How do you measure how well a school is doing? In our estimation, it's more than scores on high-stakes tests. Schools should show that they are supporting children along the educational pipeline toward college, career, and community readiness. Are our students attending school? Are they graduating? Are they going to college? And how successfully are schools reducing the achievement gap between high-needs and non-high needs students?

Our Story

Despite continuing COVID-19 pandemic impacts, Aiea Intermediate School remained committed to academic success and growth. AIS took up the challenge of opening safely and fully in-person, accelerating learning, and addressing students' social, emotional and mental health well-being.

Using ESSER funds, the AIS team held extended learning opportunities during Saturdays and summer breaks. Students also had opportunities for after-school in-person and online tutoring, which was UPLINK and REACH grant funded. The ELO helped to equitably close the gaps in student achievement, improve social-emotional development, daily attendance, student engagement and connections between families and AIS. With the UPLINK and REACH grants, AIS also did out of school-time or after school enrichment activities, clubs and sports, which promoted belonging to school and connection to school staff.

AIS continued to improve their educational program by tackling five priority needs for students, which aligned to the school's vision, mission, and PRIDE values. The vision for the five priorities were: 1) developing a multi-tiered response system to immediately address students struggles in academics, behavior and attendance, 2) personalize and connect students to their social-emotional competencies, 3) provide authentic learning experiences by applying skills and concepts to real-world problems, 4) have equitable instructional practices to ensure all students are academically successful with designed access to grade-level standards achievement, and 5) ensure students were college-ready and exploring career interests.

The priorities were based on the AIS continued belief that "all students can learn". Standing firm to their beliefs and despite the challenges, the hard-working and dedicated team of educators continued to do "whatever it takes" for all students.

Pandemic Related Considerations When Assessing Strive HI Results

Throughout this 2021-22 school year (SY), numerous pandemic-related challenges arose across Hawai’i’s public schools. Many challenges were common across schools, yet others were unique to a particular school or group of schools within a particular geographic area. The pandemic’s impact on instruction and learning had an effect on teachers and students, and those conditions should be considered when examining student achievement and school performance results.

**Chronic Absenteeism and the Pandemic**

*(For 2022 results, see Page 4)*

In school year 2021-22, there was a substantial, statewide increase in the chronic absenteeism rate. These increases were largely pandemic related and schools had very little control over such absences. While schools continued to implement follow-up procedures for absent students, the impact was minimal given the large number of students kept home due to several pandemic related factors. A number of factors described below were also seen nationally and are not unique to Hawaii only.

It is important to reiterate that the purpose of the Strive HI Chronic Absenteeism Measure is to identify schools where a substantial proportion of students did not receive the full year of instructional time. The measure is not intended to place fault with schools and is based on all student absences, both unexcused and excused absences. The following is a summary of key pandemic related factors that contributed to the large increase in chronic absenteeism rates across schools.

**Statewide factors**

The single most influential factor attributable to 2021-22 absences was due to COVID infections and quarantines due to potential exposure. Increases in absences and peaks in infection rates were consistently mirrored during September – November 2021 (Delta variant) and January – May 2022 (Omicron variant). Key factors observed included the following:

- Elementary students were disproportionately negatively impacted, accounting for over half of 2021-22 chronically absent students.
- Vaccinations for elementary age students were not readily available through the first half of the school year.
- Vaccine apprehension resulting in parents/guardians more likely to keep their child home knowing he/she is unvaccinated.
- Changes with COVID exposure/infection guidance caused confusion around when students should attend or not attend school.
- Exposure or infection of a single student impacting an entire household including multiple school aged siblings.
- Convenient and abundant access to home tests increased identification of positive results (including non-symptomatic cases) resulting in isolation and quarantines within the household.

**Localized factors**

The following are localized factors that were reported to increase absences. One was clustered in an individual complex area and the other disproportionately impacted a specific island:

- U.S. Navy emergency fuel storage leak coinciding with increases in absenteeism across one Central Oahu complex area.
- Bus driver shortages were already an issue pre-pandemic and exacerbated further by the pandemic. Approximately 15% of schools statewide were impacted to some degree. Big Island schools were most impacted with around 50% of schools across the island.
How many students participated in testing?

These bar charts display participation rates across language arts, math, and science for All Students and high-needs subgroups. School rates are accompanied by complex area and statewide rates allowing for side-by-side comparisons. Consideration should be given to the following: (A) Participation rates should always be taken into consideration when reviewing proficiency results, and especially so, when students’ modes of learning, instruction, and test-taking options are disrupted or altered during the school year; (B) School participation rates should be compared across key subgroups as well as complex area and statewide rates; (C) Participation rates allow readers to judge the extent proficiency and other test derived results such as growth, achievement gap, and 3rd and 8th grade literacy rates, are representative of all students eligible to test; and (D) When participation rates drop below 95%, one should ask, “To what extent are these results reflective of all students eligible to test?” “Are certain student subgroups over- or under-represented?” “Do those differences skew achievement results?” The following link provides guidelines and considerations when examining achievement results derived from low-participation rates, as well as other important pandemic related considerations: Appropriate Use of SY 2020-21 Hawai‘i Statewide Assessment Program (HSAP) Results.

