## Where are we now?

**A.** The following **Student Learning Needs** were identified through the completion of our [Comprehensive Needs Assessment \(CNA\)](#):

1. GLOs - All students need to increase their ability to be self-directed learners, complex thinkers, and quality producers.
2. Reading - All students need to increase their literacy skills related to foundational reading (i.e. phonics, fluency) and comprehension (i.e. word meanings, reasoning & evidence, and language use).
3. Writing - All students need to increase their ability to write and revise brief and full texts.
4. Math - All students need to increase their understanding and application of mathematical concepts and procedures.
5. Science - All students need to increase their understanding of science concepts.
6. Social/Emotional Learning - All students need to improve their skills related to the social-emotional competencies (i.e. self-awareness, self-management, responsible decision-making, relationship skills, and social awareness).

**B.** The following **Areas of Growth** were identified through the completion of our WASC Self-Study and updated in our most recent CNA:

### Prioritized Areas of Growth

1. We need to better integrate instruction, student reflection, and assessment of the GLOs into our content area lessons. ( Emphasis on self-directed learner, complex thinker, and quality producer and Effective Communicator.)
2. We need to strengthen implementation of RTI to better accommodate the learning styles and academic needs of all learners.
3. We need to refine our PLC data team and collaboration processes to ensure all students' academic growth.

### Additional Areas of Growth

4. We need to become more proficient in the use of technology and Google Apps for Education (GAPE) to increase student/adult voice and engagement within the classroom and in our schoolwide improvement processes
5. We need to implement a school wide character development program to strengthen our school community.

**C.** The following **Critical Areas of Follow-up** were identified by the WASC Visiting Committee during their Spring 2019 Self-Study Visit:

1. Modify the PLC/Data Teams process to...
  - a) identify the specific skills that each student needs to acquire and using that data to deliver targeted RtI instruction to improve all students' learning, and
  - b) actively involve all special education teachers in the schoolwide PLC/Data Teams Groups so that they are able to share data, insights, and teaching/learning strategies.
2. Increase the intellectual rigor of lessons to provide more intellectually relevant, stimulating, and challenging learning for students. Have GLOs embedded into lessons with focus on Effective Communicator\* and Complex Thinker.
3. Provide professional development and supports for teachers to strengthen the use of differentiation strategies for RtI.

\*Effective Communicator was one of the lowest GLOs when we only considered the number of students Consistently demonstrating the GLO. We are now calculating the GLOs by the number of students Usually/Consistently meeting each GLO. Using this method, the three GLOs listed in Student Learning Need #1 above are of greater concern.<sup>98</sup>

## Addressing Equity: Subgroup Identification

All of our students need to increase their understanding and application of skills in ELA, Math, and Science. Subgroups of students needing the most support are identified in the table below in yellow. This Academic Plan is designed based upon the following premise:

- ELL students will benefit from more frequent use of language development strategies in regular education classrooms.
- SpEd students will benefit from more inclusive settings and regular education teachers trained in and implementing inclusive practices and interventions.
- Low SES students will benefit from teachers and staff who understand the unique needs of students living in poverty and strategies to support their learning.
- Pacific Islander and Native Hawaiian students will benefit from exposure to culturally relevant learning experiences, such as place-based learning and the Na Hopena A`o (HĀ).

**EA 10:** Continue to develop student centered classrooms through the integration of technology and implementation of real-world problem solving, project-based learning, inspiring spaces and student agency.

**Planned Action Steps:**

- Integrate and maintain the use of technology in all classrooms to support innovative practices in curriculum, instruction, assessment (CIA).
- Students of all grade levels will utilize technology to conduct research and upper grade levels will host a Google Genius Hour. (CC #4)
- Develop a schoolwide Google Calendar for teachers/staff to use to schedule and communicate meetings/events. (CC #4)
- Discuss and implement next steps identified within our [Kilauea School Future Ready Plan](#).
- Utilize additional funds for tech support services to assist with tech support.
- Provide earphones for Kindergarten, First and Second grade classes.
