon ongoing education research and learning. We will establish a world-class research and design (R&D) center that supports all levels of education within Hawaiʻi. The center will inform policy makers and stakeholders about current research in educational innovation, learning gaps, cognitive and emotional learning, assessment practices, instructional leadership, and practices for assuring qualified, effective teachers in every classroom.

We will also pursue disciplined inquiry to develop, test, and refine interventions that support needs that have been identified by schools and complexes and identify strategies for sharing and implementing best practices beyond individual schools. We will engage in research practice partnerships to meet accountability expectations and partner with the research community to develop and improve site-based programs and practices. We will address technical and adaptive problems of practice by leveraging the expertise and experiences of educators and researchers through mutual partnerships.

**Transparency for Resources and Funding**

A core goal of ESSA is to enable parents and other stakeholders to engage meaningfully with their education systems. This is only possible when everyone has access to clear, complete and timely information about how students and schools are doing. To accomplish this goal, the proposed regulations seek to ensure that states and districts work with parents and other stakeholders to develop report cards and make them publicly available no later than December 31st of each year. These report cards shall include accountability information (including student assessment outcomes and graduation rates) in an easily accessible manner, so that stakeholders can fully understand school performance. The information will also enable them to participate more effectively in developing solutions for challenges facing the schools and students in their communities.

The new law ensures more transparency for parents, educators and community members around resource equity measures, such as access to preschool, access to rigorous coursework, and school
discipline. It also clarifies that state and local report cards must include specific information about district and school-level per-pupil expenditures that are calculated on uniform, state-developed procedures. This is to ensure that parents and educators can see with transparency into all school funding. There is also an expectation that we will improve the quality of postsecondary enrollment data so that stakeholders have greater insight into student preparation for programs in postsecondary education.

**Vision to Reality: Aspirational Targets for System Success**

As we begin the process of turning public education “right-side up” we will start by moving to a system culture that expresses and practices empowerment of others through policy and action. Visionary leadership at all levels within the system will embrace and support innovation. We believe the following are possible by the time indicated:

- Innovation for Learning initiatives will be implemented in 2017.
- Systemic School Empowerment will begin implementation in 2017.
  - New ESSA Report Cards that provide transparency for school expenditures and school funding by 2018.
- High Quality Early Education will begin implementation in 2017 and expand statewide each year.
- Hawai‘i will begin the redevelopment of leadership training in 2017 and will have an exemplary leadership development program by 2020.
- Our most qualified college students and graduates will regard the profession of teaching as a desirable aspiration and dedicated, qualified teachers will teach all public school students by 2020.
- The achievement gaps in learning will begin closing in 2017 and will close by 2020.
- Hawai‘i will be acknowledged as having the nation’s top public education system in 2025.
Appendix A: Sources

Appendix B: Glossary of Terms

**Accountability/School Accountability** - the process of evaluating school performance on the basis of student performance measures.

**Achievement Gap** - The term achievement gap is used to refer to the observed, persistent disparity of educational measures between the performance of groups of students, especially groups defined by socioeconomic status (SES), race/ethnicity and gender.

**Assessment FOR Learning** - (Formative Assessment) a process used by teachers and students as part of instruction that provides feedback to adjust ongoing teaching and learning to improve students' learning and achievement of content and skills.

**Assessment OF Learning** – assessment strategies where teachers use evidence of student learning to make judgements on student achievement against goals and standards. It is usually formal, frequently occurring at the end of units of work where it sums up student achievement at a point in time.

**Authentic Assessment** - the measurement of intellectual accomplishments that are worthwhile, significant, and meaningful, as contrasted to multiple choice standardized tests. Authentic assessment can be devised by the teacher, or in collaboration with the student by engaging student voice.

**Career Technical Education (CTE)** – an approach to provide students of all ages with the academic and technical skills, knowledge and training necessary to succeed in future careers and to become lifelong learners.

**Continuous Improvement** - an ongoing effort to improve products, services, or processes. These efforts can seek "incremental" improvement over time or "breakthrough" improvement all at once.

