Ta Melele In FERPA?

Family Educational Rights and Privacy Act (FERPA) is a federal law that protects students' personally identifiable information (PII) and any information directly related to a student that is maintained in student education records. Schools, Complex Area offices, District offices, and state offices in the Hawaii State Department of Education (HIDOE) maintain student information in:

- paper formats, e.g., cumulative, Special Education, and English Language Learner files; and
- electronic formats, e.g., Longitudinal Data System, Student Information System, and electronic Comprehensive Student Support System.

These records may contain contact information, enrollment forms, report cards, transcripts, disciplinary letters, and more. PII includes any information which can be linked to a specific student, and which would allow a reasonable person in the community to identify the student.

Parents, guardians, and eligible students (those 18 and older) may:

- inspect and review student's education records by submitting a written request to the school principal that identifies the record(s) they wish to inspect; request the amendment of the student's education record to correct inaccurate or misleading information, or correct a violation of the student's privacy rights under FERPA;
- provide written consent before the school releases information contained in the student's education record; and
- file a complaint with HIDOE and/or the U.S. Department of Education concerning alleged failures by the school to comply with the requirements of FERPA.

Parents, guardians, or eligible students may make their written requests directly to the school when requesting to inspect, review or amend records or to provide consent to release records.
