He’eia Elementary
46-202 Haiku Road | Oahu | Castle-Kahuku Complex Area

Our Story

He’eia’s Elementary’s mission is to equip students with attitudes, knowledge and skills which empower them to build a better world for themselves and others.

As a school community which includes parents, teachers, staff, students and community partners, the school has managed to collaboratively work towards successful improvement in all areas. Together our school has developed an infrastructure of systems to include Tier II Interventions, Data Teams, School Turnaround and Improvement Strategies to improve math and literacy proficiency rates, address the achievement gap and student growth rate. This year the school will continue to provide scaffolded opportunities for struggling students in all classes, differentiate instruction and address the achievement gap. Through the development of strong self-directed learners, the school seeks to provide more opportunities for student led learning.

It is the hope of all staff at He’eia that when the mission is realized we will be the stewards who were instrumental in the strong development of productive citizens who embody the ideals of the 5 R’s of Respect, Responsibility, Resourcefulness, and most of all Resilient human beings who foster strong Relationships toward excellence in learning and achievement. Ku Ha'aheo – Stand Proud, Determined to Excel – Hawks Soar.
Pandemic Related Considerations When Assessing Strive HI Results

Throughout this 2020-21 school year (SY), numerous pandemic-related challenges arose across Hawaiʻi’s public schools. Many challenges were common across schools, yet others were unique to a particular school or group of schools within a particular geographic area. The pandemic’s impact on instruction and learning had an effect on teachers and students, and those conditions should be considered when examining student achievement and school performance results.

This section provides important contextual information that should be considered when assessing 2021 Strive HI results, and when comparing 2021 results to prior year results. To the extent data were available, several key metrics are presented to provide context to learning, instruction, and test-taking during the past school year, including participation rates, students learning modalities, and access to adequate digital devices and internet connectivity.

How many students participated in testing?

These bar charts display participation rates across language arts, math, and science for All Students and high-needs subgroups. School rates are accompanied by complex area and statewide rates allowing for side-by-side comparisons. Consideration should be given to the following: (A) Participation rates should always be taken into consideration when reviewing proficiency results, and especially so, when students’ modes of learning, instruction, and test-taking options are disrupted or altered during the school year; (B) School participation rates should be compared across key subgroups as well as complex area and statewide rates; (C) Participation rates allow readers to judge the extent proficiency and other test derived results such as growth, achievement gap, and 3rd and 8th grade literacy rates, are representative of all students eligible to test; and (D) When participation rates drop below 95%, one should ask, “To what extent are these results reflective of all students eligible to test? “Are certain student subgroups over- or under-represented?” “Do those differences skew achievement results?” The following link provides guidelines and considerations when examining achievement results derived from low-participation rates, as well as other important pandemic related considerations: Appropriate Use of SY 2020-21 Hawai‘i Statewide Assessment Program (HSAP) Results.

In what learning environment did students receive instruction?
This bar chart shows the percent of students receiving instruction completely in-person or in a blended or completely virtual setting. Consideration should be given to the following: (A) Students’ learning modality varied across schools; (B) Some students seemed to achieve better in-person, while blended or completely virtual settings may have been more conducive to learning for other students; (C) A student’s learning modality can serve as a useful comparison when examining individual student achievement based on their learning modality, however, caution should be given when drawing such conclusions; and (D) Certain students may be more likely to attend in-person compared to other types of students, that is, students with disabilities. Schools may look into these students to determine if that is the case before drawing conclusions about performance based on students’ learning modality.

How many students did not have adequate digital devices or internet access?
The following show the number and percent of students who did not have a digital device or internet access to adequately engage in distance learning.

19 out of 385
4.9% of students did not have a device for connectivity
State: 1.9%

18 out of 385
4.6% of students did not have internet access
State: 2.8%

2020-21 Strive HI School Performance Results

IMPORTANT: Due to COVID-19, in SY 2020, no statewide tests were administered. In SY 2021, Hawaiʻi public schools administered a shortened version of the statewide assessment, a skip-year growth methodology was used, and participation rate penalties were waived as approved by the U.S. Department of Education.

How are students performing in each subject?
Measures the percent of students meeting the standard/who are proficient on state assessments. No participation penalty was applied to 2021 proficiency results.

THE 2020-21 STRIVE HI SCHOOL PERFORMANCE REPORT is an annual snapshot of a school’s performance on key indicators of student success. This report shows schools’ progress on federally-required indicators under the Every Student Succeeds Act; in addition to state-adopted measures focused on student equity, achievement and success. These results help inform action for teachers, principals, and other stakeholders.

Our Story

He‘eia’s Elementary’s mission is to equip students with attitudes, knowledge and skills which empower them to build a better world for themselves and others.

As a school community which includes parents, teachers, staff, students and community partners, the school has managed to collaboratively work towards successful improvement in all areas. Together our school has developed an infrastructure of systems to include Tier II Interventions, Data Teams, School Turnaround and Improvement Strategies to improve math and literacy proficiency rates, address the achievement gap and student growth rate.
