THE STRIVE HI SCHOOL PERFORMANCE REPORT is an annual snapshot of a school’s performance on key indicators of student success. This report shows schools’ progress on the Department and Board of Education’s Strategic Plan and federally-required indicators under the Every Student Succeeds Act. These results help inform action for teachers, principals, community members, and other stakeholders.

How do students feel about their school?
Measures percent of students reporting positive school climate as measured by the Tripod Student Perception Survey.

82% of students feel positively about their school.

How do you measure how well a school is doing? In our estimation, it’s more than scores on high-stakes tests. Schools should show that they are supporting children along the educational pipeline toward college, career, and community readiness. Are our students attending school? Are they graduating? Are they going to college? And how successfully are schools reducing the achievement gap between high-needs and non-high needs students?

The Strive HI Performance System was designed to account for these factors in student success. Initially created in 2013 by a U.S. Department of Education waiver from certain aspects of the former No Child Left Behind Act, Strive HI has been refocused by the goals and priorities of the 2017-2020 Department of Education and Board of Education Strategic Plan, the governing document for the public education system.

Our Story

At Mililani Mauka Elementary, use of technology to enhance teaching and learning is integral to the school’s operation. The school was built under Harvard’s Project Zero Smart School on a principle that “learning is a consequence of thinking and should be reflective of deep understanding.”

The school’s mission is to develop each individual to be a thinking learner and an active user of knowledge. As a result, complex thinking is an integral part of our school’s culture. Harvard’s Seven Thinking Dispositions are infused throughout the day. For several years, Mililani Mauka has focused on the Standards of Mathematical Practices; in particular Practice 3 - Constructing viable arguments and critiquing the reasoning of others. An additional focus has been in the area of responding to questions based upon informational texts. Students are asked to identify details from the text to support their thinking/reasoning. Our ultimate goal for students is to become “real-world” problem solvers and complex thinkers who can be productive members of society.
