Robert Louis Stevenson Middle School (RLSMS) is an urban educational institution serving students in grades 6, 7, and 8 located in the heart of Honolulu just 2 miles outside of the state's financial and political center. We have a highly distinguished administration and faculty recognized for accolades such as but not limited to 2018 National Distinguished Principal, 2017 Masayuki Tokioka Excellence in Education Award, 2018 State Assistant Principal of the Year, and the 2018 Milken Teacher of Promise.

RLSMS offers a variety of academic programs to support all students towards college and career readiness. We also have brand new state of the art facilities including a two-story building with science and technology classrooms and an air-conditioned multi-purpose room. We were also the first school in Hawaii to win the $100,000 Thank America's Teachers Dream Big Grant that enables us to bolster 21st Century Learning for our students through our makerspace aptly named the Innovative Invention Imaginarium.

RLSMS provides an array of academics during the school day including Ho'ouni'ike (accelerated) classes, Reading and Mathematics Workshop (Tier 2 intervention) classes, and a variety of elective classes. Some of the electives offered at RLSMS are Band, Music, Tennis, VACT (Video, Art, Computer, and Technology), Student-Body Government, Robotics, AVID (Advancement via Individual Determination) and STEM. The Science, Technology, Engineering, and Mathematics (STEM) elective introduces students to engaging concepts such as but not limited to forensic science, car and rocket engineering, and game design. RLSMS also offers a variety of after-school programs including but not limited to Art, Band, Futsal, Hula, Robotics, Ukulele, Basketball, Volleyball, and Wrestling.

How do you measure how well a school is doing? In our estimation, it’s more than scores on high-stakes tests. Schools should show that they are supporting children along the educational pipeline toward college, career, and community readiness. Are our students attending school? Are they graduating? Are they going to college? And how successfully are schools reducing the achievement gap between high-needs and non-high needs students?

About Our School
Principal | Katherine Balatico
Grades | 6-8
808-587-4520
www.rlsms.k12.hi.us

643 students enrolled

9% of students are English learners
50% of students are eligible for Free or Reduced Lunch
9% of students receive special education services
23% of special education students are in general education classes most of the day
Pandemic Related Considerations When Assessing Strive HI Results

Throughout this 2020-21 school year (SY), numerous pandemic-related challenges arose across Hawai‘i’s public schools. Many challenges were common across schools, yet others were unique to a particular school or group of schools within a particular geographic area. The pandemic’s impact on instruction and learning had an effect on teachers and students, and those conditions should be considered when examining student achievement and school performance results.

This section provides important contextual information that should be considered when assessing 2021 Strive HI results, and when comparing 2021 results to prior year results. To the extent data were available, several key metrics are presented to provide context to learning, instruction, and test-taking during the past school year, including participation rates, students learning modalities, and access to adequate digital devices and internet connectivity.

How many students participated in testing?

These bar charts display participation rates across language arts, math, and science for All Students and high-needs subgroups. School rates are accompanied by complex area and statewide rates allowing for side-by-side comparisons. Consideration should be given to the following: (A) Participation rates should always be taken into consideration when reviewing proficiency results, and especially so, when students’ modes of learning, instruction, and test-taking options are disrupted or altered during the school year; (B) School participation rates should be compared across key subgroups as well as complex area and statewide rates; (C) Participation rates allow readers to judge the extent proficiency and other test derived results such as growth, achievement gap, and 3rd and 8th grade literacy rates, are representative of all students eligible to test; and (D) When participation rates drop below 95%, one should ask, “To what extent are these results reflective of all students eligible to test?” “Are certain student subgroups over- or under-represented?” “Do those differences skew achievement results?” The following link provides guidelines and considerations when examining achievement results derived from low-participation rates, as well as other important pandemic related considerations: Appropriate Use of SY 2020-21 Hawai‘i Statewide Assessment Program (HSAP) Results.

- High Needs: 100%, 100%, 93%
- Non-High Needs: 100%, 100%, 91%
In what learning environment did students receive instruction?
This bar chart shows the percent of students receiving instruction completely in-person or in a blended or completely virtual setting. Consideration should be given to the following: (A) Students’ learning modality varied across schools; (B) Some students seemed to achieve better in-person, while blended or completely virtual settings may have been more conducive to learning for other students; (C) A student’s learning modality can serve as a useful comparison when examining individual student achievement based on their learning modality, however, caution should be given when drawing such conclusions; and (D) Certain students may be more likely to attend in-person compared to other types of students, that is, students with disabilities. Schools may look into these students to determine if that is the case before drawing conclusions about performance based on students’ learning modality.

2020-21 Strive HI School Performance Results

IMPORTANT: Due to COVID-19, in SY 2020, no statewide tests were administered. In SY 2021, Hawai‘i public schools administered a shortened version of the statewide assessment, a skip-year growth methodology was used, and participation rate penalties were waived as approved by the U.S. Department of Education.

How are students performing in each subject?
Measures the percent of students meeting the standard/who are proficient on state assessments. No participation penalty was applied to 2021 proficiency results.