**Early Learning** – a program or approach to improve the health, social-emotional, and cognitive outcomes for all children from birth through 3rd grade, so that all children, particularly those with high needs, are on track for graduating from high school college- and career-ready. To enhance the quality of programs and services and improve outcomes for young children, including children with disabilities and those who are English Learners, the department administers programs and promotes initiatives that increase access to high-quality programs, improve the early learning workforce, and build state capacity to support high-quality programs and ensure program effectiveness.

**Empowerment/School Empowerment** - School empowerment recognizes the uniqueness of each school community and that one size rarely fits all. An empowered-school system requires a philosophical shift in which DOE employees fall into either of only two categories: those who work directly with students, and those who support the efforts of those who work directly with students. Teachers in an empowered school determine how to satisfy statewide standards and policies. They also have ready access to information about their school’s budget and have a voice in all important matters affecting their respective school. And they play a meaningful role in holding their principal and other administrators accountable. Principals have significantly greater control over financial and staffing decisions in empowered schools, but they must constantly engage the entire school community —teachers, parents, librarians, cafeteria workers, custodians, and anyone else who sees the students daily — in meaningful discussions about spending, staffing, and curricular and instructional decisions. Students in empowered schools
have a voice that increases from elementary through high school, and student aspirations beyond high school determine student-centered learning programs in which learner empowerment and learner accountability are aligned and emphasized. Statewide standards, policies and learning goals continue to play major roles in an empowered-schools system, and non-school staff continues to provide services to the schools. However, those who set standards and promulgate policy never control the means by which school-level personnel achieve desired results, and services providers cannot take for granted their “customers.” School-level personnel unhappy with services provided by the DOE have the option of seeking those services elsewhere. The adults in an empowered-school system model shared values such as collaboration, transparency, integrity, equity and life-long learning. They also embrace clarity of responsibility, especially those that focus on student achievement, and maintain a system-wide commitment to capacity-building for instructional and other forms of leadership. School empowerment includes decentralized decision-making and school-level accountability: accountability without empowerment is unfair and ineffective, and empowerment without accountability would lead to chaos.

**Equity or Educational Equity** - a measure of achievement, fairness, and opportunity in education. The study of education equity is often linked with the study of excellence and equity. Educational equity is dependent on two main factors. The first is fairness, which implies that factors specific to one's personal conditions should not interfere with the potential of academic success. The second important factor is inclusion, which refers to a comprehensive standard that applies to everyone in a certain education system. These two factors are closely related and are dependent on each other for true academic success of an educational system.

**Global Learning Outcomes/General Learner Outcomes (GLOs)** - The Department's General Learner Outcomes are the overarching goals of standards-based learning for all students in all grade levels. For many years, through changes in leadership, assessments and curricula, the General Learner Outcomes have remained consistent. They are: Self-directed Learner (The ability to be responsible for one's own learning); Community Contributor (The understanding that it is essential for human beings to work together); Complex Thinker (The ability to demonstrate critical thinking and problem solving); Quality Producer (The ability to recognize and produce quality performance and quality products); Effective Communicator (The ability to communicate effectively); Effective and Ethical User of Technology (The ability to use a variety of technologies effectively and ethically). The addition of the outcome, “Creative Innovator” defines the change from General Learner Outcomes to Global Learner Outcomes.

**Improvement Science** – an approach and framework developed by the Carnegie Foundation to accelerate how a field learns to improve. Improvement science deploys rapid tests of change to guide the development, revision and continued fine-tuning of new tools, processes, work roles and relationships. Improvement science is explicitly designed to accelerate learning-by-doing. It's a more user-centered and problem-centered approached to improving teaching and learning. As the improvement process advances, previously invisible problems often emerge and improvement activities may need to tack in new directions. The objective here is quite different from the traditional pilot program that seeks to offer a proof of concept. Improvement research, in contrast, is a focused learning journey. The overall goal is to develop the necessary know-how for a reform idea ultimately to spread faster and more effectively. Since improvement research is an iterative process often extending over considerable periods of time, it is also referred to as continuous improvement.

**Innovation** – a significant positive change; a new idea, method, or product; the action or process of innovating. This is a high bar, and it should be. To call every change you make in your work an
innovation belittles the possible scale of progress. The act of creating something, even if it solves a problem, should perhaps still not be considered an innovation until it is adopted by other people, it’s just an invention with the potential to be an innovation.

