Dear Doe Family:

We are pleased to provide you this report about Jennifer’s performance on the Hawai’i Smarter Balanced English Language Arts (ELA)/Literacy and Mathematics Assessments administered in spring 2017. These assessments measure student understanding of the Hawai’i Common Core standards – rigorous and challenging learning expectations in reading, writing, listening, and mathematics. Students in grades 3-8 and 11 took the Smarter Balanced Assessments, which provide you, your child, and your child’s teachers with valuable information about their strengths and areas needing attention.

Nearly 200 U.S. colleges and universities, including the University of Hawai’i, will use 11th grade Smarter Balanced scores for course placement. This year’s results provide one important measure of how well Jennifer is progressing toward graduating ready for college and a career.

This report also describes the content of the assessments that put more emphasis on writing, solving problems and critical thinking. They were created specifically to measure students’ progress toward mastery of the Hawai’i academic standards. Hawai’i collaborated with other states to create these more rigorous standards, and over the past few years, teachers have used them to guide and inform their teaching practice.

We encourage you to use this report to start a conversation with Jennifer’s teacher about her progress in school. Together we can provide the best education for our students.

Very truly yours,

Kathryn S. Matayoshi
Superintendent of Education

What is in this report?

- Jennifer’s scores on the Smarter Balanced ELA/Literacy and Mathematics Assessments
- How Jennifer’s scores compare
- The areas that make up the Smarter Balanced ELA/Literacy and Mathematics Assessments
- Whether Jennifer met the standard in the different areas of each subject
- How you can help Jennifer improve her ELA/Literacy and Mathematics skills

For more information about this assessment, go to alohahsap.org
Jennifer’s ELA/Literacy Score

2490
Level 2
Standard Nearly Met

Jennifer’s ELA/Literacy score is 2490. This score is lower than the average score of eighth graders in her school, lower than that of eighth graders in her complex area, and lower than that of eighth graders statewide.

A student’s test score can vary if the test is taken several times. If your child were tested again, it is likely that Jennifer would receive a score between 2462 and 2518.

Next Steps

With your child, find containers in your home that are in the shape of cylinders, cones, and spheres and figure out how their volume (space an object takes up) would change if their dimensions were changed. For example, if the radius of the base of a can is doubled, how does that affect the volume of the can? (The can’s volume increases.)

With your child, explore functions in real-life relationships such as the height of a thrown ball after different amounts of time or the population of a country over time. See that the shape of the function’s graph is not a straight line. Talk about why the rate of change for a function does not stay the same (balls slow down with time).

Ask your child to find real-world examples of a right triangle (such as a ramp or a ladder leaning against a wall) and ask her to explain how to figure out the lengths of the sides of the triangle.
Your Child’s Progress

The chart below reports your student’s performance for each school year. The shaded areas in multiple colors indicate the scale score range in each achievement level. Each mark on the graph represents your student’s score and indicates whether they met the standards that year.

**HSAP Assessment Information**

**What is the purpose of the HSAP?**

The Hawai‘i Statewide Assessment Program (HSAP) is a statewide standardized testing program tied to the Hawai‘i content standards, which define the knowledge and skills required for our children to succeed beyond high school. HSAP is designed to:

- help schools and districts determine whether children are making progress on meeting standards; and
- help the state learn how schools and districts are ensuring that children are meeting the standards.

**What do the results of the HSAP mean, and how are they used?**

HSAP results summarize a student’s abilities as they relate to Hawai‘i content standards. HSAP is one of the many tools used by teachers to help identify each child’s strengths and weaknesses so that they can focus their instruction to meet the specific needs of their students.

For help in understanding Jennifer’s scores and this report, contact Jennifer’s teacher or school principal.

Has Your Child Met the Standard in the Different Areas of ELA/Literacy?

Reading

Lexile® Measure: 980L
Your child may be able to read closely and analytically to comprehend a range of increasingly complex literary and informational texts.

Listening

Your child can employ effective listening skills for a range of purposes and audiences.

Research/Inquiry

Your child has difficulty engaging in research and inquiry to investigate topics, and to analyze, integrate, and present information.

Writing

Your child may be able to produce effective and well-grounded writing for a range of purposes and audiences.

Next Steps

Have your child study different texts that present conflicting points of view on the same topic. Compare the texts to other ideas (like myths or historical events) and point out analogies (comparing unlike ideas).

Have your child listen to or watch documentaries or speeches on a topic. Have her explain the points presented on the topic using information from the sources. Ask if the sources can be trusted and why.