1. 2020 chronic absenteeism is based on absences only through the end of the third quarter (3/13/20). As such, the rate is not directly comparable with years prior to or following 2020, which were based on absences through May 1 of each school year.
Aiea Intermediate

99-600 Kulawea Street | Oahu | Aiea-Moanalua-Radford Complex Area

THE 2021-22 STRIVE HI SCHOOL PERFORMANCE REPORT is an annual snapshot of a school’s performance on key indicators of student success. This report shows schools’ progress on federally-required indicators under the Every Student Succeeds Act; in addition to state-adopted measures focused on student equity, achievement and success. These results help inform action for teachers, principals, and other stakeholders.

Our Story

Despite continuing COVID-19 pandemic impacts, Aiea Intermediate School remained committed to academic success and growth. AIS took up the challenge of opening safely and fully in-person, accelerating learning, and addressing students’ social, emotional and mental health well-being.

Using ESSER funds, the AIS team held extended learning opportunities during Saturdays and summer breaks. Students also had opportunities for after-school in-person and online tutoring, which was UPLINK and REACH grant funded. The ELO helped to equitably close the gaps in student achievement, improve social-emotional development, daily attendance, student engagement and connections between families and AIS. With the UPLINK and REACH grants, AIS also did out of school-time or after school enrichment activities, clubs and sports, which promoted belonging to school and connection to school staff.

AIS continued to improve their educational program by tackling five priority needs for students, which aligned to the school’s vision, mission, and PRIDE values. The vision for the five priorities were: 1) developing a multi-tiered response system to immediately address students struggles in academics, behavior and attendance, 2) personalize and connect students to their social-emotional competencies, 3) provide authentic learning experiences by applying skills and concepts to real-world problems, 4) have equitable instructional practices to ensure all students are academically successful with designed access to grade-level standards achievement, and 5) ensure students were college-ready and exploring career interests.

The priorities were based on the AIS continued belief that “all students can learn”. Standing firm to their beliefs and despite the challenges, the hard-working and dedicated team of educators continued to do “whatever it takes” for all students.

Founded in 1963, Aiea Intermediate School is located near the Pearl Harbor Naval Base on the outskirts of Honolulu and serves a diverse population of seventh and eight graders. The school community includes families from Aiea Heights, Aiea Kai, Aliamanu Military Reservation, Enchanted Hills, Halawa Heights, Halawa Valley Estates, Hillside Terrace, McGrew Point, Newtown, Pearl Ridge, Puu Wai Momi, Royal Summit, Walluna, and Waimalu.
Chronic Absenteeism and the Pandemic
(For 2022 results, see Page 4)
In school year 2021-22, there was a substantial, statewide increase in the chronic absenteeism rate. These increases were largely pandemic related and schools had very little control over such absences. While schools continued to implement follow-up procedures for absent students, the impact was minimal given the large number of students kept home due to several pandemic related factors. A number of factors described below were also seen nationally and are not unique to Hawaii only.

It is important to reiterate that the purpose of the Strive HI Chronic Absenteeism Measure is to identify schools where a substantial proportion of students did not receive the full year of instructional time. The measure is not intended to place fault with schools and is based on all student absences, both unexcused and excused absences. The following is a summary of key pandemic related factors that contributed to the large increase in chronic absenteeism rates across schools.

Statewide factors
The single most influential factor attributable to 2021-22 absences was due to COVID infections and quarantines due to potential exposure. Increases in absences and peaks in infection rates were consistently mirrored during September – November 2021 (Delta variant) and January – May 2022 (Omicron variant). Key factors observed included the following:

- Elementary students were disproportionately negatively impacted, accounting for over half of 2021-22 chronically absent students.
- Vaccinations for elementary age students were not readily available through the first half of the school year.
- Vaccine apprehension resulting in parents/guardians more likely to keep their child home knowing he/she is unvaccinated.
- Changes with COVID exposure/infection guidance caused confusion around when students should attend or not attend school.
- Exposure or infection of a single student impacting an entire household including multiple school aged siblings.
- Convenient and abundant access to home tests increased identification of positive results (including non-symptomatic cases) resulting in isolation and quarantines within the household.

Localized factors
The following are localized factors that were reported to increase absences. One was clustered in an individual complex area and the other disproportionately impacted a specific island:

- U.S. Navy emergency fuel storage leak coinciding with increases in absenteeism across one Central Oahu complex area.
- Bus driver shortages were already an issue pre-pandemic and exacerbated further by the pandemic. Approximately 15% of schools statewide were impacted to some degree. Big Island schools were most impacted with around 50% of schools across the island.
How many students participated in testing?

These bar charts display participation rates across language arts, math, and science for All Students and high-needs subgroups. School rates are accompanied by complex area and statewide rates allowing for side-by-side comparisons. Consideration should be given to the following: (A) Participation rates should always be taken into consideration when reviewing proficiency results, and especially so, when students’ modes of learning, instruction, and test-taking options are disrupted or altered during the school year; (B) School participation rates should be compared across key subgroups as well as complex area and statewide rates; (C) Participation rates allow readers to judge the extent proficiency and other test derived results such as growth, achievement gap, and 3rd and 8th grade literacy rates, are representative of all students eligible to test; and (D) When participation rates drop below 95%, one should ask, “To what extent are these results reflective of all students eligible to test?” “Are certain student subgroups over- or under-represented?” “Do those differences skew achievement results?” The following link provides guidelines and considerations when examining achievement results derived from low-participation rates, as well as other important pandemic related considerations: Appropriate Use of SY 2020-21 Hawai‘i Statewide Assessment Program (HSAP) Results.