Nā Hopena Aʻo (HĀ) - a framework of outcomes that reflects Hawaiʻi Department of Education’s (HIDOE) core values and beliefs in action throughout the public educational system of Hawaiʻi. HIDOE works together as a system that includes everyone in the broader community to develop the competencies that strengthen a sense of belonging, responsibility, excellence, aloha, total-well-being and Hawaiʻi (“BREATH”) in ourselves, students and others

Network Improvement Community - a scientific learning community distinguished by four essential characteristics: (1) focused on a well specified aim, (2) guided by a deep understanding of the problem, the system that produces it, and a theory of improvement relevant to it, (3) disciplined by the rigor of improvement science, and (4) coordinated to accelerate the development, testing, and refinement of interventions and their effective integration into practice across varied educational contexts.

Social Emotional Learning - a process through which children and adults acquire and effectively apply the knowledge, attitudes, and skills necessary to understand and manage emotions, set and achieve positive goals, feel and show empathy for others, establish and maintain positive relationships, and make responsible decisions.
Appendix C: Stakeholder Engagement Information

Governor’s ESSA Team Community Town Hall Meetings

The following are examples of stakeholder engagement and community meetings held to collect input and feedback for co-creating an education blueprint:

- Hawai‘i Education Summit at Hawai‘i Convention Center, July 9, 2016 (1000)
- ESSA Town Hall Meeting at Kapolei High School, July 27, 2016 (130)
- ESSA Town Hall Meeting at Kalani High School, August 10, 2016 (130)
- ESSA Town Hall Meeting at Kealakehe High School, August 17, 2016 (110)
- ESSA Town Hall Meeting at Waimea High School, August 22, 2016 (30)
- ESSA Town Hall Meeting at Chiefess Kamakahelei Middle School, Aug 24, 2016 (120)
- ESSA Town Hall Meeting at Waiākea High School, August 24, 2016 (150)
- ESSA Town Hall Meeting at Kaunakakai Elementary School, August 27, 2016 (20)
- ESSA Town Hall Meeting at Castle High School, Sept 7, 2016 (205)
- ESSA Town Hall Meeting at Maui High School, Sept 7, 2016 (75)
- ESSA Town Hall Meeting at Lanai High and Elementary School, Sept 8, 2016 (25)
- ESSA Town Hall Meeting at Moanalua High School, Sept 14, 2016 (130)

Governor’s ESSA Team Education Blueprint Community Forums

The following are examples of stakeholder engagement and community meetings held to collect additional input on progressive drafts of the education blueprint:

- ESSA Hawai‘i Education Blueprint Forum at Kealakehe Intermediate School, September 21, 2016 (91% support blueprint vision focus areas)
- ESSA Hawai‘i Education Blueprint Forum at Kamakahelei Middle School, September 28, 2016 (83% support blueprint vision focus areas)
- ESSA Hawai‘i Education Blueprint Forum at Hilo High School, October 5, 2016 (80% support blueprint vision focus areas)
- ESSA Hawai‘i Education Blueprint Forum at Campbell High School, October 6, 2016 (88% support blueprint vision focus areas)
- ESSA Hawai‘i Education Blueprint Forum at Baldwin High School, October 19, 2016 (90% support blueprint vision focus areas)
- ESSA Hawai‘i Education Blueprint Forum at Mililani High, October 20, 2016 (100% support blueprint vision focus areas)
- ESSA Hawai‘i Education Blueprint Forum at Kahuku High School, October 26, 2016 (100% support blueprint vision focus areas)
- ESSA Hawai‘i Education Blueprint Forum at Moanalua High School, November 2, 2016 (94% support blueprint vision focus areas)
- Hawai‘i’s Blueprint for Public Education – Version 1.0, January 23, 2017
The tightly furled frond of the Hāpu‘u fern; evokes the opportunity and potential for positive change that the Every Student Succeeds Act brings to Hawai‘i’s public education system. The fern frond receives support, nutrition and water through a strong single stem (system). In return the frond (students) will supply the plant with energy and renewed strength collected from the surrounding environment.

