**THE 2020-21 STRIVE HI SCHOOL PERFORMANCE REPORT** is an annual snapshot of a school's performance on key indicators of student success. This report shows schools' progress on federally-required indicators under the Every Student Succeeds Act; in addition to state-adopted measures focused on student equity, achievement and success. These results help inform action for teachers, principals, and other stakeholders.

## Our Story

Although Kohala Middle School did not anticipate the disruption of the Corona Virus during school years 19-20 and 20-21, it was well prepared to provide quality remote education to the KMS students. Over the years KMS has spent time and money to provide high tech classrooms, (each featuring a SMART board), and a 1 to 1 computer to student ratio.

By October, 2020 KMS was able to open the school to blended classrooms (on-line and in person) and allowed students to attend class on campus twice a week while learning from home twice a week. During the year we have never wavered from our focus on Math, Language Arts, Science, Social Studies, Social Emotional Learning, and preparation for High School and beyond. We believe that helping students learn how to distinguish truth from falsehood and how to deal with ambiguities that characterize human affairs is vital to our success as a nation.

However, we learned just how important it is to maintain frequent and meaningful communication with our school community of Kohala, and that we could improve in this area.

As a result, we have begun to focus on ways to increase student and parent voice our campus. We have increased our focus on the idea of self-regulated learning and social interactions within classrooms that support student development of regulatory skills and strategies.

We focus on Social Emotional Learning exemplified by our homeroom morning circles, weekly Pico, SEL class, advisory classes, friendly (but competitive) intermural competitions, and community service projects.

At Kohala Middle School we understand that adolescents entering the 21st Century world will read and write more than any other time in history.

We understand that the need for mathematics is pervasive and we want all students to become confident, capable users of math.

We know that we can truly transform science by integrating the teaching of content with simple, powerful literacy, lecture and science activities.

We believe that helping students learn how to distinguish truth from falsehood and how to deal with ambiguities that characterize human affairs is vital to our success as a nation.

Kohala Middle School features Houses and Programs based on the Hawaiian Values of: Akamai, Aloha, Ike, Kokua, Laulima, and Mana. Our programs are designed to support student attainment of Common Core State Standards and the 5 Promises of Hawaii: Equity, School Design, Empowerment, and Innovation.

## Pandemic Related Considerations When Assessing Strive HI Results

Throughout this 2020-21 school year (SY), numerous pandemic-related challenges arose across Hawai'i's public schools. Many challenges were common across schools, yet others were unique to a particular school or group of schools within a particular geographic area. The pandemic's impact on instruction and learning had an effect on teachers and students, and those conditions should be considered when examining student achievement and school performance results.

This section provides important contextual information that should be considered when assessing 2021 Strive HI results, and when comparing 2021 results to prior year results. To the extent data were available, several key metrics are presented to provide context to learning, instruction, and test-taking during the past school year, including participation rates, students learning modalities, and access to adequate digital devices and internet connectivity.

### How many students participated in testing?

These bar charts display participation rates across language arts, math, and science for All Students and high-needs subgroups. School rates are accompanied by complex area and statewide rates allowing for side-by-side comparisons. Consideration should be given to the following: (A) Participation rates should always be taken into consideration when reviewing proficiency results, and especially so, when students' modes of learning, instruction, and test-taking options are disrupted or altered during the school year; (B) School participation rates should be compared across key subgroups as well as complex area and statewide rates; (C) Participation rates allow readers to judge the extent proficiency and other test derived results such as growth, achievement gap, and 3rd and 8th grade literacy rates, are representative of all students eligible to test; and (D) When participation rates drop below 95%, one should ask, "To what extent are these results reflective of all students eligible to test?" "Are certain student subgroups over- or under-represented?" "Do those differences skew achievement results?" The following link provides guidelines and considerations when examining achievement results derived from low-participation rates, as well as other important pandemic related considerations: Appropriate Use of SY 2020-21 Hawai'i Statewide Assessment Program (HSAP) Results.

## In what learning environment did students receive instruction?

This bar chart shows the percent of students receiving instruction completely in-person or in a blended or completely virtual setting. Consideration should be given to the following: (A) Students' learning modality varied across schools; (B) Some students seemed to achieve better in-person, while blended or completely virtual settings may have been more conducive to learning for other students; (C) A student's learning modality can serve as a useful comparison when examining individual student achievement based on their learning modality, however, caution should be given when drawing such conclusions; and (D) Certain students may be more likely to attend in-person compared to other types of students, that is, students with disabilities. Schools may look into these students to determine if that is the case before drawing conclusions about performance based on students' learning modality.

## 2020-21 Strive HI School Performance Results

IMPORTANT: Due to COVID-19, in SY 2020, no statewide tests were administered. In SY 2021, Hawai'i public schools administered a shortened version of the statewide assessment, a skip-year growth methodology was used, and participation rate penalties were waived as approved by the U.S. Department of Education.

### How are students performing in each subject?

Measures the percent of students meeting the standard/who are proficient on state assessments. No participation penalty was applied to 2021 proficiency results.

### How are students performing compared to others?

Compares the percent of students meeting the standard/who are proficient on state assessments.

### How are student subgroups performing?

High Needs: English learners, economically disadvantaged, and students receiving special education services. Non-High Needs: All other students.

### How are students' academic progress measured?

Schools' Smarter Balanced growth is represented by a Median Growth Percentile (MGP) which ranges from 1 - 99. HSA-Alt & KAEO growth shows the percent of students making one year of growth.

### How many 8th graders read on grade level?

76% of 8th graders read near, at, or above grade level

### How many students missed 15 or more days of school this year?

### How do students feel about their school?

Measures percent of students reporting positive school climate as measured by the Panorama Student Survey by school level.

<sup>1</sup>2020 chronic absenteeism is based on absences only through the end of the third quarter (3/13/20). As such, the rate is not directly comparable with years prior to or following 2020, which were based on absences through May 1 of each school year.