Have your child conduct research on a topic. Have her research several sides of the topic, combining data from different sources. She needs to include quotations and her opinion about the topic.

Help your child write argumentative essays, which address opposing views and include a counterclaim, logical reasoning, and support. All essays need direct quotations and formal, subject-specific language.

<tbody>
<tr>
<td>Argumentative</td>
<td>The argumentative response has a recognizable structure including a clear claim, adequate development, and some varied transitions to clarify and connect ideas. The response has an adequate introduction and conclusion and addresses the opposing argument. (3 out of 4 points)</td>
<td>The argumentative response provides adequate elaboration to support the claim including adequate facts and details cited from sources, some elaborative techniques and general language appropriate for the audience and purpose. (3 out of 4 points)</td>
<td>The argumentative response shows an adequate understanding of correct sentence formation, punctuation, capitalization, grammar usage, and spelling. (2 out of 2 points)</td>
</tr>
</tbody>
</table>
Jonathan’s Mathematics Score

Jonathan’s Mathematics score is 2650. This score is higher than the average score of eleventh graders in his school, similar to that of eleventh graders in his complex area, and similar to that of eleventh graders statewide.

A student’s test score can vary if the test is taken several times. If your child were tested again, it is likely that Jonathan would receive a score between 2618 and 2682.

### Concepts and Procedures

Your child can explain and apply mathematical concepts and interpret and carry out mathematical procedures with precision and fluency.

Ask your child to create complex equations with two variables, and solve for the variables. Ask your child to design a strategy to solve equation, \(x^n + bx + c = 0\) (such as \(x^4 - 5x^2 + 4 = 0\)). Compare the equation to a quadratic equation, and discuss how the same strategies can be used, such as rewriting as \((x^2 - 4)(x^2 - 1) = 0\).

### Problem Solving and Modeling & Data Analysis

Your child can solve a range of complex well-posed problems in pure and applied mathematics, making productive use of knowledge and problem solving strategies. Your child can analyze complex, real-world scenarios and can construct and use mathematical models to interpret and solve problems.

Ask your child to explain how linear and exponential functions are different. The distance a train travels in 2 hours at 50 miles per hour is linear (the increase in distance each hour is the same). The amount of money after 2 years in an account earning 2% interest is exponential (the increase in money each year is different).

### Communicating Reasoning

Your child may be able to clearly and precisely construct viable arguments to support their own reasoning and to critique the reasoning of others.

With your child, discuss theorems (math statements) that are proven by contradiction. For example, prove that a triangle must have at least 2 acute angles (less than 90°). Assume that a triangle can have 2 right angles (90°), 2 obtuse angles (more than 90°), or 1 right angle and 1 obtuse angle. Prove that those triangles are impossible.
Smarter Balanced Assessment ELA/Literacy and Mathematics Results

College Readiness

Determination of Readiness for College-Level Coursework

The University of Hawai‘i (UH) and participating Hawai‘i Community Colleges have agreed to use the results of the Smarter Balanced English Language Arts/Literacy and Mathematics assessments to determine readiness for college-level English and mathematics coursework. At the completion of the ELA/Literacy and Mathematics assessments your child indicated that his results may be used by UH for placement in credit-bearing courses.

The Smarter Balanced Assessment overall score for English language arts/literacy and mathematics in this report may be used to provide a determination of Jonathan’s readiness for college-level coursework, as described below.

| Standard Exceeded: | Ready for English and/or mathematics college-level coursework. |
| Standard Met: | Conditionally Ready for English and/or mathematics college-level coursework. |
| Standard Nearly Met: | Not yet demonstrating readiness for English and/or mathematics college-level coursework. |
| Standard Not Met: | Not demonstrating readiness for English and/or mathematics college-level coursework. |

Review the information at alohahsap.org to see how this information can help avoid the need for additional testing upon entering a university or community college.

What is the purpose of the HSAP?
The Hawai‘i Statewide Assessment Program (HSAP) is a statewide standardized testing program tied to the Hawai‘i content standards, which define the knowledge and skills required for our children to succeed beyond high school. HSAP is designed to:

- help schools and districts determine whether children are making progress on meeting standards; and
- help the state learn how schools and districts are ensuring that children are meeting the standards.

What do the results of the HSAP mean, and how are they used?
HSAP results summarize a student’s abilities as they relate to Hawai‘i content standards. HSAP is one of the many tools used by teachers to help identify each child’s strengths and weaknesses so that they can focus their instruction to meet the specific needs of their students.