Green represents growth, life and potential. Reds and oranges represent the pulu (protective silky wool-like fiber) that is found on the exterior of a young frond, reminding us of our responsibility to the youth of Hawai‘i. The color also symbolizes the energy and passion of the team members.

The crescents in the form of a circle represent the shape of the fiddle head stage of the fern frond before it unfurls. They bring to mind the continuous and cyclical nature of education. While our system will continue to improve, there is a never-ending need for learning and refinement.

*As Required by ESSA
NOTICE TO ALL APPLICANTS

The purpose of this enclosure is to inform you about a new provision in the Department of Education’s General Education Provisions Act (GEPA) that applies to applicants for new grant awards under Department programs. This provision is Section 427 of GEPA, enacted as part of the Improving America’s Schools Act of 1994 (Public Law (P.L.) 103-382).

To Whom Does This Provision Apply?

Section 427 of GEPA affects applicants for new grant awards under this program. ALL APPLICANTS FOR NEW AWARDS MUST INCLUDE INFORMATION IN THEIR APPLICATIONS TO ADDRESS THIS NEW PROVISION IN ORDER TO RECEIVE FUNDING UNDER THIS PROGRAM.

(If this program is a State-formula grant program, a State needs to provide this description only for projects or activities that it carries out with funds reserved for State-level uses. In addition, local school districts or other eligible applicants that apply to the State for funding need to provide this description in their applications to the State for funding. The State would be responsible for ensuring that the school district or other local entity has submitted a sufficient section 427 statement as described below.)

What Does This Provision Require?

Section 427 requires each applicant for funds (other than an individual person) to include in its application a description of the steps the applicant proposes to take to ensure equitable access to, and participation in, its Federally-assisted program for students, teachers, and other program beneficiaries with special needs. This provision allows applicants discretion in developing the required description. The statute highlights six types of barriers that can impede equitable access or participation: gender, race, national origin, color, disability, or age. Based on local circumstances, you should determine whether these or other barriers may prevent your students, teachers, etc. from such access or participation in, the Federally-funded project or activity. The description in your application of steps to be taken to overcome these barriers need not be lengthy; you may provide a clear and succinct description of how you plan to address those barriers that are applicable to your circumstances. In addition, the information may be provided in a single narrative, or, if appropriate, may be discussed in connection with related topics in the application.

Section 427 is not intended to duplicate the requirements of civil rights statutes, but rather to ensure that, in designing their projects, applicants for Federal funds address equity concerns that may affect the ability of certain potential beneficiaries to fully participate in the project and to achieve to high standards. Consistent with program requirements and its approved application, an applicant may use the Federal funds awarded to it to eliminate barriers it identifies.

What are Examples of How an Applicant Might Satisfy the Requirement of This Provision?

The following examples may help illustrate how an applicant may comply with Section 427.

(1) An applicant that proposes to carry out an adult literacy project serving, among others, adults with limited English proficiency, might describe in its application how it intends to distribute a brochure about the proposed project to such potential participants in their native language.

(2) An applicant that proposes to develop instructional materials for classroom use might describe how it will make the materials available on audio tape or in braille for students who are blind.

(3) An applicant that proposes to carry out a model science program for secondary students and is concerned that girls may be less likely than boys to enroll in the course, might indicate how it intends to conduct “outreach” efforts to girls, to encourage their enrollment.

(4) An applicant that proposes a project to increase school safety might describe the special efforts it will take to address concern of lesbian,
gay, bisexual, and transgender students, and efforts to reach out to and involve the families of LGBT students.

We recognize that many applicants may already be implementing effective steps to ensure equity of access and participation in their grant programs, and we appreciate your cooperation in responding to the requirements of this provision.
Estimated Burden Statement for GEPA Requirements

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless such collection displays a valid OMB control number. Public reporting burden for this collection of information is estimated to average 1.5 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. The obligation to respond to this collection is required to obtain or retain benefit (Public Law 103-382. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Education, 400 Maryland Ave., SW, Washington, DC 20210-4537 or email ICDocketMgr@ed.gov and reference the OMB Control Number 1894-0005.