For help in understanding Jonathan’s scores and this report, contact Jonathan’s teacher or school principal.
Dear Doe-Incomplete Family:

We are pleased to provide you this report about Jonathan’s performance on the Hawai‘i Smarter Balanced English Language Arts (ELA)/Literacy and Mathematics Assessments administered in spring 2017. These assessments measure student understanding of the Hawai‘i Common Core standards – rigorous and challenging learning expectations in reading, writing, listening, and mathematics. Students in grades 3-8 and 11 took the Smarter Balanced Assessments, which provide you, your child, and your child’s teachers with valuable information about their strengths and areas needing attention.

Nearly 200 U.S. colleges and universities, including the University of Hawai‘i, will use 11th grade Smarter Balanced scores for course placement. This year’s results provide one important measure of how well Jonathan is progressing toward graduating ready for college and a career.

This report also describes the content of the assessments that put more emphasis on writing, solving problems and critical thinking. They were created specifically to measure students’ progress toward mastery of the Hawai‘i academic standards. Hawai‘i collaborated with other states to create these more rigorous standards, and over the past few years, teachers have used them to guide and inform their teaching practice.

We encourage you to use this report to start a conversation with Jonathan’s teacher about his progress in school. Together we can provide the best education for our students.

Very truly yours,

Kathryn S. Matayoshi
Superintendent of Education
Jonathan’s ELA/Literacy Score

**2650***

**Level 3 Standard Met**

Jonathan’s ELA/Literacy score is 2650. This score is higher than the average score of eleventh graders in his school, similar to that of eleventh graders in his complex area, and similar to that of eleventh graders statewide.

*A student’s test score can vary if the test is taken several times. If your child were tested again, it is likely that Jonathan would receive a score between 2622 and 2678.*  

*Jonathan’s score is based upon an incomplete test.*

Has Your Child Met the Standard in the Different Areas of ELA/Literacy?

Reading

**Lexile® Measure: 1080L**

Your child may be able to read closely and analytically to comprehend a range of increasingly complex literary and informational texts.

Listening

Your child can employ effective listening skills for a range of purposes and audiences.

Research/Inquiry

Your child has difficulty engaging in research and inquiry to investigate topics, and to analyze, integrate, and present information.

Writing

Your child may be able to produce effective and well-grounded writing for a range of purposes and audiences.

Next Steps

- **Level 4 Standard Exceeded** - The student has exceeded the achievement standard and demonstrates advanced progress toward mastery of the knowledge and skills in English language arts/literacy needed for likely success in entry-level credit-bearing college coursework after high school.
- **Level 3 Standard Met** - The student has met the achievement standard and demonstrates progress toward mastery of the knowledge and skills in English language arts/literacy needed for likely success in entry-level credit-bearing college coursework after high school.
- **Level 2 Standard Nearly Met** - The student has nearly met the achievement standard and may require further development to demonstrate the knowledge and skills in English language arts/literacy needed for likely success in entry-level credit-bearing college coursework after high school.
- **Level 1 Standard Not Met** - The student has not met the achievement standard and needs substantial improvement to demonstrate the knowledge and skills in English language arts/literacy needed for likely success in entry-level credit-bearing college coursework after high school.

Jonathan’s Mathematics Score

2650

Level 3
Standard Met

Jonathan’s Mathematics score is 2650. This score is higher than the average score of eleventh graders in his school, similar to that of eleventh graders in his complex area, and similar to that of eleventh graders statewide.

*A student’s test score can vary if the test is taken several times. If your child were tested again, it is likely that Jonathan would receive a score between 2618 and 2682.

*Jonathan’s score is based upon an incomplete test.

College Readiness

Determination of Readiness for College-Level Coursework

The University of Hawai‘i (UH) and participating Hawai‘i Community Colleges have agreed to use the results of the Smarter Balanced English Language Arts/Literacy and Mathematics assessments to determine readiness for college-level English and mathematics coursework. At the completion of the ELA/Literacy and Mathematics assessments your child indicated that his results may be used by UH for placement in credit-bearing courses.

The Smarter Balanced Assessment overall score for English language arts/literacy and mathematics in this report may be used to provide a determination of Jonathan’s readiness for college-level coursework, as described below.

Standard Exceeded: Ready for English and/or mathematics college-level coursework.

Standard Met: Conditionally Ready for English and/or mathematics college-level coursework.

Standard Nearly Met: Not yet demonstrating readiness for English and/or mathematics college-level coursework.

Standard Not Met: Not demonstrating readiness for English and/or mathematics college-level coursework.

Review the information at alohahsap.org to see how this information can help avoid the need for additional testing upon entering a university or community college.
